Starch Industries Marney Pascoli Cereda,Olivier Francois Vilpoux,2023-10-26 Starch Industries: Processes and Innovative Products in Food and Non-Food Uses is the third volume of the Underground Starchy Crops of South American Origin book series. Organized in five volumes, this series brings information on the applied level of producing and using starch from a range of plants grown in tropical and subtropical areas that have South American origin. This book presents starch extraction and its food and non-food uses, using large and small industrial processes. The methods and equipment of these technologies are analyzed in detail, so that it is easy to be understood by a diverse public, increasing the visibility of the great potential of use of starchy tubers, rhizomes and roots, and improving processing options. Specifically in processing cassava, which is the only cultivation done on a commercial scale in South America, it is possible to extract starch in industries equipped with equipment, comparable to that of China, Thailand and Vietnam. This title also explores the extraction of smaller starches, such as canna starch, sweet potato and arrowroot from South China, which does not sell starch but transforms it into food paste in small extruders. Edited by a team of experts with a solid background on starch extraction research, the books are aimed at all those involved in research and development, new technological processes, quality control and legislation in the field of starch. Includes information on modified starches, considered the most valued products in the commercial starch portfolio Thoroughly explores small extractors of canna starch, sweet potato and arrowroot from South China, which does not sell starch but transforms it into food paste in small extruders Describes the small, cassava starch fermentation companies that are found in almost all South American countries

Multiphase Reactor Engineering for Clean and Low-Carbon Energy Applications Yi Cheng,Fei Wei,Yong Jin,2017-02-21 Provides a comprehensive review on the brand-new development of several multiphase reactor techniques applied in energy-related processes Explains the fundamentals of multiphase reactors as well as the sophisticated applications Helps the reader to understand the key problems and solutions of clean coal conversion techniques Details the emerging processes for novel refining technology, clean coal conversion techniques, low-cost hydrogen productions and CO₂ capture and storage Introduces current energy-related processes and links the basic principles of emerging processes to the features of multiphase reactors providing an overview of energy conversion in combination with multiphase reactor engineering Includes case studies of novel reactors to illustrate the special features of these reactors

Organic Synthesis, Natural Products Isolation, Drug Design, Industry and the Environment Chhanda Mukhopadhyay,Bubun Banerjee,2023-07-04 Over the years, applications of various non-conventional solvents diversified in various fields such as organic synthesis, natural products, drug design, pharmaceuticals, dyes and agrochemical industries. This book consists of nine chapters, which present recent advances and applications of various non-conventional solvents in organic transformations, drug design and bioremediation. Environmental impacts of non-conventional solvents and comparison between traditional solvents and non-conventional solvents are also discussed in this book.

Lignocellulose Bioconversion Through White Biotechnology Anuj Kumar Chandel,2022-09-13 Lignocellulose Bioconversion Through White Biotechnology Comprehensive resource summarizing the recent technological advancements in white biotechnology and biomass conversion into fuels, chemicals, food, and more Lignocellulose Bioconversion Through White Biotechnology presents cutting-edge information on lignocellulose biomass conversion, detailing how white biotechnology can develop

sustainable biomass pretreatment methods, effective plant cell wall degrading enzymes to yield high quality cellulosic sugars, and the eventual conversion of these sugars into fuels, chemicals, and other materials. To provide comprehensive coverage of the subject, the work offers in-depth critical analysis into both techno-economic and life cycle analysis of lignocellulose-based products. Each of the 16 chapters, written by a well-qualified and established researchers, academics, or engineers, presents key information on a specific facet of lignocellulose-based products. Topics covered include: Lignocellulose feedstock availability, types of feedstock, and potential crops that are of high interest to the industry Lignocellulose bioconversion, including both foundational technical aspects and new modern developments Plant cell wall degrading enzymes, including cellulase improvement and production challenges/solutions when scaling up Improvements and challenges when considering fermenting microorganisms for cellulosic sugars utilization Scaling up of lignocellulose conversion, including insight into current challenges and future practices Techno-economic aspects of lignocellulose feedstock conversion, green consumerism and industrialization aspects of renewable fuels/chemicals Students, academics, researchers, bio-business analysts, and policy-makers working on sustainable fuels, chemicals, materials, and renewable fuels can use *Lignocellulose Bioconversion Through White Biotechnology* to gain invaluable expert insight into the subject, its current state of the art, and potential exciting future avenues to explore.

