Biodiversity and the Law Charles R. McManis,2012 How do we promote global economic development, while simultaneously preserving local biological and cultural diversity? This authoritative volume, written by leading legal experts and biological and social scientists from around the world, addresses this question in all of its complexity. The first part of the book focuses on biodiversity and examines what we are losing, why and what is to be done. The second part addresses biotechnology and looks at whether it is part of the solution or part of the problem, or perhaps both. The third section examines traditional knowledge, explains what it is and how, if at all, it should be protected. The fourth and final part looks at ethnobotany and bioprospecting and offers practical lessons from the vast and diverse experiences of the contributors.

Medical Statistics and Computer Experiments Ji-Qian Fang,2005-08-17 This textbook consists of three parts:

basic concepts of statistics, advanced statistical methods, and design and analysis for medical research. Each chapter begins with challenging medical problems and related statistical methods and theories; to make the statistical ideas more easily understood, there is a section of “computer experiments” in each chapter where some basic statistical phenomena and related concepts are revealed. The statistical software SAS is used to carry out related statistical calculations. The aim of this book is to make medical students and researchers grasp easily the most useful tools of statistics for their medical research. It is done through various applications to a great number of medical problems, interesting demonstration of well-designed computer experiments and detailed explanation of statistical thinking.

Meanwhile, a network of drug cartels and financial speculators are preparing to launch Operation Blackout: an attack against gold depositories that would give them control over the global economy. With both US and UK pitted against a worldwide criminal enterprise, MI-6 assigns William Shanahan to disrupt Operation Blackout with the help of Jack Gawain, of the Ulster Defense Association. As the operation moves forward with full force, Shanahan and Gawain face an array of moral issues and deadly enemies. With the fate of the world hanging in the balance, the two enter a race against time and insurmountable odds.
