The Rings of Saturn W. G. Sebald,2016-11-08 The book is like a dream you want to last forever (Roberta Silman, The New York Times Book Review), now with a gorgeous new cover by the famed designer Peter Mendelsund A masterwork of W. G. Sebald, now with a gorgeous new cover by the famed designer Peter Mendelsund The Rings of Saturn—with its curious archive of photographs—records a walking tour of the eastern coast of England. A few of the things which cross the path and mind of its narrator (who both is and is not Sebald) are lonely eccentrics, Sir Thomas Browne's skull, a matchstick model of the Temple of Jerusalem, recession-hit seaside towns, wooded hills, Joseph Conrad, Rembrandt's Anatomy Lesson, the natural history of the herring, the massive bombings of WWII, the dowager Empress Tzu Hsi, and the silk industry in Norwich. W.G. Sebald's The Emigrants (New Directions, 1996) was hailed by Susan Sontag as an astonishing masterpiece perfect while being unlike any book one has ever read. It was one of the great books of the last few years, noted Michael Ondaatje, who now acclaims The Rings of Saturn an even more inventive work than its predecessor, The Emigrants.

Disease Control Priorities, Third Edition (Volume 9) Dean T. Jamison,Hellen Gelband,Susan Horton,Prabhat Jha,Charles N. Mock,Rachel Nugent,2017-12-06 As the culminating volume in the DCP3 series, volume 9 will provide an overview of DCP3 findings and methods, a summary of messages and substantive lessons to be taken from DCP3, and a further discussion of cross-cutting and synthesizing topics across the first eight volumes. The introductory chapters (1-3) in this volume take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a highest-priority essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC.

My Mama Had a Dancing Heart Libba Moore Gray,1999-09 For use in schools and libraries only. A lyrical dance through the seasons. Fine lines scratched into drawings add a sense of motion beyond the dancing figures, the billowing clouds, rustling leaves, and splashed-in puddles.

Biostatistics Wayne W. Daniel,Chad L. Cross,2018-11-13 The ability to analyze and interpret enormous amounts of data has become a prerequisite for success in allied healthcare and the health sciences. Now in its 11th edition, Biostatistics: A Foundation for Analysis in the Health Sciences continues to offer in-depth guidance toward biostatistical concepts, techniques, and practical applications in the modern healthcare setting. Comprehensive in scope yet detailed in coverage, this text helps students understand—and appropriately use—probability distributions, sampling distributions, estimation, hypothesis testing, variance analysis, regression, correlation analysis, and other statistical tools fundamental to the science and practice of medicine. Clearly-defined pedagogical tools help students stay up-to-date on new material, and an emphasis on statistical software allows faster, more accurate calculation while putting the focus on the underlying concepts rather than the math. Students develop highly relevant skills in inferential and differential statistical techniques, equipping them with the ability to organize, summarize, and interpret large bodies of data. Suitable for both graduate and advanced undergraduate coursework, this text retains the rigor required for use as a professional reference.

Naval Weapons of World War One Norman Friedman,2011-12-12 Although the Great War might be regarded as the heyday of the big-gun at sea, it also saw the maturing of underwater weapons — the mine and torpedo — as well as the first signs of the future potency of air power. Between 1914 and 1918 weapons development was both rapid and complex, so this book has two functions: on the one hand it details all the guns, torpedoes, mines, aerial bombs and anti-submarine systems employed during that period; but it also seeks to explain the background to their evolution — how the weapons were perceived at the time and how they were actually used. This involves a discussion of tactics and emphasises the key “enabling” technology of fire control and gun mountings. In this respect the book treats the war as a transition from naval weapons which were essentially experimental at its outbreak to a state where they pointed directly to what would be used in World War Two. Based largely on original research, this sophisticated book is more than a catalogue of the weapons, offering insight into some of the most important technical and operational factors influencing the war at sea. In this respect it is more broadly significant than its title might suggest.

