Bifurcation Stenting Ron Waksman, John A. Ormiston, 2012-03-22 Here is expert guidance on one of the most vexing clinical challenges faced by interventional cardiologists. Written by global thought leaders in the area and edited by two internationally-recognized pioneers in interventional cardiology, Bifurcation Stenting covers all techniques, imaging modalities, and devices in current use, including VH-IVUS and OCT. It includes practical tips/tricks from leading experts and a section of challenging cases to further illustrate the material and help readers better understand the treatment of bifurcation lesions.

Digital Mammography Peter Hogg, Judith Kelly, Claire Mercer, 2015-02-17 This book offers a single publication to be utilised comprehensively as a reference manual within current mammographic clinical practice for use by assistant practitioners and practitioners as well as trainees in radiography and related disciplines. In recent years mammographic clinical practice and technology have evolved rapidly and become increasingly sophisticated, this book will cover these issues. The public feel increasingly empowered to 'have a say' in their care and expectations of their mammography experience is high. Consequently a well-trained, well-informed practitioner is of paramount importance in clinical practice today. This book addresses patient/client-related issues in the form of psychological and emotional support they may require. This will enable the reader to gain insight into the patient/client perspective and thereby assist in meeting their needs.

Integrative Pediatric Oncology Alfred Längler, Patrick J. Mansky, Georg Seifert, 2012-12-13 This book covers a broad spectrum of complementary and alternative medicine (CAM) practices employed in pediatric oncology worldwide, with a special focus on the methods widely used in Western countries. It is a scientifically based, practice-oriented handbook that will meet the needs of pediatric oncologists working in medical practices and hospitals. An introductory section includes a comparative overview of current CAM use in pediatric oncology in different countries. Commonly used CAM methods are then discussed in a series of chapters that provide a theoretical description of the method in question, followed by more practically oriented information, including scientific data if applicable. Special attention is paid to the issue of how to integrate each method into conventional pediatric oncology. The closing parts of the book consider aspects of CAM requiring further development, such as institutional research, and provide a road map on establishing integrative pediatric oncology worldwide.

Control and Optimization of Distributed Generation Systems Magdi S. Mahmoud, Fouad M. AL-Sunni, 2015-05-14 This text is an introduction to the use of control in distributed power generation. It shows the reader how reliable control can be achieved so as to realize the potential of small networks of diverse energy sources, either singly or in coordination, for meeting concerns of energy cost, energy security and environmental protection. The book demonstrates how such microgrids, interconnecting groups of generating units and loads within a local area, can be an effective means of balancing electrical supply and demand. It takes advantage of the ability to connect and disconnect microgrids from the main body of the power grid to give flexibility in response to special events, planned or unplanned. In order to capture the main opportunities for expanding the power grid and to present the plethora of associated open problems in control theory Control and Optimization of Distributed Generation Systems is organized to treat three key themes, namely: system architecture and integration; modelling and analysis; and communications and control. Each chapter makes use of examples and simulations and appropriate problems to help the reader study. Tools helpful to the reader in accessing the

mathematical analysis presented within the main body of the book are given in an appendix. Control and Optimization of Distributed Generation Systems will enable readers new to the field of distributed power generation and networked control, whether experienced academic migrating from another field or graduate student beginning a research career, to familiarize themselves with the important points of the control and regulation of microgrids. It will also be useful for practising power engineers wishing to keep abreast of changes in power grids necessitated by the diversification of generating methods.

Understanding Business Statistics Ned Freed, Stacey Jones, Timothy Bergquist, 2013-11-27 Understanding Business Statistics is a highly student-oriented business statistics product that makes statistics understandable for students with a wide variety of statistics backgrounds. The authors provide an intuitive discussion of basic statistical principles rather than a mathematically rigorous development. They use simple examples to introduce and develop concepts and procedures. For ease of reading, chapter sections are designed to ensure easy-to-follow continuity from one section to the next. This text provides students with frequent opportunities to check their understanding of topics as they move through the chapters, with exercises included at the end of most sections. In many cases, the exercises have been designed to extend chapter discussions rather than solely provide opportunities for drill and repetition. Understanding Business Statistics is written using a modular approach, allowing students to approach the subject step-by-step with very clear instructions.

The ISRM Suggested Methods for Rock Characterization, Testing and Monitoring: 2007-2014 R. Ulusay, 2014-07-25 This book is a collection of ISRM suggested methods for testing or measuring properties of rocks and rock masses both in the laboratory and in situ, as well as for monitoring the performance of rock engineering structures. The first collection (Yellow Book) has been published in 1981. In order to provide access to all the Suggested Methods in one volume, the ISRM Blue Book was published in 2007 (by the ISRM via the Turkish National Group) and contains the complete set of Suggested Methods from 1974 to 2006 inclusive. The papers in this most recent volume have been published during the last seven years in international journals, mainly in Rock Mechanics and Rock Engineering. They offer guidance for rock characterization procedures and laboratory and field testing and monitoring in rock engineering. These methods provide a definitive procedure for the identification, measurement and evaluation of one or more qualities, characteristics or properties of rocks or rock systems that produces a test result.

