An Introduction to Digital Media Tony Feldman,2003-09-02 In this clear and highly accessible book, Tony Feldman provides an account of the evolution and application of digital media. Clarifying its underlying technologies, he identifies its immense commercial and human potential. Using as a starting point a simplification which considers new media in two distinct sectors; packaged 'off-line' media such as CD-ROMs; and the world of transmitted media which includes digital broadcasting and interactive online services, Feldman provides a comprehensive overview of the digital media landscape. Focusing on multimedia and the entertainment media he describes and analyses the spectacular rise of CD-based information and the equally revolutionary development of the Internet and online services. Set within a commercial context, readers can identify the potential to generate revenue and profit from the new media. An Introduction to Digital Media concludes with a strategic assessment of the implications of going digital for individuals, companies and corporations.

Servicing Satellite TV Equipment Nick Beer,1998-04-09 This is the definitive practical guide to fault-finding, troubleshooting and servicing satellite television equipment, both indoors and outdoors. It will take you through all areas of satellite television system servicing from the simplest fixed dish to fully motorised systems. From PAL to Mac to MPEG all contemporary systems are covered. Satellite TV systems have been installed in a wide variety of locations, using a bewildering range of equipment. That equipment is beginning to need maintenance and repair. To cope with the volume and variety of work, Nick Beer has written the first guide to satellite TV which concentrates on what to look for and what to do when it goes wrong. This book is up to date and crammed with real-life experience, not theoretical data or manufacturer's ideal specs. Nick Beer has already written the best-selling Servicing Audio and Hi-fi Equipment and is a technical correspondent for many UK and international journals such as Television. He also works as an engineer and teaches satellite servicing to technicians. A practical guide to a new and important area for service engineers Covers indoor and outdoor equipment Written by an experienced author, teacher and engineer

How to Make Money Teaching Online with Your Camcorder and Pc Anne Hart,2002-03-11 What Can You Teach Online from Home Using Your Camcorder, Personal Computer and the Internet? Did you know that you can teach almost any subject online, on the Web at Blackboard.com, (<http://www.blackboard.com>) for a university, community college, continuing education department, or in adult education, or for yourself as an independent contractor in your own personal broadcasting network? Blackboard is where I teach. Founded to transform the Internet into a powerful environment for teaching and learning, Blackboard traces its technology roots to Cornell University. Today, thousands of institutions in 140 countries deliver e-Education services through Blackboard's suite of enterprise systems. If you put up a course at Blackboard.com on the Web or for any similar type of teaching area on the Web, you can teach online independently without anyone hiring you as a teacher. You are an independent consultant, a trainer, an independent contractor, or you can start your own school or one course online and teach. This book is about using your personal computer and your camcorder linked together to teach online from your home any subject you are able to teach, have expertise in, or enjoy researching. This can be a hobby, what you have studied and are credentialed or licensed, or any how-to subject. You can teach writing, using a camcorder, public speaking, or any technology that you have worked with and have expert knowledge of in a home-based online office.

Young People and New Media Sonia Livingstone,2002-04-24 Combining a comprehensive literature review with original empirical research on young people's use of new media, this book provides a fresh and in-depth discussion of the increasingly complex relationship between the media and childhood, the family and the home. We can no longer imagine our daily lives without media and communication technologies. At the start of the 21st century, the home is being transformed into the site of a multimedia culture. This

book looks at the discussions around the potential benefits of this new media and asks: What impact are the new media having on childhood and adolescence? Are these technologies changing the nature of young people's leisure and sociability? and has the participation of children in private and public life changed?

A New Automatic Processing Technique for Satellite Imagery Analysis R. S. Hawkins, 1977 A new approach to the analysis of satellite imagery is presented. The central part of this approach is an algorithm which compresses information stored in the ordinary six or eight bits per picture element into only one bit. The quality of this compression is demonstrated by examples of its application to high resolution visual imagery. Both visual inspection and rms difference criterion are used for this evaluation. There are four objectives of this report which are: to review the status of processing techniques which remove redundant information, to show the need for redundancy reduction in the processing of satellite images, to present the development of an algorithm for reducing it, and to show results obtained by application of the algorithm to visual imagery. Also, comments are made on needed developments of the technique and its potential application to problems of analysis of satellite imagery data. (Author).
