**Noninvasive Vascular Diagnosis** Ali F. AbuRahma,2017-10-02 This large format book is the definitive text on vascular surgery written by expert editors and contributors. It is well supported by exceptional illustrative material. The book is invaluable to all those who work in vascular laboratories as well as internists, cardiologists, vascular laboratory directors and staff, general surgeons involved in vascular surgery and the vascular surgery community in general. Noninvasive Vascular Diagnosis comprehensively covers all aspects of noninvasive evaluation of the circulatory system in the extremities. The increasing popularity of noninvasive techniques is not reflected in the number of comprehensive works on the topic and it is clear from the success of the first edition that the demand for an updated volume is increasing.

*Noninvasive Vascular Diagnosis* Ali F. AbuRahma, John Bergan, 2013-06-29 The book provides the newest definitive text on the current techniques used in assessing vascular disorders. Readers will receive authoritative information and will be guided through the establishment and accreditation of a vascular laboratory and introduced to the physics of diagnostic testing. The chapters comprehensively explain the use of ultrasound in diagnosing cerebrovascular, renovascular, visceral ischemia and peripheral arterial disease, as well as venous disorders and deep abdominal vascular conditions. The book contains over 300 illustrations, many of them in color. The book will be invaluable to physicians who treat vascular disorders, surgeons, cardiologists, vascular radiologists and the vascular laboratory staff.

**Genetics of Hearing Impairment** Robert J. Ruben, Thomas R. Van de Water, Karen P. Steel, New York Academy of Sciences, Deafness Research Foundation (U.S.), 1991

**Spatiality** Robert T. Tally, 2013 Divided into six chapters, each dealing with different aspects of the spatial in literary studies, the book provides: An overview of the spatial turn in literary theory - from modern philosophy and historicism to cartography and literary theory. Introductions to the major theorists such as Michel Foucault, David Harvey, Edward Soja, Erich Auerbach, Georg Lukács, and Mikhail Bakhtin. An analysis of spatiality from a variety of perspectives - the writer as map-maker, different literary and critical 'spaces', the concept of literary geography, cartographics and geocriticism. As the first guide to the literature and criticism of 'space', this clear and engaging book is essential reading.

**Complete Science of Wrestling** George Hackenschmidt, 2012-03-22 But then, equally of course, every man who takes up wrestling seriously will only do so because he is fond of it, because he prefers wrestling to most, if not all, other sports and pastimes. Every wrestler who ever trod the mat is a potential champion. He may not have been endowed with the wrestling instinct, but he will be able to cultivate a high degree of wrestling science, even quickness, if not absolute lightning rapidity of movement, which, if combined with the necessary strength and stamina, may enable him to compete with all but the greatest champions on equal terms. Skill, that is to say, the science of wrestling, can only be cultivated by practice, and the man who takes up wrestling seriously must get as much practice as he can with the most skilful wrestlers. The better his opponents are, the faster will be his progress in knowledge of the art, as also in the power of its application. He can learn a good deal also in another way, and that is by closely watching serious bouts between skilled wrestlers, and by carefully practising such moves as attract his notice. - George Hackenschmidt This is an original version, restored and re-formatted edition of Hackenschmidt's 1909 classic. **The Queen of the Ring** Jeff Leen, 2010-07-13 The story of Mildred Burke, the longest reigning champion of female wrestling, from the Pulitzer Prize-winning journalist and author of *Kings of Cocaine*. In this in-depth account, journalist Jeff Leen pulls back the curtain on a forgotten era when a petite midwesterner used her beauty and brawn to dominate America's most masculine sport. At only five feet two, Mildred Burke was an unlikely candidate for the ring. A waitress barely scraping by on Depression-era tips, she saw her way out when she attended her first wrestling match. When women were still struggling for equality with men, Burke regularly fought—and beat—male wrestlers. Rippling with muscle and dripping with diamonds, she walked the fine line between pin-up beauty and hardened brawler. An unforgettable slice of Americana, *The Queen of the Ring* captures the golden age of wrestling, when one gritty, glamorous woman rose through the ranks to take her place in athletic history. “Jeff Leen has made a fabulous contribution to the sports-history canon. *The Queen of the Ring* is a marvelous evocation of an era, and a riveting portrait of a one-of-a-kind American moll.” —Sally Jenkins, author of *The Real All Americans*

*Contemporary Nordic Literature and Spatiality* Kristina Malmio, Kaisa Kurikka, 2019-10-14 This open access collection offers a detailed mapping of recent Nordic literature and its different genres (fiction, poetry, and children's literature) through the perspective of spatiality. Concentrating on contemporary Nordic literature, the book presents a distinctive view on the spatial turn and widens the understanding of Nordic literature outside of canonized authors. Examining literatures by Danish, Norwegian, Swedish, and Finnish authors, the chapters investigate a recurrent theme of social criticism and analyze this criticism against the welfare state and power hierarchies in spatial terms. The chapters explore various narrative worlds and spaces—from the urban to parks and forests, from textual spaces to spatial thematics, studying these spatial features in relation to the problems of late modernity.