Necrotizing Enterocolitis David J. Hackam, 2021-03-14 This is the first textbook devoted entirely to understanding and treating necrotizing enterocolitis (NEC), one of the leading causes of death and disability in premature infants. NEC continues to occur in neonatal units across the world, and the overall mortality has remained stubbornly high since its first description decades ago. Despite significant research into NEC, and a greater understanding of its underlying causes, there is no single source of information to which the care team can turn for guidance. This book fills that important gap in clinical care. In selecting the topics for this inaugural textbook, three guiding principles have been followed. First, to include chapters that provide detailed information for the medical team – the doctors and nurses, the therapists and pharmacists, the chaplains and the child life workers – so that each team member can optimally recognize, prevent and treat patients with this disease. Second, to ensure that chapters cover the depth and breadth of the latest clinical and scientific research into NEC, each selected to identify specific preventative strategies or therapies for this disease. Third, and perhaps most importantly, to focus not only on the child with NEC, but also on the child's family, in order to provide comprehensive information about a disease that families have barely heard about, until the jarring day when their precious infant is affected by it. This book therefore: serves as a how-to guide for the care of the infant with NEC summarises critical new research and offers guidelines for future key research areas addresses the complex and difficult issues surrounding care of the critically ill infant suffering from NEC Written for the entire health care team including paediatric surgeons, neonatologists, developmental paediatricians, epidemiologists, ethicists, child life professionals, therapists and specialist nurses, each team member will find this book of value. This book was written to demystify this cruel disease, and to unlock its closely held secrets of pathogenesis, diagnosis, treatment and prevention.

Encyclopedia of Renewable and Sustainable Materials, 2020-01-09 *Encyclopedia of Renewable and Sustainable Materials*, Five Volume Set provides a comprehensive overview, covering research and development on all aspects of renewable, recyclable and sustainable materials. The use of renewable and sustainable materials in building construction, the automotive sector, energy, textiles and others can create markets for agricultural products and additional revenue streams for farmers, as well as significantly reduce carbon dioxide (CO₂) emissions, manufacturing energy requirements, manufacturing costs and waste. This book provides researchers, students and professionals in materials science and engineering with tactics and

information as they face increasingly complex challenges around the development, selection and use of construction and manufacturing materials. Covers a broad range of topics not available elsewhere in one resource Arranged thematically for ease of navigation Discusses key features on processing, use, application and the environmental benefits of renewable and sustainable materials Contains a special focus on sustainability that will lead to the reduction of carbon emissions and enhance protection of the natural environment with regard to sustainable materials

Wound Healing Anna Falabella,Robert Kirsner,2005-08-09 Offering a comprehensive review of the field from basic scientific concepts to assessment and treatment strategies, this reference provides an excellent understanding of the epidemiology, diagnosis, and prevention of acute and chronic wounds-analyzing the latest research from some of the most experienced clinicians and scientists in the field, as w

Carbon Neutrality, Social Media, Artificial Intelligence, volume II Rita Yi Man Li,Xuefeng Shao,James Crabbe,2023-10-20 Carbon neutrality refers to net-zero carbon emissions. It can be achieved by reducing carbon emissions or increasing carbon adsorption. The popularity of social media including Twitter, YouTube, and LinkedIn provides good channels for sharing relevant information and promoting sustainable carbon-neutral living styles. For example, a motor company has launched social media challenges with Korean pop stars to raise awareness of carbon neutrality. Social media provides real-time information. In Jakarta, flood-related tweet intensity during a flood peaked at about 900 tweets a minute during the floods of 2015. The tweets created real-time maps that people sent a minute before. Regarding government policies, identification of problem areas is needed to help policymakers to resolve problems. Machine learning can monitor these events by studying past records to know how countries and governments performed in a high-risk event or environmental crisis and this data can be used to provide future recommendations to governments for policy making. Additionally, AI can analyze online unstructured data, and predict various scenarios of carbon emissions and adsorptions using structured data. The world of social media is a huge data source still yet to be fully optimized in science.

