Using Technology with Classroom Instruction That Works Howard Pitler,Elizabeth R. Hubbell,Matt Kuhn,2012-08-02

Technology is ubiquitous, and its potential to transform learning is immense. The first edition of Using Technology with Classroom Instruction That Works answered some vital questions about 21st century teaching and learning: What are the best ways to incorporate technology into the curriculum? What kinds of technology will best support particular learning tasks and objectives? How does a teacher ensure that technology use will enhance instruction rather than distract from it? This revised and updated second edition of that best-selling book provides fresh answers to these critical questions, taking into account the enormous technological advances that have occurred since the first edition was published, including the proliferation of social networks, mobile devices, and web-based multimedia tools. It also builds on the up-to-date research and instructional planning framework featured in the new edition of Classroom Instruction That Works, outlining the most appropriate technology applications and resources for all nine categories of effective instructional strategies: * Setting objectives and providing feedback * Reinforcing effort and providing recognition * Cooperative learning * Cues, questions, and advance organizers * Nonlinguistic representations * Summarizing and note taking * Assigning homework and providing practice * Identifying similarities and differences * Generating and testing hypotheses Each strategy-focused chapter features examples—across grade levels and subject areas, and drawn from real-life lesson plans and projects—of teachers integrating relevant technology in the classroom in ways that are engaging and inspiring to students. The authors also recommend dozens of word processing applications, spreadsheet generators, educational games, data collection tools, and online resources that can help make lessons more fun, more challenging, and—most of all—more effective.

Rembrandt, the Printmaker Erik Hinterding,Rembrandt Harmenszoon van Rijn,Ger Luijten,Martin Royalton-Kisch,2000 Rembrandt was the most original printmaker of all time. In no fewer than 300 images he covered the full range of styles and subjects for which he is celebrated, including self-portraits, scenes from the Bible, vignettes of everyday life and character studies. The well-known 'Hundred Guilder print', the 'Three Trees' and the 'Three Crosses' are among his most extraordinary creations. He was also famously experimental, often reworking and scratching at his copper plates to improve and extend their expressive power. The results can look startlingly modern, and continue to inspire artists today. This catalogue, compiled by three leading authorities on Rembrandt and printmaking, aims to illustrate a representative selection of his finest prints. Exciting new areas of research have opened up in recent years, making it possible not only to follow the progress of Rembrandt's work on each plate, but also revealing details of his practice of revising the images at various times during his life. The different papers he used will be studied and all the watermarks reproduced. The role played by Rembrandt's preparatory drawings is also now better understood, and all these new insights are presented to a wider public for the first time in this lavishly illustrated volume--Provided by publisher.
