An Introduction to Game Theory Martin J. Osborne, 2009-01 This text emphasizes the ideas behind modern game theory rather than their mathematical expression, but defines all concepts precisely. It covers strategic, extensive and coalitional games and includes the topics of repeated games, bargaining theory and evolutionary equilibrium.

Design of Highway Bridges Richard M. Barker, Jay A. Puckett, 2013-02-04 Up-to-date coverage of bridge design and analysis revised to reflect the fifth edition of the AASHTO LRFD specifications *Design of Highway Bridges, Third Edition* offers detailed coverage of engineering basics for the design of short- and medium-span bridges. Revised to conform with the latest fifth edition of the American Association of State Highway and Transportation Officials (AASHTO) LRFD Bridge Design Specifications, it is an excellent engineering resource for both professionals and students. This updated edition has been reorganized throughout, spreading the material into twenty

shorter, more focused chapters that make information even easier to find and navigate. It also features: Expanded coverage of computer modeling, calibration of service limit states, rigid method system analysis, and concrete shear Information on key bridge types, selection principles, and aesthetic issues Dozens of worked problems that allow techniques to be applied to real-world problems and design specifications A new color insert of bridge photographs, including examples of historical and aesthetic significance New coverage of the green aspects of recycled steel Selected references for further study From gaining a quick familiarity with the AASHTO LRFD specifications to seeking broader guidance on highway bridge design Design of Highway Bridges is the one-stop, ready reference that puts information at your fingertips, while also serving as an excellent study guide and reference for the U.S. Professional Engineering Examination.

Discrete Inverse Problems Per Christian Hansen, 2010 This book gives an introduction to the practical treatment of inverse problems by means of numerical methods, with a focus on basic mathematical and computational aspects. To solve inverse problems, we demonstrate that insight about them goes hand in hand with algorithms.

Pi: A Source Book Jonathan M. Borwein, 2013-06-29 Our intention in this collection is to provide, largely through original writings, an extended account of pi from the dawn of mathematical time to the present. The story of pi reflects the most seminal, the most serious, and sometimes the most whimsical aspects of mathematics. A surprising amount of the most important mathematics and a significant number of the most important mathematicians have contributed to its unfolding directly or otherwise. Pi is one of the few mathematical concepts whose mention evokes a response of recognition and

interest in those not concerned professionally with the subject. It has been a part of human culture and the educated imagination for more than twenty-five hundred years. The computation of pi is virtually the only topic from the most ancient stratum of mathematics that is still of serious interest to modern mathematical research. To pursue this topic as it developed throughout the millennia is to follow a thread through the history of mathematics that winds through geometry, analysis and special functions, numerical analysis, algebra, and number theory. It offers a subject that provides mathematicians with examples of many current mathematical techniques as well as a palpable sense of their historical development. Why a Source Book? Few books serve wider potential audiences than does a source book. To our knowledge, there is at present no easy access to the bulk of the material we have collected.

Wind Resource Assessment Michael Brower, 2012-06-19 A practical, authoritative guide to the assessment of wind resources for utility-scale wind projects authored by a team of experts from a leading renewable energy consultancy The successful development of wind energy projects depends on an accurate assessment of where, how often, and how strongly the wind blows. A mistake in this stage of evaluation can cause severe financial losses and missed opportunities for developers, lenders, and investors. Wind Resource Assessment: A Practical Guide to Developing a Wind Project shows readers how to achieve a high standard of resource assessment, reduce the uncertainty associated with long-term energy performance, and maximize the value of their project assets. Beginning with the siting, installation, and operation of a high-quality wind monitoring program, this book continues with methods of data quality control and validation, extrapolating measurements from anemometer height to turbine height, adjusting short-term observations for

historical climate conditions, and wind flow modeling to account for terrain and surface conditions. In addition, Wind Resource Assessment addresses special topics such as: Worker safety Data security Remote sensing technology (sodar and lidar) Offshore resource assessment Impacts of climate change Uncertainty estimation Plant design and energy production estimatio Filled with important information ranging from basic fundamentals of wind to cutting-edge research topics, and accompanied by helpful references and discussion questions, this comprehensive text designed for an international audience is a vital reference that promotes consistent standards for wind assessment across the industry.

Precision Crop Protection - the Challenge and Use of Heterogeneity Erich-Christian Oerke,Roland Gerhards,Gunter Menz,Richard A. Sikora,2010-08-03 Precision farming is an agricultural management system using global navigation satellite systems, geographic information systems, remote sensing, and data management systems for optimizing the use of nutrients, water, seed, pesticides and energy in heterogeneous field situations. This book provides extensive information on the state-of-the-art of research on precision crop protection and recent developments in site-specific application technologies for the management of weeds, arthropod pests, pathogens and nematodes. It gives the reader an up-to-date and in-depth review of both basic and applied research developments. The chapters discuss I) biology and epidemiology of pests, II) new sensor technologies, III) applications of multi-scale sensor systems, IV) sensor detection of pests in growing crops, V) spatial and non-spatial data management, VI) impact of pest heterogeneity and VII) precise mechanical and chemical pest control.

How to Fix Your Credit Luis Cortes, Karin Price Mueller, 2007-11-01 You're not alone. About 51 million American households carry credit card debt at an average balance of nearly \$12,000. Credit trouble is a problem you can't ignore. No matter how much money you earn or where you live, if you've made mistakes with credit in the past, those mistakes will haunt you -- unless you empower yourself to fix them. And you can. Managing your credit can be a complicated issue, but the Reverend Luis Cortés Jr. provides an easy-to-follow guide to help you handle the process. Any amount of debt, no matter how scary the number, can be paid off with a little planning and a lot of determination. The sooner you begin, the easier your task will be. Let Reverend Cortés help you today before your situation becomes worse tomorrow.