Applied Ethnomusicology Klisala Harrison, Elizabeth Mackinlay, Svanibor Pettan, 2010-08-11 Applied ethnomusicology is an approach guided by principles of social responsibility, which extends the usual academic goal of broadening and deepening knowledge and understanding toward solving concrete problems and toward working both inside and beyond typical academic contexts (International Council for Traditional Music 2007). This edited volume is based on the first symposium of the ICTM's Study Group on Applied Ethnomusicology in Ljubljana, Slovenia in 2008 that brought together more than thirty specialists from sixteen countries worldwide. It contains a Preface, an extensive Introduction, and twelve selected peer-reviewed articles by authors from Australia, Austria, Canada, Germany, Slovenia, Serbia, South Africa, the United Kingdom, and the United States of America, divided into four

thematic groups. These groups encompass: diverse perspectives on the growing field of applied ethnomusicology in various geographical and problem-solving contexts; research and teaching-related connotations; the potential in contributing to sustainable music cultures; and the use of music in conflict resolution situations. The edited volume *Applied Ethnomusicology: Historical and Contemporary Approaches* brings together previously dispersed knowledge and perspectives, and offers new insights to various disciplines within the humanities and social sciences. Rooted in diverse scholarly traditions, it addresses a variety of challenges in today's world and aims to benefit the quality of human existence.

Energy Efficiency in Domestic Appliances and Lighting Paolo Bertoldi, 2022-05-18 This book contains peer-reviewed papers presented at the 10th International Conference on Energy Efficiency in Domestic Appliances and Lighting (EEDAL'19), held in Jinan, China from 6-8 November 2019. Energy efficiency helps to mitigate CO₂ emissions and at the same time increases the security of energy supply. Energy efficiency is recognized as the cleanest, quickest and cheapest energy source. Not only this, but energy efficiency brings several additional benefits for society and end-users, such as lower energy costs, reduced local pollution, better outdoor and indoor air quality, etc. However, in some sectors, such as the residential sector, barriers to investments in energy efficiency remain. Legislation adopted in several jurisdictions (EU, Japan, USA, China, India, Australia, Brazil, etc.) helps in removing barriers and fosters investments in energy efficiency. These initiatives complement innovative financing schemes for energy efficiency, the provision of energy services by energy service companies and different types of information programs. At the same time, progress in appliance technologies and in solid state lighting offer high levels of efficiency. LED lighting is an example. As with previous conferences in this series, EEDAL'19 provided a unique forum to discuss and debate the latest developments in energy and environmental impact of households, including appliances, lighting, heating and cooling equipment, electronics, smart meters, consumer behavior, and policies and programs. EEDAL addressed non-technical issues such as consumer behavior, energy access in developing countries, and demand response.

Cases on Challenges Facing E-Learning and National Development Ugur Demiray, 2010 E-Learning offers many opportunities for individuals and institutions all over the world. Individuals can access to education they need almost anytime and anywhere they are ready to. Institutions are able to provide more cost-effective training to their employees. E-learning context is very important. It is common to find educators who perceive e-learning as internet-only education that encourages a static and content-focused series of text pages on screen. Others envisage the shallow and random online messages that are typical of a social real-time chat session, and wonder how that type of communication could add any value to academic discourse. Some may have experienced e-learning done poorly, and extrapolate their experience into a negative impression of all e-learning. The book will examine the emergence and growth of e-learning. The use of the e prefix indicates the application of information and communication technology (ICT) in government, finance, and all forms of socio-economic and community development. This eBook is designed and presented in two volumes. The first volume consists of the country cases of Algeria, Belarus, Bulgaria, Egypt, Estonia, Finland, Greece, Jordan, Hungary, Iraq, Iran, Israel, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Macedonia, Moldova, and Morocco. The second volume gives a place to the country cases of Norway, Oman, Palestine, Poland, Romania, Russia, Saudi Arabia, Serbia, Slovakia, Slovenia, Sweden, Syria, Tajikistan, Tunisia, Turkey, Ukraine, United Arab Emirates and Uzbekistan. So, the book consists of more than 70 authors from 39 different countries and from 42 universities and 14 institutions with company for all 42 chapters. (Individual chapters contain

references.) [Cases on Challenges Facing E-Learning and National Development: Institutional Studies and Practices. Volume II was co-edited by Leena Vainio, Mehmet Can Sahin, Gulsun Kurubacak, Petri T. Lounaskorpi, S. Raja Rao, and Carlos Machado. For Volume I, see ED508217.].
