**CIA Lock Picking** Central Intelligence Agency,2015-12-31 There has been much opinion and little fact written on the subject of lock picking. It is the purpose of this book to clarify the facts about this delicate process, and at the same time to train you in proper procedure. Reading this book is certainly enough to get you started picking simple locks, but remember: a great deal of time and patience are needed to become a truly proficient locksmith. In this volume, you will learn the fundamental theories of lock picking in addition to proper terminology, the importance of tool design (i.e. how to select and use the right tool for a given job), the effects of tolerances, and finally the techniques most commonly used by locksmiths to successfully pick the vast majority of standard pin and wafer tumbler locks. **Theology Without Walls** Jerry L. Martin, 2019-10-01 Thinking about ultimate reality is becoming increasingly transreligious. This transreligious turn follows inevitably from the discovery of divine truths in multiple traditions. Global communications bring the full range of religious ideas and practices to anyone with access to the internet. Moreover, the growth of the nones and those who describe themselves as spiritual but not religious creates a pressing need for theological thinking not bound by prescribed doctrines and fixed rituals. This book responds to this vital need. The chapters in this volume each examine the claim that if the aim of theology is to know and articulate all we can about the divine reality, and if revelations, enlightenments, and insights into that reality are not limited to a single tradition, then what is called for is a theology without confessional restrictions. In other words, a Theology Without Walls. To ground the project in examples, the volume provides emerging models of transreligious inquiry. It also includes sympathetic critics who raise valid concerns that such a theology must face. This is a book that will be of urgent interest to theologians, religious studies scholars, and philosophers of religion. It will be especially suitable for those interested in comparative theology, inter-religious and interfaith understanding, new trends in constructive theology, normative religious studies, and global philosophy of religion.
