Smart Universities Vladimir L. Uskov, Jeffrey P. Bakken, Robert J. Howlett, Lakhmi C. Jain, 2017-05-18 This book presents peer-reviewed contributions on smart universities by various international research, design and development teams. Smart university is an emerging and rapidly evolving area that creatively integrates innovative concepts; smart software and hardware systems; smart classrooms with state-of-the-art technologies and technical platforms; smart pedagogy based on modern teaching and learning strategies; smart learning and academic analytics; as well as various branches of computer science and computer engineering. The contributions are grouped into several parts: Part 1—Smart Universities: Literature Review and Creative Analysis, Part 2—Smart Universities: Concepts, Systems and Technologies, Part 3—Smart Education: Approaches and Best Practices, and Part 4—Smart Universities: Smart Long Life Learning. The book is a valuable source of research data and findings, design and development outcomes, and best practices for faculty, scholars, Ph.D students, administrators, practitioners and anyone interested in the rapidly growing areas of smart university and smart education.

Digital Education in Russia and Central Asia Elena G. Popkova, Bruno S. Sergi, 2022-05-03 This book is a collection of the leading scientific studies, which elaborate on the unique specifics of Central Asia and Russia and dwell on the potential and current contribution of digital higher education to the preservation of these specifics and adaptation of universities to them. In the four parts of this book, the authors determine the contribution of digital education to cultural inclusivity and the development of international education in Central Asia and Russia. The role of digital higher education in

the sustainable development of regions in Central Asia and Russia is described. The advantages of digital higher education for the optimization of the labor market and employment of youth in Central Asia and Russia are determined. The current directions of digitalization (EdTech) and their contribution to the increase of quality and effectiveness of higher education in Central Asia and Russia are established. This multidisciplinary book is aimed at scholars from various spheres of science (pedagogics, cultural sciences, law, management, economics, and ICT), for whom the book offers the leading scientific and methodological inventions and developments on the digitalization of higher education in Central Asia and Russia.

Jain, 2016-06-13 This book contains the contributions presented at the 3rd international KES conference on Smart Education and Smart e-Learning, which took place in Puerto de la Cruz, Tenerife, Spain, June 15-17, 2016. It contains a total of 56 peer-reviewed book chapters that are grouped into several parts: Part 1 - Smart University: Conceptual Modeling, Part 2 - Smart Education: Research and Case Studies, Part 3 - Smart e-Learning, Part 4 - Smart Education: Software and Hardware Systems, and Part 5 - Smart

Technology as a Resource to Improve Education and Professional Training. We believe that the book will serve as a useful source of research data and valuable information for faculty, scholars, Ph.D. students, administrators, and practitioners - those who are interested in innovative areas of smart education and smart e-learning.

Eight Stories Up DeQuincy Lezine, David Brent, 2008-04-14 As a teenager, DeQuincy Lezine nearly ended his own life, believing it was the only way to escape the emotional pain that was overwhelming him. Instead, Lezine was able to find expert psychiatric care, and went on to found the first university campus-based chapter of the Suicide Prevention Action Network USA. Now a researcher at the University of Rochester's Center for the Study and Prevention of Suicide, Lezine has devoted his life to preventing suicide in adolescents, and he brings the wealth of his personal and professional experience to bear in *Eight Stories Up*. He starts by describing his deteriorating state of mind in college, using his own email archive to retell the episode that would nearly claim his life. He then offers hard-earned wisdom and practical advice to other young people who may be considering suicide. In straightforward, easy-to-understand language, and drawing on the psychiatric expertise of David Brent, MD, Lezine discusses the potential causes of suicide in adolescents, how to seek psychiatric treatment, and how to get the most out of professional help. He also surveys some of the therapies used to prevent suicide, how to talk to loved ones about suicidal thoughts, and how to stay healthy at home and at school. The result is both a remarkable memoir and a useful guide that will ease the isolation and hopelessness caused by thoughts of suicide, helping young people to overcome their troubles in a safe and healthy way. Part of the Adolescent Mental Health Initiative series

of books written specifically for teens and young adults, *Eight Stories Up* offers hope to young people who are at risk of suicide, extending a lifeline of support and guidance that can save their lives.

