The Black Digital Elite John T. Barber,2006-09-30 Most discussions of the digital divide focus on the gap between African Americans and others when it comes to using, and benefiting from, the technological and business opportunities of the information age. Although many African Americans are locked out of the information revolution, others are an integral part of its development and progress. Barber profiles 26 of those leaders here, engagingly and informatively blending biography with insight and analysis. Most discussions of the digital divide focus on the gap between African Americans and others when it comes to using, and benefiting from, the technological and business opportunities of the information age. Although many African Americans are locked out of the information revolution, others are an integral part of its development and progress. Barber profiles 26 of them here, engagingly and informatively blending biography with insight and analysis. Documenting history as it is being made, this book features achievers in all fields of relevant endeavor, including scientists, business leaders, power brokers, and community leaders. Among them are Robert Johnson, CEO of Black Entertainment Television; Richard Parsons, CEO of AOL Time-Warner; congressmen and other policymakers in Washington, D.C.; and men and women who are working to bridge the digital divide in satellite radio, web-based portals, and on the ground with IT workshops. This book is not just about business success or technological progress. The African American digerati are solving one of the great social challenges of the 21st century: creating a black community that is prosperous in a society that has changed from being a land-based industrial society to a cyberspace-based information society.

One-Dish Vegan Robin Robertson,2013-11-12 Vegan books have risen to a dominant sales position in the vegetarian category. One-dish meals are perennially popular on American tables, and books devoted to one-dish cooking perform well. Robin Robertson's One-Dish Vegan is the first book at the intersection of these two powerful cookbook categories. Robin Robertson has built a publishing record of very successful titles in the vegetarian category. She is known for her creativity in the kitchen, for the breadth of enticing ingredients and flavors with which she works, and for her expertise in vegetarian nutrition - with a special focus lately on how vegans still can get enough protein in their diets. Typically, it takes two or three courses or dishes to make a well-rounded vegan meal. To meet this criterion in one dish takes the kind of ingenuity and expert knowledge that Robertson possesses. One-Dish Vegan contains more than 150 recipes. They range from the most popular categories of one-dish dining like stews, chilis, and casseroles (and other baked dishes) to a host of stovetop sautés and stir-fries as well as substantial salads and dishes that feature pasta as well as other noodles, such as Asian noodles. The recipes are at once homey and adventuresome, comforting and surprising. Above all, they demonstrate that it really is possible to get a complete vegan meal into one dish, full of good-for-you nutrients and bright, satisfying flavors.
