Football Club Management Ian Lawrence,2018-01-29 The rapid global growth of the sport industry has prompted the need for a more commercial approach to the management of sport clubs. This book is the first study of its kind to focus on the management of professional football clubs, providing a real-world insight into management principles and their practical application. The international commercialisation of football has led to a fundamental transformation of the industry's management practices, given the

financial rewards of success and the high price of failure. This book presents a critical examination of this transformation, questioning why clubs are increasingly adopting management strategies from other industries. Each chapter analyses the role played by a key leadership figure within a club, such as the owner, chief executive officer (CEO), chief financial officer (CFO), chief operating officer (COO), director of football (DoF), and head coach. Full of exclusive interviews, case studies and examples of best practice, this book sheds new light on the challenges of working in this extraordinarily high-pressure environment. Football Club Management: Insights from the Field is fascinating reading for all those working in or studying the management, marketing or administration of football.

Clayton W. Barrows,Nerilee Hing,2012-10-12 Discover the unique challenges confronting the club industry As a distinctive sector of the hospitality industry, private clubs have their own unique set of challenges. Club Management Issues in Australia and North America provides a one-of-a-kind exploration of the membership, human resource, and other key management issues of the niche industry of private clubs—on two very different continents. This book closely examines the latest research to provide scholars and practitioners with a clear picture of the economic and social implications springing from the growth of the diverse private club

industry while offering cogent discussions on effective management strategies. The impact of economic downturns affects all sectors of the hospitality market, including the private club industry. Club Management Issues in Australia and North America illustrates the trends now seen in the club industry in two major world markets. The book examines the declining membership issues in the United States and presents thoughtful consideration of member recruitment strategies. Australia's marked differences in private clubs are comprehensively explained, with a clear focus on the gaming aspect present there. An overview of the history of the club industry in Australia is presented, with emphasis on gaming machine operations and the positive and negative social and economic impact gambling has on the country. A thematic review of club management issues from years past gives readers a clearer understanding of where the industry is today and what areas need more empirical research. Employment relations are discussed in detail. A comparative analysis is also presented of the various challenges faced by clubs competing with one another. Legislative restrictions of advertising and marketing are explored, along with crucial membership and patronage issues. The book provides: research on changes in memberships in clubs in the United States

a study on declining waiting lists at clubs characteristics club managers look for in job applicants differences in equity and non-equity membership structures an overview of the history of machine gambling in New South Wales analyses of past issues of taxation legislation, employment relations, social issues, innovation, and others—and the need for further empirical study how regulatory changes impact wage determination the effects of legislation restrictions on gaming advertising, promotion, and external signage analysis of the impact of clubs' involvement with special events consumer behavior in the club industry a case study of a club's failed attempt to tap into the youth market Club Management Issues in Australia and North America is timely, informative reading for hospitality educators and students, hospitality professionals, and hospitality companies doing research in the private club industry.
