Roger Norum

Kingdom of Nokia Carl-Gustav Lindén, 2021-04-29 Kingdom of Nokia tells a fascinating story of corporatism in Finland. How did the mobile phone giant Nokia make the Finnish elite willing to serve the interests of the company? Nokia became a global player in mobile communications in the 1990s, and helped establish Anglo-Saxon capitalism in Finland. Through its success and strong lobbying, the company managed to capture the attention of Finnish politicians, civil servants, and journalists nationwide. With concrete detailed examples, Kingdom of Nokia illustrates how Nokia organised lavishing trips to journalists and paid direct campaign funding to politicians to establish its role at the core of Finnish decision-making. As a result, the company influenced important political decisions such as joining the European Union and adopting the euro, and further, Nokia even drafted its own law to serve its special interests. All this in a country considered one of the least corrupt in the world.

Embodied Care Maurice Hamington, 2010-10-01 Until now, ethicists have said little about the body, limiting their comments on it to remarks made in passing or, at best, devoting a chapter to the subject. Embodied Care is the first work to argue for the body's

centrality to care ethics, doing so by analyzing our corporeality at the phenomenological level. It develops the idea that our bodies are central to our morality, paying particular attention to the ways we come to care for one another. Hamington's argues that human bodies are built to care; as a result, embodiment must be recognized as a central factor in moral consideration. He takes the reader on an exciting journey from modern care ethics to Merleau-Ponty's philosophy of the body and then to Jane Addams's social activism and philosophy. The ideas in *Embodied Care* do not lead to yet another competing theory of morality; rather, they progress through theory and case studies to suggest that no theory of morality can be complete without a full consideration of the body.

Practicing Democracy E. Luhtakallio, 2012-05-29 This book is about the mundane, local, every day practices that constitutes democracy. Focusing on France and Finland, the book defines politicization as the key process in understanding democracy in different cultural contexts and shows a nuanced picture of two opposite models of European politics.

English-Pali Dictionary Ambalaṅga Polvattṅ

Buddhadatta, 1989 Here is a reprint of the English-Pali Dictionary by A.P. Buddhadatta Mahathera published long ago by the Pali

Text Society in Roman script. This publication was then considered a notable event in the life of the Society for it was a great improvement on a similar earlier work by Venerable W. Piyatissa whose usefulness was reduced for the English-speaking readers by the Pali words being given in Sinhalese script. This is a considerably enlarged form of a concise English-Pali Dictionary compiled by the present author during the second World War. The author has coined many new words and has given more than one Pali word for some English verbs which do not exist in the ancient languages like Pali. This dictionary, though not an exhaustive one, has proved much useful to the scholars of the Pali language as it presents well chosen material in a single volume of a manageable size. (by the same author) **CONCISE PALI-ENGLISH DICTIONARY** - This Concise Pali-English Dictionary has been prepared mainly for use by students in schools and colleges. The author is not only an eminent Elder of the Buddhist Order but one of the leading Pali scholars recognized both in the East and West as an authority on the subject. It is to be observed that the author has kept more or less to the traditional sense of words while not altogether ignoring the meanings given by western scholars in their translations and lexicons. Many errors in the latter sources have also been rectified.

But the basic sense adopted is in nearly every instance the traditionally accepted meaning in accord with the commentaries and the glossaries. This perhaps is of special value to beginners as thereby they get introduced to the indigenous tradition, thus providing a useful basis on which to build up a more scientific knowledge as the study advances.

Creativity and the Contemporary Economy Niina Koivunen, Alf Rehn, 2009 Creativity has become a central concept in trying to understand the contemporary economy. It is a universally accepted strategic asset and a key issue in developing economic policy. But at the same time, this lauding of the creative economy raises many questions. What can creativity really do for us? What challenges does it pose for the management and organization of companies? And, in an age when everyone tries to be creative, what does the concept even mean? This book deals with these issues, and is an engagement with the manifold ways in which creativity emerges as energy and functions as an organizing principle in modern organizations. The book presents a wide variety of approaches to understanding one of the most critical and exciting issues in modern management, with sections dedicated to the organization of innovation and creativity, leadership and management in creative endeavors, as well as creativity and organization change.

Afropolitan Projects Anima Adjepong, 2021-10-21 Beyond

simplistic binaries of the dark continent or Africa Rising, Africans at home and abroad articulate their identities through their quotidian practices and cultural politics. Amongst the privileged classes, these articulations can be characterized as Afropolitan projects-- cultural, political, and aesthetic expressions of global belonging rooted in African ideals. This ethnographic study examines the Afropolitan projects of Ghanaians living in two cosmopolitan cities: Houston, Texas, and Accra, Ghana. Anima Adjepong's focus shifts between the cities, exploring contests around national and pan-African cultural politics, race, class, sexuality, and religion. Focusing particularly on queer sexuality, Adjepong offers unique insight into the contemporary sexual politics of the Afropolitan class. The book expands and complicates existing research by providing an in-depth transnational case study that not only addresses questions of cosmopolitanism, class, and racial identity but also considers how gender and sexuality inform the racialized identities of Africans in the United States and in Ghana. Bringing an understudied cohort of class-privileged Africans to the forefront, Adjepong offers a more fully realized understanding of the diversity of African lives.

From Girls in Their Elements to Women in Science Judith S.

Kaufman,2003 Annotation Through memory-work, participants acquire consciousness of how they see, feel, and think about the world in particular ways. In this text, five female American scholars use memory-work to learn about their socialization in relation to the natural world, and therefore to science. After explaining the theoretical background and methodology of memory-work, the authors describe the themes emerging from the analysis of their memories. As a result of the project, while all are critical of a science based in empiricism and positivism, they have been able to bring science to a personal level of experience and now find it possible to conceive of science in new ways. For educators, scientists, feminists, and general readers. Annotation (c)2003 Book News, Inc., Portland, OR (booknews.com)
