MEDINFO 2015: EHealth-enabled Health I.N. Sarkar,A. Georgiou,P. Mazzoncini de Azevedo Marques,2015-08-12 Health and Biomedical Informatics is a rapidly evolving multidisciplinary field; one in which new developments may prove crucial in meeting the challenge of providing cost-effective, patient-centered healthcare worldwide. This book presents the proceedings of MEDINFO 2015, held in São Paulo, Brazil, in August 2015. The theme of this conference is 'eHealth-enabled Health', and the broad spectrum of topics covered ranges from emerging methodologies to successful implementations of innovative applications, integration and evaluation of eHealth systems and solutions. Included here are 178 full papers and 248 poster abstracts, selected after a rigorous review process from nearly 800 submissions by 2,500 authors from 59 countries. The conference brings together researchers, clinicians, technologists and managers from all over the world to share their experiences on the use of information methods, systems and technologies to promote patient-centered care, improving patient safety, enhancing care outcomes, facilitating translational research and enabling precision medicine, as well as advancing education and skills in Health and Biomedical Informatics. This comprehensive overview of Health and Biomedical Informatics will be of interest to all those involved in designing, commissioning and providing healthcare, wherever they may be.

Special Topics in Multimedia, IoT and Web Technologies Valter Roesler,Eduardo Barrére,Roberto Willrich,2020-03-02 This book presents a set of recent advances that involve the areas of multimedia, IoT, and web technologies. These advances incorporate aspects of clouds, artificial intelligence, data analysis, user experience, and games. In this context, the work will bring the reader the opportunity to understand new possibilities of use and research in these areas. We think that this book is suitable for students (postgraduates and undergraduates) and lecturers on these specific topics. Professionals can also benefit from the book since some chapters work with practical aspects relevant to the industry.

Advancing Online Teaching Kevin Kelly,Todd D. Zakrajsek,2023-07-03 The goal of teaching online is fundamentally the same as teaching face-to-face: facilitating the learning of all students to the greatest extent possible. This book differs from other books on online teaching in that, in the process of offering guidance on course design and planning, developing outcomes and appropriate engaging activities, managing the workload and assessment, the authors pay explicit attention throughout to the distinct and diverse needs of students and offer effective strategies to accommodate them in a comprehensive and inclusive way by using the principles of Universal Design for Learning. By following those principles from the outset when planning a course, all students will benefit, and most particularly those whom the research shows have the greatest achievement gaps when taking online courses -- males, first generation and low income students, those from underrepresented minority groups, the academically underprepared, students with disabilities, and those with limited online access or lacking readiness for online learning. Beyond good planning and design, Kelly and Zakrajsek offer ideas for creating inclusive course environments and activities, such as using culturally appropriate content and making it accessible in multiple formats. They also share methods to foster faculty-learner interaction and increase personal connections with students, and among students, through group activities or learning communities, which are so critical to motivation and success. Faculty new to online teaching as well as more experienced readers will find a wealth of practical guidance on developing and honing both fully online and blended courses and, as importantly, a wealth of proven ideas to help the new generation of students with diverse needs to succeed.

The Routledge Handbook of Education Technology Santoshi Halder,Sanju Saha,2023-03-10 This handbook offers a comprehensive understanding of the use of technology in education. With a focus on the development of Education Technology in India, it explores innovative strategies as well as challenges in incorporating technology to support learning. The volume examines diverse learning approaches such as assistive technology and augmentative and alternative communication for learners with disabilities and creating more social and accessible environments for learning through Collaborative Learning Techniques (CoLTS), massive open online courses (MOOCs), and the use of AI (Artificial Intelligence) in modern classrooms. Enriched with discussions on recent trends in ET (Education Technology), university curriculum and syllabi, and real-life examples of the use of ET in different classroom settings, the book captures diverse aspects of education technology and its potential. It also discusses the challenges of making technology and resources available for all and highlights the impact technology has had in

classrooms across the world during the COVID-19 pandemic. This book will be of interest to students, researchers, and teachers of education, digital education, education technology, and information technology. The book will also be useful for policymakers, educationalists, instructional designers, and educational institutions.

Information Literacy for Today's Diverse Students Alex Berrio Matamoros,2018-11-21 This book helps students from diverse backgrounds and with various learning styles to master the material they learn with these practical examples for librarians teaching higher education information literacy. Cultural influences in students' lives—often tied to aspects of their background such as ethnicity, national origin, socioeconomic status, gender, and religion—play a large role in determining how they learn. Learning styles additionally differ among students, making it difficult to know how to best support all students. This book introduces academic instruction librarians to a differentiated instruction (DI) approach that will help them to offer students a choice of how to engage with course content, assess their understanding of the material, and demonstrate mastery of the material to the instructor, allowing students to actively participate in their education. It explains various instructional techniques used in DI and provides detailed, step-by-step examples for implementing educational technology tools supporting each technique. Accompanying the examples are tips for overcoming known challenges in implementation and best practices for successful adoption of the techniques. Readers will understand how to begin using the most popular types of educational technology tools for academic information literacy instruction.

The Digital Ninja Toolbox Bestie Atti,2019-06-15 According to the Global Digital Report, 2018 by Hootsuite and We are Social, out of the 1.3 billion people in Africa, there are 435 million internet users with 1 billion mobile connections. This access to the internet and digital technology creates boundless opportunities for individuals and businesses in Africa to learn, grow and gain global visibility. With 3 years of experience in digital

marketing and SME development, I can categorically state that technology and digital transformation is changing the way we live, work and do business around the world. With access to the internet and a smart mobile device, anyone, anywhere can do and become anything they desire. Unfortunately, many Africans still struggle to access and maximize the resources and opportunities digital transformation presents to us. This is why I have created The Digital Ninja Toolbox to empower every digitally mobile African with the tools and resources they need to live, work and do business better in this ever-changing world.

Quality Assurance and Assessment Practices in Translation and Interpreting Huertas-Barros, Elsa,Vandepitte, Sonia,Iglesias-Fernández, Emilia,2018-07-27 The development of translation memories and machine translation have led to new quality assurance practices where translators have found themselves checking not only human translation but also machine translation outputs. As a result, the notions of revision and interpersonal competences have gained great importance with international projects recognizing them as high priorities. Quality Assurance and Assessment Practices in Translation and Interpreting is a critical scholarly resource that serves as a guide to overcoming the challenge of how translation and interpreting results should be observed, given feedback, and assessed. It also informs the design of new ways of evaluating students as well as suggesting criteria for professional quality control. Featuring coverage on a broad range of topics such as quality management, translation tests, and competency-based assessments, this book is geared towards translators, interpreters, linguists, academicians, translation and interpreting researchers, and students seeking current research on the new ways of evaluating students as well as suggesting criteria for professional quality control in translation.
