British Labour and the Cold War Peter Weiler, 1988 A critical examination of the labour government and trades Union Congress in the immediate postwar period, this book argues that the Cold War was not just a traditional conflict between states but also an attempt to contain the growth of radical working-class movements at home and abroad. These radical movements, stimulated by the Second World War and its aftermath, seemed to policymakers within the Labour Party and the TUC to threaten British interests. The author contends that the Labour government never seriously considered following a socialist foreign policy, but instead sought to shape political developments throughout the world in ways most conducive to maintaining Britain's traditional economic and imperial interests. The government was able to follow established policies abroad and increasingly at home at least in part because British trade union leaders supported its attempts to prevent radicals and communists from coming to power in trade union movements inside Britain and throughout the world. In so doing, the trade union movement significantly extended its links with the state, in particular by cooperating with it in the sphere of foreign and colonial labour policy.

Statistics Dept.,2014-11-03 The IMF's principal statistical publication, International Financial Statistics (IFS) Online, is the standard source of international statistics on all aspects of international and domestic finance. For most countries, IFS Online reports data on balance of payments, international investment position, international liquidity, monetary and financial statistics, exchange rates, interest rates, prices, production, government accounts, national accounts, and population. Updated monthly.

International Financial Statistics, February 2015 International Monetary Fund. Statistics Dept.,2015-01-30 This monthly issue of International Financial Statistics (IFS) is a standard source of statistics on all aspects of international and domestic finance. Information is presented in tables for specific countries and in tables for area and world aggregates. Quarterly issues of this publication provide, for 160 countries, tables with current data (or estimates) on the value of imports from and exports to their most important trading partners. In addition, similar summary tables for the world, industrial countries, and developing countries are included. The yearbook provides, for the most recent seven years, detailed trade data by country for approximately 184 countries, the world, and major areas. This annual publication provides detailed data on transactions in revenue, expense, net acquisition of assets and liabilities, other economic flows, and

balances of assets and liabilities of general government and its subsectors. The data are compiled according to the framework of the 2001 Government Finance Statistics Manual, which provides for several summary measures of government fiscal performance. In IFS, exchange rates are expressed in time series of national currency units per SDR and national currency units per US dollar, or vice versa.

International Financial Statistics, January 2015 International Monetary Fund. Statistics Dept.,2015-01-05 This monthly issue of International Financial Statistics (IFS) contains country tables for most IMF members, as well as for Anguilla, Aruba, the Central African Economic and Monetary Community, Curaçao, the currency union of Curaçao and Sint Maarten, the Eastern Caribbean Currency Union, the euro area, Montserrat, the former Netherlands Antilles, Sint Maarten, the West African Economic Monetary Union, West Bank and Gaza, and some non-sovereign territorial entities for which statistics are provided internationally on a separate basis. Exchange rates in IFS are classified into three broad categories, reflecting the role of the authorities in determining the rates and/or the multiplicity of the exchange rates in a country. The three categories are the market rate, describing an exchange rate determined largely by market forces; the official rate, describing an exchange rate determined by the authorities—sometimes in a flexible manner; and the principal, secondary, or tertiary rate, for countries maintaining multiple exchange arrangements.