*Bastard Or Playmate?* Robrecht Vanderbeeken, 2012 Artistic media seem to be in a permanent condition of mutation and transformation. Contemporary artists often investigate the limits and possibilities of the media they use and experiment with the crossing, upgrading and mutilation of media. Others explicitly explore the unknown intermedial space between existing media, searching for the hybrid beings that occupy these in-betweens. This issue of *Theater* topics explores the theme of mutating and adapting media in its relation with theatre and performance--P. [4] of cover.

**Thyroid FNA Cytology** Kennichi Kakudo, 2019-05-06 This book offers a comprehensive guide to thyroid fine needle aspiration (FNA) cytology. Borderline/precursor tumors, which were introduced in the 4th edition of the WHO classification of thyroid tumors, are also incorporated. In this second edition, prominent international experts discuss the different approaches to thyroid FNA cytology employed in various countries such as Australia, Canada, China, Korea, Portugal, Switzerland, Taiwan, Thailand, Turkey, Ukraine, the USA, UK, Italy and Japan. The book not only covers key principles of thyroid cytopathology but also addresses technical aspects such as procedural complications, liquid-based cytology, immunocytochemistry, staining procedures, and potential pitfalls. Case-based descriptions and clinical findings, radiologic imaging, cytology, and histopathologic diagnosis – all complemented by a wealth of detailed photographs – will help reader understand and overcome many common dilemmas in daily practice. As such, the book represents an indispensable reference work for all cytopathologists, especially those practicing thyroid cytopathology.

**The Right Heart** Sean P. Gaine, Robert Naeije, Andrew John Peacock, 2014-05-12 The heart and lung are intricately linked. When the heart is affected by disease, the lungs will often show some related pathological or clinical conditions and vice versa. Pulmonary heart disease is by definition a condition when the lungs cause the heart to fail. The left ventricle in combination with the other structures in the “left heart” pumps blood throughout the body. The right ventricle (and structures of the “right heart”) pumps blood to the lungs where it is oxygenated and returned to the left heart for distribution. In normal circumstances, the right heart pumps blood into the lungs without any resistance. The lungs usually have minimal pressure and the right heart easily pumps blood through. However when there is lung disease present, like emphysema, chronic obstructive lung disease (COPD) or pulmonary hypertension- the small blood vessels become very stiff and rigid. The right ventricle is no longer able to push blood into the lungs and eventually fails. This is known as pulmonary heart disease. Pulmonary heart disease is also known as right heart failure or cor pulmonale. The chief cause of right heart failure is the increase in blood pressure in the lungs (pulmonary artery).

**Spatial Literary Studies** Robert T. Tally Jr., 2020-10-20 Following the spatial turn in the humanities and social sciences, *Spatial Literary Studies: Interdisciplinary Approaches to Space, Geography, and the Imagination* offers a wide range of essays that reframe or transform contemporary criticism by focusing attention, in various ways, on the dynamic relations among space, place, and literature. These essays reflect upon the representation of space and place, whether in the real world, in imaginary universes, or in those hybrid zones where fiction meets reality. Working within or alongside related approaches, such as geocriticism,

literary geography, and the spatial humanities, these essays examine the relationship between literary spatiality and different genres or media, such as film or television. The contributors to Spatial Literary Studies draw upon diverse critical and theoretical traditions in disclosing, analyzing, and exploring the significance of space, place, and mapping in literature and in the world, thus making new textual geographies and literary cartographies possible.

**Bouvier's Law Dictionary** John Bouvier,1897  
Advances in Emerging Trends and Technologies Miguel Botto-Tobar,Joffre León-Acurio,Angela Díaz Cadena,Práxedes Montiel Díaz,2019-10-12 This book constitutes the proceedings of the 1st International Conference on Advances in Emerging Trends and Technologies (ICAETT 2019), held in Quito, Ecuador, on 29–31 May 2019, jointly organized by Universidad Tecnológica Israel, Universidad Técnica del Norte, and Instituto Tecnológico Superior Rumiñahui, and supported by SNOTRA. ICAETT 2019 brought together top researchers and practitioners working in different domains of computer science to share their expertise and to discuss future developments and potential collaborations. Presenting high-quality, peer-reviewed papers, the book discusses the following topics: Technology Trends Electronics Intelligent Systems Machine Vision Communication Security e-Learning e-Business e-Government and e-Participation

**Multimodality Imaging** Qifa Zhou,Zhongping Chen,2020 This book provides a state-of-the-art overview of the combined use of imaging modalities to obtain important functional and morphological information on intravascular disease and enhance disease detection. It discusses the integration of intravascular ultrasound (IVUS, intravascular optical coherence tomography (OCT), intravascular photoacoustic imaging (IVPA) and acoustic radiation force optical coherence elastography (ARF-OCE), and introduces the integration of multimodality imaging systems, such as IR and florescence. It includes the latest research advances and numerous imaging photos to offer readers insights into current intravascular applications. It is a valuable resource for students, scientists and physicians wanting to gain a deeper understanding of multimodality imaging tools.

