Active Learning Techniques for Librarians Andrew Walsh,Padma Inala,2010-09-01 A practical work outlining the theory and practice of using active learning techniques in library settings. It explains the theory of active learning and argues for its importance in our teaching and is illustrated using a large number of examples of techniques that can be easily transferred and used in teaching library and information skills to a range of learners within all library sectors. These practical examples recognise that for most of us involved in teaching library and information skills the one off session is the norm, so we need techniques that allow us to quickly grab and hold our learners' attention. The examples are equally useful to those new to teaching, who wish to bring active learning into their sessions for the first time, as to those more experienced who want to refresh their teaching with some new ideas and to carry on their development as librarian teachers. Outlines the argument for more active learning techniques in our sessions Explains the theory of active learning Includes examples that can be used in teaching

More than 100 practical, flexible exercises in this remarkable book provide a smorgasbord of choices for teachers to use to help students formulate good questions in an information-rich environment. They put the students at the centre of their own learning as they build the library and research skills that are essential to our information age. Teachers will find innovative ways to help students go beyond memorization and rote learning of facts to focus on personal understanding, and true ownership of the learning experience.