Hotel Front Office Management James A. Bardi, 1996-08-26 This Second Edition has been updated to include a brand new chapter on yield management, plus a human resources chapter refocused to cover current trends in training, employee empowerment, and reducing turnover. In addition, you'll discover how to increase efficiency with today's hospitality technology--from electronic lock to front office equipment.

Fundamentals of Fire Phenomena James G. Quintiere, 2006-04-21 Understanding fire dynamics and combustion is essential in fire safety engineering and in fire science curricula. Engineers and students involved in fire protection, safety and investigation need to know and predict how fire behaves to be able to implement adequate safety measures and hazard analyses. Fire phenomena encompass everything about the scientific principles behind fire behavior. Combining the principles of chemistry, physics, heat and mass transfer, and fluid dynamics necessary to understand the fundamentals of fire phenomena,

this book integrates the subject into a clear discipline: Covers thermochemistry including mixtures and chemical reactions; Introduces combustion to the fire protection student; Discusses premixed flames and spontaneous ignition; Presents conservation laws for control volumes, including the effects of fire; Describes the theoretical bases for empirical aspects of the subject of fire; Analyses ignition of liquids and the importance of evaporation including heat and mass transfer; Features the stages of fire in compartments, and the role of scale modeling in fire. Fundamentals of Fire Phenomena is an invaluable reference tool for practising engineers in any aspect of safety or forensic analysis. Fire safety officers, safety practitioners and safety consultants will also find it an excellent resource. In addition, this is a must-have book for senior engineering students and postgraduates studying fire protection and fire aspects of combustion.

Untapped Talent Jeffrey D. Korzenik, 2021-04-13 Tens of millions of people in the U.S. with criminal records are highly talented, reliable, and eager to work. Implement these second chance hiring practices to give your company a significant competitive advantage over those that do not. Researched, tested, and written by the chief investment strategist of one of the country's leading business banks, Jeffrey Korzenik includes dozens of examples of businesses that have successfully implemented the second chance hiring practices outlined in this book. Korzenik shows those companies that have learned to go beyond the label and to evaluate the qualities of the individual applicant have tapped into an often-overlooked source of loyal and productive talent. In Untapped Talent, you will: Understand what goes into a successful second chance hire, from the support that will be needed

internally to the resources that are available from outside agencies. Learn how businesses from a variety of industries have instituted successful second chance hiring programs and how this has positively impacted their culture and bottom line. Gain practical onboarding and coaching strategies that will help ensure a smooth transition and a productive, happy new employee. Acquire relevant knowledge of the criminal justice system to provide context in identifying the potential of second chance hiring. Your path to a loyal, engaged, and productive workforce starts with the clear competitive advantage you'll gain by implementing the second-chance hiring practices within Untapped Talent.

Is Globalization Over? Jeremy Green, 2019-11-08 Looming trade wars and rising nationalism have stirred troubling memories of the 1930s. Will history repeat itself? Do we face the chaotic breakdown of the global economic system in the face of stagnation, protectionism and political tumult? Jeremy Green argues that, although we face grave problems, globalization is not about to end. Setting today's challenges within a longer historical context, he demonstrates that the global economy is more interconnected than ever before and the costs of undoing it high enough to make a complete breakdown unlikely. Popular analogies between the 1930s and today are misleading. But the governing liberal ideology of globalisation is changing. It is mutating into a hard-edged nationalism that defends free markets while reasserting sovereignty and strengthening borders. This 'national liberalism' threatens a much more dangerous disintegration, fuelled by inequality and ecological crisis, unless we radically rethink the international status quo. This brilliantly original account of the discontents of globalization is a must-

read both for concerned citizens and students of global political economy.

Chrysler Engines, 1922-1998 Willem L Weertman, 2007-10-26 This book chronicles over 75 years of engine design, development, and production at Chrysler Corporation. Every production engine built by Chrysler is covered in detail, with descriptions, pictures, specifications, and timelines provided for each. In addition to the specifications, the book also looks at the personalities behind the engines' development, and the vehicles in which the engines were used.

Iconic Product Design Wolfgang Joensson, 2020-10-06 You will undoubtedly recognize quite a few of the products featured in this book—the Coca-Cola bottle, the Wester & Co pocket knife, the Kitchen Aid mixer, the Le Creuset Dutch oven, the Weber grill, the Bic cristal pen, the Rolodex address file, Kikkoman soy sauce bottles, the Kodak Instamatic, the Polaroid SX-70, the SONY Walkman, the Apple MacIntosh, and the Dyson air-multiplier. Maybe they were part of your childhood or represent your ideal in design; certainly, they will evoke a sense of the familiar. Iconic Product Design is an engaging and accessible presentation of the history of product design, providing an extensive catalog of the most memorable product designs of the past 150 years. More than 130 remarkable product designs from all areas, including household appliances, everyday objects, furniture, entertainment technology and office equipment, are presented in this collection. Accompanying the images are well-researched and charming vignettes about each product, with amusing insights and fun tidbits of information about its time and place. Each one informs how design has been influenced by changes in technology,

science, and society. While these products were considered innovative at their inception, all have withstood the test of time and many are still, remarkably, in use today. Iconic Product Design is a comprehensive collection of iconic product design objects, chronologically organized from the beginning of the Industrial Revolution to the present. Each spread of this richly illustrated book showcases the author's representation of the chosen design, expressing its essence and capturing its spirit. In the introductory text, he shares his concept of the term iconicity to help the reader understand what makes these products stand out and why they are considered icons today.