The Governor's Dilemma Kenneth W. Abbott,Bernhard Zangl,Duncan Snidal,Philipp Genschel,2020-02-27 The Governor's Dilemma develops a general theory of indirect governance based on the tradeoff between governor control and intermediary competence; the empirical chapters apply that theory to a diverse range of cases encompassing both international relations and comparative politics. The theoretical framework paper starts from the observation that virtually all governance is indirect, carried out through intermediaries. But governors in indirect governance relationships face a dilemma: competent intermediaries gain power from the competencies they contribute, making them difficult to control, while efforts to control intermediary behavior limit important intermediary competencies, including expertise, credibility, and legitimacy. Thus, governors can obtain either high intermediary competence or strong control, but not both. This competence-control tradeoff is a common condition of indirect governance, whether governors are domestic or international, public or private, democratic or authoritarian; and whether governance addresses economic, security, or social issues. The empirical chapters analyze the operation and implications of the governor's dilemma in cases involving the governance of violence (e.g., secret police, support for foreign rebel groups, private security companies), the governance of markets (e.g., the Euro crisis, capital markets, EU regulation, the G20), and cross-cutting governance issues (colonial empires, Trump's Dilemma). Competence-control theory helps explain many features of governance that other theories cannot: why indirect governance is not limited to principal-agent delegation, but takes multiple forms; why governors create seemingly counter-productive intermediary relationships; and why indirect governance is frequently unstable over time.

**Molecular Neurology** Stephen Waxman,2010-07-26 Why a book on molecular neurology? Molecular neuroscience is advancing at a spectacular rate. As it does so, it is revealing important clues to the pathogenesis and pathophysiology of neurological diseases, and to the therapeutic targets that they present. Medicines work by targeting molecules. The more specific the targeting, the more specific the actions, and the fewer the side effects. Molecular Neurology highlights, for graduate and MD-PhD students, research fellows and research-oriented clinical fellows, and researchers in the neurosciences and other biomedical sciences, the principles underlying molecular medicine as related to neurology. Written by internationally recognized experts, this well-illustrated and well-referenced book presents the most up-to-date principles and disease examples relevant to molecular neurology, and reviews the concepts, strategies, and latest progress in this field. This book will interest anyone studying the molecular basis of neurology, or developing new therapies in neurology. Describes the newest molecular aspects of neurological disorders Provides an introduction to neurological disorders for basic scientists Updates clinicians and clinical researchers on the most recent developments

**SPECT and SPECT/CT** Chun K. Kim,Katherine A. Zukotynski,2017-06-14 FOUR STARS from Doody's Star Ratings™ Internationally renowned authorities in the field of hybrid imaging contribute firsthand expertise on the practical application of single-photon emission computed tomography (SPECT) and SPECT/CT. By combining clear anatomic markers from CT with functional knowledge from SPECT, SPECT/CT provides added value for patient evaluation and is becoming increasingly prevalent in routine clinical practice. Indeed, hybrid imaging is touted by many as a game changer in nuclear medicine. The first two chapters of this book provide a foundation for understanding SPECT and SPECT/CT technological principles, including the associated radiopharmaceuticals. The remaining chapters detail the utility of SPECT and SPECT/CT in clinical practice including neuroscience and pediatrics, as well as specific pathologies. The book concludes with in-depth discussion of select case studies. Key Features Efficacious use of SPECT and SPECT/CT for primary body systems, including the central nervous, cardiovascular, respiratory, and skeletal systems Value for the assessment of neoplastic disease, infection/inflammation, thyroid and parathyroid gland disorders Fourteen high-quality videos delineate specific techniques and clinical applications Meticulous, four-color graphics clearly elucidate key concepts Illustrative case studies offer educational teaching pearls Together, the concise, evidence-based text and wealth of SPECT/CT images deliver a solid knowledge base, enabling practitioners to learn the effective use of this technology. This must-have book is certain to be an invaluable resource for a diverse spectrum of practicing and trainee clinicians in fields such as radiology, nuclear medicine, and radiation oncology.