Desert Slaughter Workers League (U.S.),1991 Essential reading for an objective historical explanation of the current US-led war against Iraq. The 1991 Persian Gulf War marked the beginning of a new struggle to redivide the world, with the US seeking to use its military power to offset its declining position in the world economy. This volume exposes the secret White House operations to draw Saddam Hussein into an invasion of Kuwait to provide the long-awaited pretext for a US intervention in this oil-rich region. It describes the tragic suppression of Shi'ite and Kurdish uprisings in the aftermath of the war. Also includes a detailed history of colonial oppression in Iraq and the Middle East.

Genetically Engineered Crops National Academies of Sciences, Engineering, and Medicine,Division on Earth and Life Studies,Board on Agriculture and Natural Resources,Committee on Genetically Engineered Crops: Past Experience and Future Prospects,2017-01-28 Genetically engineered (GE) crops were first introduced commercially in the 1990s. After two decades of production, some groups and individuals remain critical of the technology based on their concerns about possible adverse effects on human health, the environment, and ethical considerations. At the same time, others are concerned that the technology is not reaching its potential to improve human health and the environment because of stringent regulations and reduced public funding to develop products offering more benefits to society. While the debate about these and other questions related to the genetic engineering techniques of the first 20 years goes on, emerging genetic-engineering technologies are adding new complexities to the conversation. Genetically Engineered Crops builds on previous related Academies reports published between 1987 and 2010 by undertaking a retrospective examination of the purported positive and adverse effects of GE crops and to anticipate what emerging genetic-engineering technologies hold for the future. This report indicates where there are uncertainties about the economic, agronomic, health, safety, or other impacts of GE crops and food, and makes recommendations to fill gaps in safety assessments, increase regulatory clarity, and improve innovations in and access to GE technology.

Enchanted Objects David Rose,2014-07-15 In the tradition of Who Owns the Future, an MIT Media Lab scientist imagines how everyday objects can intuit our needs, improve our lives, and form “an ethereal interconnection of gadgets and human desires that...will pervade our lives in the very near future” (The Wall Street Journal). We are now standing at the precipice of the next transformative development, a world in which technology becomes more human. Soon, connected technology will be embedded in hundreds of everyday objects we already use: our cars, wallets, watches, umbrellas, even our trash cans. These objects will respond to our needs, come to know us, and even learn to think ahead on our behalf. David Rose calls these devices—which are just beginning to creep into the marketplace—Enchanted Objects. In Rose’s vision of the future, technology atomizes, combining itself with the objects that make up the very fabric of daily living. Such innovations will be woven into the background of our environment, enhancing human relationships, channeling desires for omniscience, long life, and creative expression. The enchanted objects of fairy tales and science fiction will enter real life. Groundbreaking, timely, and provocative, Enchanted Objects is a “delightful” (The New York Times) blueprint for a better future, where efficient solutions come hand in hand with technology that delights our senses. It is essential reading for designers, technologists, entrepreneurs, business leaders, and anyone who wishes to take a glimpse into the future.

The impact of disasters and crises on agriculture and food security: 2021 Food and Agriculture Organization of the United Nations ,2021-03-17 On top of a decade of exacerbated disaster loss, exceptional global heat, retreating ice and rising sea levels, humanity and our food security face a range of new and unprecedented hazards, such as megafires, extreme weather events, desert locust swarms of magnitudes previously unseen, and the COVID-19 pandemic. Agriculture underpins the livelihoods of over 2.5 billion people – most of them in low-income developing countries – and remains a key driver of development. At no other point in history has agriculture been faced with such an array of familiar and unfamiliar risks, interacting in a hyperconnected world and a precipitously changing landscape. And agriculture continues to absorb a disproportionate share of the damage and loss wrought by disasters. Their growing frequency and intensity, along with the systemic nature of risk, are upending people’s lives, devastating livelihoods, and jeopardizing our entire food system. This report makes a powerful case for investing in resilience and disaster risk reduction – especially data gathering and analysis for evidence informed action – to ensure agriculture’s crucial role in achieving the future we want.