The 52-Week Low Formula Luke L. Wiley, 2014-04-07 A new but timeless strategy and mindset that should greatly help investors lower downside risk while achieving market outperformance In *The 52-Week Low Formula: A Contrarian Strategy that Lowers Risk, Beats the Market, and Overcomes Human Emotion*, wealth manager Luke L. Wiley, CFP examines the principles behind selecting the outstanding companies and great investment opportunities that are being overlooked. Along the way, Wiley offers a melding of the strategies used by such investment giants as Warren Buffett, Howard Marks, Michael Porter, Seth Klarman, and Pat Dorsey. His proven formula helps investors get the upper hand by identifying solid companies that are poised for growth but have fallen out of the spotlight. Shows you how to investigate companies and identify opportunities Includes detailed discussions of competitive advantage, purchase value, return on invested capital, and debt levels Presents several case studies to examine companies that have overcome obstacles by trading around their 52-week lows *The 52-Week Low Formula* is a must-read for investors and financial advisors who want to break through conventional strategies and avoid common mistakes.

Human-Computer Interaction - INTERACT 2009 Tom Gross, Jan Gulliksen, Paula Kotzé, Lars Oestreicher, Philippe Palanque, Raquel Oliveira Prates, Marco Winckler, 2009-08-06 INTERACT 2009 was the 12th of a series of INTERACT international conferences supported by the IFIP Technical Committee 13 on Human-Computer

Interaction. This year, INTERACT was held in Uppsala (Sweden), organized by the Swedish Interdisciplinary Interest Group for Human-Computer Interaction (STIMDI) in cooperation with the Department of Information Technology at Uppsala University. Like its predecessors, INTERACT 2009 highlighted, both to the academic and to the industrial world, the importance of the human-computer interaction (HCI) area and its most recent breakthroughs on current applications. Both experienced HCI researchers and professionals, as well as newcomers to the HCI field, interested in designing or evaluating interactive software, developing new interaction technologies, or investigating overarching theories of HCI, found in INTERACT 2009 a great forum for communication with people of similar interests, to encourage collaboration and to learn. INTERACT 2009 had Research and Practice as its special theme. The reason we selected this theme is that the research within the field has drifted away from the practical applicability of its results and that the HCI practice has come to disregard the knowledge and development within the academic community.

The UX Book Rex Hartson, Pardha S. Pyla, 2012-01-25 The UX Book: Process and Guidelines for Ensuring a Quality User Experience aims to help readers learn how to create and refine interaction designs that ensure a quality user experience (UX). The book seeks to expand the concept of traditional usability to a broader notion of user experience; to provide a hands-on, practical guide to best practices and established principles in a UX lifecycle; and to describe a pragmatic process for managing the overall development effort. The book provides an iterative and evaluation-centered UX lifecycle template, called the Wheel, for interaction design. Key concepts discussed include contextual inquiry

and analysis; extracting interaction design requirements; constructing design-informing models; design production; UX goals, metrics, and targets; prototyping; UX evaluation; the interaction cycle and the user action framework; and UX design guidelines. This book will be useful to anyone interested in learning more about creating interaction designs to ensure a quality user experience. These include interaction designers, graphic designers, usability analysts, software engineers, programmers, systems analysts, software quality-assurance specialists, human factors engineers, cognitive psychologists, cosmic psychics, trainers, technical writers, documentation specialists, marketing personnel, and project managers. A very broad approach to user experience through its components—usability, usefulness, and emotional impact with special attention to lightweight methods such as rapid UX evaluation techniques and an agile UX development process Universal applicability of processes, principles, and guidelines—not just for GUIs and the Web, but for all kinds of interaction and devices: embodied interaction, mobile devices, ATMs, refrigerators, and elevator controls, and even highway signage Extensive design guidelines applied in the context of the various kinds of affordances necessary to support all aspects of interaction Real-world stories and contributions from accomplished UX practitioners A practical guide to best practices and established principles in UX A lifecycle template that can be instantiated and tailored to a given project, for a given type of system development, on a given budget

