Cut Costs Not Corners Colin Barrow,2010-05-03 Cost cutting is an issue for
every manager and executive at every level in every company, large or small,
public or private sector. Junior managers who are proactively tight on cost
are learning good habits for the future, ones that will bring them
recognition and advance their climb up the organizational chart. The HR
department is now staffed with tough cost managers dealing with the most
difficult cost category, people. Marketing departments now focus on how to
get higher returns from less spend. Cut Costs Not Corners has a coherent and
structured approach to cost cutting as a permanent activity, combined with
guidance on the practical steps to take and powerful international case
studies. It covers strategic and tactical cost cutting options such as
analysing space needs, buying technology for less, selling off redundant
assets, reducing credit risk, reviewing distribution methods, sourcing new
suppliers or consolidating existing ones, advertising for less, changing the
route to market, travel and utility savings, minimising finance and tax
costs, crisis measures - freezing recruitment, delaying pay rises, sell and
lease back assets - keeping budgets rolling and using a daily cash flow
model.

Theatre Blogging Megan Vaughan,2020-02-06 In this epic history-cum-
anthology, Megan Vaughan tells the story of the theatre blogosphere from the
dawn of the carefully crafted longform post to today's digital newsletters
and social media threads. Contextualising the key debates of fifteen years of
theatre history, and featuring the writings of over 40 theatre bloggers,
Theatre Blogging brings past and present practitioners into conversation with
one another. Starting with Encore Theatre Magazine and Chris Goode in London,
George Hunka and Laura Axelrod in New York, Jill Dolan at Princeton
University, and Alison Croggon in Melbourne, the work of these influential
early adopters is considered alongside those who followed them. Vaughan
explores issues that have affected both arts journalism and the theatre
industry, profiling the activist bloggers arguing for broader representation
and better working conditions, highlighting the innovative dramaturgical
practices that have been developed and piloted by bloggers, and offering
powerful insights into the precarious systems of labour and economics in
which these writers exist. She concludes by considering current threats to
the theatre blogosphere, and how the form continues to evolve in response to

them.

The book is based on interviews with practitioners from many countries, working on different types of projects. It looks behind the scenes at what it takes to create a user experience that can

work across borders, cultures, and languages. The book begins with a quick look at the world outside of UX. This includes the external forces of change and globalization as well as an overview of how culture affects designers and the UX of products. It considers what global UX means for an individual practitioner, a company, and teams. It then turns to the details of global UX with the process and practice of research in the field; how information is brought home and shared with colleagues; and how it is applied in design. The final chapter presents some thoughts about how to deliver value both to projects and the users of finished products. Covers practical user experience best practices for the global environment Features numerous, global, real-world examples, based on interviews with over 60 UX managers and practitioners from around the world Contains case studies and vignettes from user research and design projects for multinational companies and small start-ups

Tackling computing head on, this book enables trainee and experienced teachers to better understand what computing is and how to use ICT effectively in teaching and learning.