A New Paradigm for Environmental Chemistry and Toxicology Guibin Jiang,Xiangdong Li,2019-08-09 This book provides comprehensive coverage of the theoretical developments and technological breakthroughs that have deepened our understanding of environmental pollution and human health, while also promoting a comprehensive strategy to address these problems. The respective chapters highlight groundbreaking concepts fueling the development of environmental chemistry and toxicology; revolutionary analytical and computational approaches providing novel insights into environmental health; and nature-inspired, innovative engineering solutions for tackling complex hazardous exposures. The book also features a forward-looking perspective on emerging environmental issues that call for new research and regulatory paradigms, laying the groundwork for future advances in the broad field of environmental chemistry and toxicology. Written by respected authorities in the field, *A New Paradigm for Environmental Chemistry and Toxicology - From Concepts to Insights* will offer an invaluable reference guide for concerned researchers and professional practitioners for years to come.

Transforming the Workforce for Children Birth Through Age 8 National Research Council,Institute of Medicine,Board on Children, Youth, and Families,Committee on the Science of Children Birth to Age 8:

Deepening and Broadening the Foundation for Success,2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well.

Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Food Waste Recovery Charis M. Galanakis,2020-12-01 *Food Waste Recovery: Processing Technologies, Industrial Techniques, and Applications*, Second Edition provides information on safe and economical strategies for the recapture of value compounds from food wastes while also exploring their re-utilization in fortifying foods and as ingredients in commercial products. Sections discuss the exploration of management options, different sources, the Universal Recovery Strategy, conventional and emerging technologies, and commercialization issues that target applications of recovered compounds in the food and cosmetics industries. This book is a valuable resource for food scientists, technologists, engineers, chemists, product developers, researchers, academics and professionals working in the food industry. Covers food waste management within the food industry by developing recovery strategies Provides coverage of processing technologies and industrial techniques for the recovery of valuable compounds from food processing by-products Explores the different applications of compounds recovered from food processing using three approaches: targeting by-products, targeting ingredients, and targeting bioactive applications

Textbook of Paediatric Emergency Medicine Peter Cameron,Gary J. Browne,Biswadev Mitra,Stuart Dalziel,Simon Craig,2018-05-02 It is now more than ten years since the publication of the first edition of *Textbook of Paediatric Emergency Medicine* and interest in this specialty continues to grow at a local and international level. Paediatric emergency medicine can be a challenging and difficult area for doctors. Children cannot always communicate their problems verbally, while parents are anxious and the possibility

of a missed diagnosis is ever present. Although the principles in managing paediatric patients are the same as adults there are significant differences in patterns of illness and response. In addition, the therapies available vary widely between adult and paediatric practice. Textbook of Paediatric Emergency Medicine provides clear, concise and comprehensive coverage of all the major topics that present within paediatric emergency medicine. It offers a consensus approach to diagnosis and treatment, drawing on the latest evidence available. Short chapters with key point boxes allow for the quick and easy retrieval of information, essential when time is short. This Third Edition captures the major changes in guidelines across the specialty in the assessment and management of paediatric patients, whilst refining established approaches to practice. The text reviews both new technologies and the better application of older techniques which have led to changes in practice. There are significant updates to the sections on resuscitation and trauma, the clinical applications of bedside ultrasound, analgesia and sedation. There is also a new focus on the teaching and research sections.