CIA Lock Picking Central Intelligence Agency, 2015-12-31 There has been much opinion and little fact written on the subject of lock picking. It is the purpose of this book to clarify the facts about this delicate process, and at the same time to train you in proper procedure. Reading this book is certainly enough to get you started picking simple locks, but remember: a great deal of time and patience are needed to become a truly proficient locksmith. In this volume, you will learn the fundamental theories of lock picking in addition to proper terminology, the importance of tool design (i.e. how to select and use the right tool for a given job), the effects of tolerances, and finally the techniques most commonly used by locksmiths to successfully pick the vast majority of standard pin and

wafer tumbler locks. Lock picking is a useful, engaging, and satisfying skill; with this book and a little determination, you'll be off to a great start.

Autodesk Revit 2018 MEP Fundamentals - Metric Units ASCENT - Center for Technical Knowledge, Autodesk Authorized Publisher, 2017-04-13 To take full advantage of Building Information Modeling, the Autodesk(R) Revit(R) 2018 MEP: Fundamentals student guide has been designed to teach the concepts and principles of creating 3D parametric models of MEP system from engineering design through construction documentation. The student guide is intended to introduce students to the software's user interface and the basic HVAC, electrical, and piping/plumbing components that make the Autodesk Revit software a powerful and flexible engineering modeling tool. The student guide will also familiarize students with the tools required to create, document, and print the parametric model. The examples and practices are designed to take the students through the basics of a full MEP project from linking in an architectural model to construction documents. Topics Covered Working with the Autodesk Revit software's basic viewing, drawing, and editing commands. Inserting and connecting MEP components and using the System Browser. Working with linked architectural files. Creating spaces and zones so that you can analyze heating and cooling loads. Creating HVAC networks with air terminals, mechanical equipment, ducts, and pipes. Creating plumbing networks with plumbing fixtures and pipes. Creating electrical circuits with electrical equipment,

devices, and lighting fixtures and adding cable trays and conduits. Creating HVAC and plumbing systems with automatic duct and piping layouts. Testing duct, piping and electrical systems. Creating and annotating construction documents. Adding tags and creating schedules. Detailing in the Autodesk Revit software. Prerequisites This student guide introduces the fundamental skills in learning the Autodesk Revit MEP software. It is highly recommended that students have experience and knowledge in MEP engineering and its terminology.

Photoshop Restoration & Retouching Katrin Eismann, 2004 This edition has been updated with new techniques (as applicable), new projects, and new screenshots. Theology Without Walls Jerry L. Martin, 2019-10-01 Thinking about ultimate reality is becoming increasingly transreligious. This transreligious turn follows inevitably from the discovery of divine truths in multiple traditions. Global communications bring the full range of religious ideas and practices to anyone with access to the internet. Moreover, the growth of the nones and those who describe themselves as spiritual but not religious creates a pressing need for theological thinking not bound by prescribed doctrines and fixed rituals. This book responds to this vital need. The chapters in this volume each examine the claim that if the aim of theology is to know and articulate all we can about the divine reality, and if revelations, enlightenments, and insights into that reality are not limited to a single tradition, then what is called for is a theology without confessional restrictions. In other words, a Theology Without Walls. To ground the project in examples, the volume provides emerging models of transreligious inquiry. It also includes

sympathetic critics who raise valid concerns that such a theology must face. This is a book that will be of urgent interest to theologians, religious studies scholars, and philosophers of religion. It will be especially suitable for those interested in comparative theology, inter-religious and interfaith understanding, new trends in constructive theology, normative religious studies, and global philosophy of religion.
