General Concepts in Integrated Pest and Disease Management A. Ciancio,K.G. Mukerji,2007-07-20 This, the first volume of the 'Integrated Management of Plant Pests and Diseases' book series, presents general concepts on integrated pest and disease management. Section one includes chapters on infection models, resurgence and replacement, plant disease epidemiology and effects of climate change in tropical environments. The second section includes remote sensing and information technology. Finally, the third section covers molecular aspects of the subject.

Health Care Technology and Its Assessment in Eight Countries Mary Adams,1995-10 Examines the management of health care technology in 8 countries: Australia, Canada, France, Germany, the Netherlands, Sweden, the U.K & the U.S. Six technologies (or sets of technologies) -- including evaluation & management efforts & how the technologies diffused -- are presented & compared: treatments for coronary artery disease, imaging technologies (CT & MRI scanning), laparoscopic surgery, treatments for end-stage renal disease, neonatal intensive care, & breast cancer screening. Extensive bibliography for each country. Charts & tables.

Aquaphotomics for Bio-diagnostics in Dairy Roumiana Tsenkova,Jelena Muncan,2021-11-15 This book is the result of more than 20 years of experience in working with near-infrared spectroscopy for raw milk analysis. The totality of this work presents extensive possibilities for milk spectral measurements that can be carried out in dairy. Moving beyond the standard milk components such as fat, protein, or lactose, this book presents near-infrared spectroscopy as a method that can also be used in disease diagnostics. The measurements and experimental results presented here are all based on the utilization of usually neglected near-infrared regions—regions with strong absorbance of water. The author has found the water – light interaction discussed to be an immensely rich source of information, not only on milk composition but also on the physiological status of the animals involved. A special section of the book is dedicated to exploration of potential interfering factors that may influence the analysis and contribute to the robustness of the models. The research described in this book served as a basis for the development of the novel discipline aquaphotomics and is of interest to anyone working in this field.

Large Area and Flexible Electronics Mario Caironi,Yong-Young Noh,2015-01-13 From materials to applications, this ready reference covers the entire value chain from fundamentals via processing right up to devices, presenting different approaches to large-area electronics, thus enabling readers to compare materials, properties and performance. Divided into two parts, the first focuses on the materials used for the electronic functionality, covering organic and inorganic semiconductors, including vacuum and solution-processed metal-oxide semiconductors, nanomembranes and nanocrystals, as well as conductors and insulators. The second part reviews the devices and applications of large-area electronics, including flexible and ultra-high-resolution displays, light-emitting transistors, organic and inorganic photovoltaics, large-area imagers and sensors, non-volatile memories and radio-frequency identification tags. With its academic and industrial viewpoints, this volume provides in-depth knowledge for experienced researchers while also serving as a first-stop resource for those entering the field.

Intellectual Property Stories Jane C. Ginsburg,Rochelle Cooper Dreyfuss,2006 This book brings famous cases to life by telling the true, never-heard-before stories behind landmark Intellectual Property cases. It is organized into six chapters, each drawing on cases in patents, copyrights, trademarks, or unfair competition, to illustrate the problems encountered in intellectual property law. The works, inventions, and marks at issue in these cases vary widely.

Farewell to the Party Model? Marion Reiser,Everhard Holtmann,2008-05-14 Marion Reiser, Everhard Holtmann Local independent lists as political actors are a common phenomenon on the local level in many European countries – in established Western democracies as well as in the 'new' democracies in Central and Eastern Europe. In some West European countries, these non-partisan groups have been an established and stable element in the local political system for decades. Typically, they understand themselves as protectors of a harmonious factual political style. In their opinion, good local politics is not compatible with party politics so they consequently perceive themselves as non-parties. During the last two decades, presence and success of local lists have steadily increased in these countries. Furthermore, during the last years local lists emerged also in countries which had been formerly fully party-politicised on the local level. Explanations offered for these developments are often based on the observation of a general decline of trust in established parties and politicians. Hence, it has been argued that the disenchantment with political parties is a fertile ground for local lists. For the Central and East European countries, this argument can be employed only to a certain extent. Local lists established themselves in the early 1990's as important actors on the local level especially due to a lack of party organisation in the process of democratic consolidation.

Wax Deposition Zhenyu Huang,Sheng Zheng,H. Scott Fogler,2016-03-09 Wax Deposition: Experimental Characterizations, Theoretical Modeling, and Field Practices covers the entire spectrum of knowledge on wax deposition. The book delivers a detailed description of the thermodynamic and transport theories for wax deposition modeling as well as a comprehensive review of laboratory testing for the establishment of appropriate field control strategies. Offering valuable insight from academic research and the flow assurance industry, this balanced text: Discusses the background of wax deposition, including the cause of the phenomenon, the magnitude of the problem, and its impact on petroleum production Introduces laboratory techniques and theoretical models to measure and predict key parameters of wax precipitation,

such as the wax appearance temperature and the wax precipitation curve Explains how to conduct and interpret laboratory experiments to benchmark different wax deposition models, to better understand wax deposition behaviors, and to predict wax deposit growth for the field Presents various models for wax deposition, analyzing the advantages and disadvantages of each and evaluating the differences between the assumptions used Provides numerous examples of how field management strategies for wax deposition can be established based on laboratory testing and modeling work Wax Deposition: Experimental Characterizations, Theoretical Modeling, and Field aids flow assurance engineers in identifying the severity and controlling the problem of wax deposition. The book also shows students and researchers how fundamental principles of thermodynamics, heat, and mass transfer can be applied to solve a problem common to the petroleum industry.

Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation Christopher B. Field,Vicente Barros,Thomas F. Stocker,Qin Dahe,2012-05-28 This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

Microbial Pathogenesis: Infection and Immunity Uday Kishore,Annapurna Nayak,2013-12-04 The book starts with dissecting mechanisms underlying viral immune evasion via exploiting the host complement system by vaccinia virus, and by modulating the type 1 interferon response by RNA viruses. Yet another chapter looks into how viroporins expressed by different families of viruses causing influenza A virus, SARS, hepatitis C and HIV interact with several cellular pathways. Understanding of these mechanisms can aid the development of novel potential anti-viral targets. The chapter on tuberculosis discusses the emerging importance of the innate immune mechanisms against Mycobacterium tuberculosis infection and latency. This book has a strong focus on fungal pathogenesis and immunity, starting with virulence and host factors that attain great importance in candidiasis and associated escape tricks of seriously opportunistic fungi. Two chapters on Aspergillus fumigatus elaborate on the pathogenic mechanisms: first discussing A. fumigatus-airway epithelium interaction, followed by fungal and host factors that are paramount in the development of allergic and invasive aspergillosis. In the subsequent chapter, there is a general discussion on the innate and adaptive immune responses against primary and opportunistic fungal pathogens.

Mass Cytometry Helen M. McGuire,Thomas M. Ashhurst,2019-05-13 This book details up-to-date and cutting edge compilation of protocols in mass cytometry. Chapters guide readers through setting up a facility, panel design and reagent preparation, sample preparation, specific applications, and data analysis. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and cutting-edge, Mass Cytometry: Methods and Protocols aims to ensure successful results in the further study of this vital field.

ICGSCE 2014 Md Amin Hashim,2015-06-15 This book includes selected papers from the ICGSCE 2014 with focus on the current trends of global resources used to meet the growing demands to improve life style coupled with environmental and social problems related to the resource consumption with emphasize to move towards sustainable development. It provides a platform for scientists and academicians from local and international universities and industries to promote, share and discuss various new issues and developments in different areas of Chemical Engineering with respect to global sustainability. Under the sustainability umbrella the topics covered are; alternative energy sources, alternative feedstock for energy and chemicals, alternative raw materials for household commodity, green process with minimal environmental impact, process intensification, waste minimization, recycling of wastes and providing quality water, food and medicines. Other topics covered include: 1. Oil and gas, Biofuel, Fuel cell, Renewable energy 2. Green technology, Sustainability, Environmental, Carbon sequestration, Carbon footprint, Natural resources 3. Chemical processes, Separation technology, Biotechnology, Nanotechnology, Food technology, Particle technology, Corrosion, Pharmaceutical, Phytochemical, Oleochemical 4. Process modeling, Process Simulation, Process control 5. Advanced material, Polymer, Catalyst, Enzyme 6. Policy, Regulations, Strategy and implementation, Safety, Management of science, Engineering education 7. Process Safety and Loss Prevention, Environmental and chemical risk assessment, Transportation risk analysis, Inherent safety.

The Historical Roots of Human Trafficking Makini Chisolm-Straker,Katherine Chon,2021-05-22 A public health approach to human trafficking requires a nuanced understanding of its root causes. This textbook applies a historical lens to human trafficking from expert resources for the multidisciplinary public health learner and worker. The book challenges the anti-trafficking paradigm to meaningfully understand historical legacies of present-day root-causes of human trafficking. This textbook focuses on history's utility in public health. It describes history to contextualize and explain present times, and provides public health lessons in trafficking prevention and intervention. Public health recognizes the importance of multiple systems to solve big problems, so the chapters illustrate how current anti-trafficking efforts in markets and public systems connect with historical policies and data in the United States. Topics explored include: Capitalism, Colonialism, and Imperialism: Roots for Present-Day Trafficking Invisibility, Forced Labor, and Domestic Work Addressing Modern Slavery in Global Supply Chains: The Role of Businesses Immigration, Precarity, and Human Trafficking: Histories and Legacies of Asian American Racial Exclusion in the United States Systemic and Structural Roots of Child Sex Trafficking: The Role of Gender, Race, and Sexual Orientation in Disproportionate Victimization The Complexities of Complex Trauma: An Historical and Contemporary Review of Healing in the Aftermath of Commercialized Violence Historical Context Matters: Health Research, Health Care, and Bodies of

Color in the United States Understanding linkages between contemporary manifestations of human trafficking with their respective historical roots offers meaningful insights into the roles of public policies, institutions, cultural beliefs, and socioeconomic norms in commercialized violence. The textbook identifies sustainable solutions to prevent human trafficking and improve the health of the Nation. The Historical Roots of Human Trafficking is essential reading for students of public health, health sciences, criminology, and social sciences; public health professionals; academics; anti-trafficking advocates, policy-makers, taskforces, funders, and organizations; legislators; and governmental agencies and administrators.

Environment-Friendly Construction Materials: Volume 2 Inge Hoff,Serji Amirkhanian,Shaopeng Wu,Yue Xiao,2019 Construction materials are the most widely used materials for civil infrastructure in our daily lives. However, from an environmental point of view, they consume a huge amount of natural resources and generate the majority of greenhouse gasses. Therefore, many new and novel technologies for designing environmentally friendly construction materials have been developed recently. This Special Issue, Environment-Friendly Construction Materials, has been proposed and organized as a means to present recent developments in the field of construction materials. It covers a wide range of selected topics on construction materials.
