Working in a 24/7 Economy Harriet B.

Presser, 2005-02-01 An economy that operates 24/7—as ours now does—imposes extraordinary burdens on workers. Two-fifths of all employed Americans work mostly during evenings, nights, weekends, or on rotating shifts outside the traditional 9-to-5 work day. The pervasiveness of nonstandard work schedules has become a significant social phenomenon, with important implications for the health and well-being of workers and their families. In *Working in a 24/7 Economy*, Harriet Presser looks at the effects of nonstandard work schedules on family functioning and shows how these schedules disrupt marriages and force families to cobble together complex child-care arrangements that should concern us all. The number of hours Americans work has received ample attention, but the issue of which hours—or days—Americans work has received much less scrutiny. *Working in a 24/7 Economy* provides a comprehensive overview of who works nonstandard schedules and why. Presser argues that the growth in women's employment, technological change, and other demographic changes over the past thirty years gave rise to the growing demand for late-shift and weekend employment in the service sector. She also demonstrates that most people who work these hours do so primarily because it is a job requirement, rather than a choice based on personal considerations. Presser shows that the consequences of working nonstandard schedules often differ for men and women since housework and child-rearing remain assigned primarily to women even when both spouses are employed. As with many other social problems, the burden of these schedules disproportionately affects the working poor, reflecting their lack of options in the workplace and adding to their disadvantage. Presser also documents how such work arrangements

have created a new rhythm of daily life within many American families, including those with two earners and absent fathers. With spouses often not at home together in the evenings or nights, and parents often not at home with their children at such times, the relatively new concept of home-time has emerged as primary concern for families across the nation. Employing a wealth of empirical data, *Working in a 24/7 Economy* shows that nonstandard work schedules are both highly prevalent among American families and generate a level of complexity in family functioning that demands greater public attention. Presser makes a convincing case for expanded research and meaningful policy initiatives to address this growing social phenomenon.

Families That Work Janet C. Gornick, Marcia K. Meyers, 2003-08-28 Parents around the world grapple with the common challenge of balancing work and child care. Despite common problems, the industrialized nations have developed dramatically different social and labor market policies—policies that vary widely in the level of support they provide for parents and the extent to which they encourage an equal division of labor between parents as they balance work and care. In Families That Work, Janet Gornick and Marcia Meyers take a close look at the work-family policies in the United States and abroad and call for a new and expanded role for the U.S. government in order to bring this country up to the standards taken for granted in many other Western nations. In many countries in Europe and in Canada, family leave policies grant parents paid time off to care for their young children, and labor market regulations go a long way toward ensuring that work does not overwhelm family obligations. In addition, early childhood education and care programs guarantee access to high-quality care for their children. In most of these countries, policies encourage gender equality by strengthening mothers' ties to employment and encouraging fathers to spend more time caregiving at home. In sharp contrast, Gornick and Meyers show how in the United States—an economy with high labor force participation among both fathers and mothers—parents are left to craft private solutions to the society-wide dilemma of who will care for the children? Parents—overwhelmingly mothers—must loosen their ties to the workplace to care for their children; workers are forced to negotiate with their employers, often unsuccessfully, for family leave and reduced work schedules; and parents must purchase care of

dubious quality, at high prices, from consumer markets. By leaving child care solutions up to hard-pressed working parents, these private solutions exact a high price in terms of gender inequality in the workplace and at home, family stress and economic insecurity, and—not least—child well-being. Gornick and Meyers show that it is possible—based on the experiences of other countries—to enhance child well-being and to increase gender equality by promoting more extensive and egalitarian family leave, work-time, and child care policies. *Families That Work* demonstrates convincingly that the United States has much to learn from policies in Europe and in Canada, and that the often-repeated claim that the United States is simply too different to draw lessons from other countries is based largely on misperceptions about policies in other countries and about the possibility of policy expansion in the United States.
