The High School Principal's Calendar Robert Ricken, Richard Simon, Michael Terc, 2000-06-21 This book has been developed for both new and experienced principals; it lays out everyday challenges and administrative necessities to help principals plan strategically for the academic year. This work provides a month-to-month guide to make the school year run smoothly from opening to closing. Chapters cover key tasks for each month beginning in July: overview of tasks; communications--letters, memos, correspondence, media relationships; planning--workshops, orientations, field trips, fundraising activities; personnel--assignments, schedules, rosters, tenure recommendations; and checklists to monitor progress with an assortment of tasks for each month. These checklists offer flexibility for modification, and the monthly calendar helps busy administrators avoid reinventing the wheel each year. Appendices include sample documents, teachers' manual index, and various memos covering fundraising, building security, class elections, locker cleanup, weekly memo, orientation agenda, and emergency drills, among others. Lead Poisoning Joseph J. Breen, Cindy R. Stroup, 2020-08-14 Lead Poisoning discusses one of the most critical and preventable environmentally induced illnesses. The actual toll lead poisoning takes on society cannot be measured fully due to the silent nature of health effects, such as subtle intellectual deficits and neurological damage, caused by chronic low-level exposures. This book covers every major topic on the subject, including lead poisoning in children, sources of contamination, state-of-the-art sampling and analytical measurement methods, the newest studies on low-cost abatement methods, and much more. This reference is the most comprehensive presentation of issues currently available under one cover. The text is divided into three major parts. Part I provides insights from studies assessing lead exposures from paint, dust, soil, and lead battery recycling operations. The second part is a unique collection of strategic federal policy statements from the U.S. EPA, HUD, and HEW-CDC. It details the National Implementation Plan as well as a local government's efforts to provide low-cost effective risk communication and public outreach to the community. The next part offers seven chapters on analytical issues in the measurement of lead in blood, paint, dust, and soils. Part IV, Sampling Methods and Statistical Issues, rounds out the technical portion of the volume. The relationships among lead levels in biological and environmental media are investigated and the interpretive problems discussed. The use of multi-element analysis of environmental samples as an approach to investigate sources is described. The book finishes with its most unique feature-OPPT's Check Our Kids for Lead Program, one organization's effort to empower its employees to make a personal difference in confronting the problem of lead poisoning in children. The Program serves as a model for other government organizations (federal, state, and local), university and community organizations, and corporations to educate them and take personal and corporate responsibility for addressing this important and environmental health problem.
