Schools and Screens Victoria Cain, 2021-10-19 Why screens in schools—from film screenings to instructional television to personal computers—did not bring about the educational revolution promised by reformers. Long before Chromebook giveaways and remote learning, screen media technologies were enthusiastically promoted by American education reformers. Again and again, as schools deployed film screenings, television programs, and computer games, screen-based learning was touted as a cure for all educational ills. But the transformation promised by advocates for screens in schools never happened. In this book, Victoria Cain chronicles important episodes in the history of educational technology, as reformers, technocrats, public television producers, and computer scientists tried to harness the power of screen-based media to shape successive generations of students. Cain describes how, beginning in the 1930s, champions of educational technology saw screens in schools as essential tools for training citizens, and presented films to that end. (Among the films screened for educational purposes was the notoriously racist *Birth of a Nation*.) In the 1950s and 1960s, both technocrats and leftist educators turned to screens to prepare young Americans for Cold War citizenship, and from the 1970s through the 1990s, as commercial television and personal computers arrived in classrooms, screens in schools represented an increasingly privatized vision of schooling and civic engagement. Cain argues that the story of screens in schools is not simply about efforts to develop the right technological tools; rather, it reflects ongoing tensions over citizenship, racial politics, private funding, and distrust of teachers. Ultimately, she shows that the technologies that reformers had envisioned as improving education

and training students in civic participation in fact deepened educational inequities.

Fluid Screens, Expanded Cinema Janine Marchessault, Susan Lord, 2008-06-20 As a medium, film is constantly evolving both in form and in content. *Fluid Screens, Expanded Cinema* considers the shift from traditional cinema to new frontiers of interactive, performative, and networked media. Using the theories of Marshall McLuhan and Gilles Deleuze as a starting point, renowned scholars from the fields of film theory, communication studies, cultural studies, and new media theory explore the ways in which digital technology is transforming contemporary visual culture. The essays consider a series of questions: What constitutes the new in new media? How are digital aesthetics different from film aesthetics? What new forms of spectatorship and storytelling, political community, and commodity production are being enabled through the digital media? Using Gene Youngblood's 1970 book *Expanded Cinema* as an anchor for the volume, *Fluid Screens, Expanded Cinema* understands the digital not simply as a technological form, but also as an experience of space and time that is tied to capitalism. This important collection is unique in framing a range of social justice issues with aesthetic theories of new digital screen culture that will appeal to scholars and multimedia artists prepared to break new ground.

The Double Screen Wu Hung, 1996-11-22 This book contemplates a large problem: what is a traditional Chinese painting? Wu Hung answers this question through a comprehensive analysis of the screen, a major format and a popular pictorial motif in traditional China. With a broad array of examples ranging from the early centuries C.E. to the 1800s, he explores the screen's position in art – as an important site for artistic imagination, as an illusionary representation on a flat surface, and as an architectural device defining cultural conventions. A screen occupies a space and divides it, supplies an ideal surface for painting, and has been a favourite pictorial image in Chinese art since antiquity. With its diverse roles, the screen has provided Chinese painters with endless opportunities to reinvent their art. The author argues that any understanding of Chinese painting must include discussion of its material forms as well as its intimate connection with cultural context and convention. Thus, The Double Screen offers a powerful non-western perspective on diverse artistic and cultural genres, from portraiture and pictorial narrative to voyeurism and masquerade, and will be invaluable to anyone interested in the history of art and Asian studies as well as to students and specialists in the field.
