Memoir II A. P. Vinogradov,2018-10-23 This reference summarizes and tabulates most of the published knowledge of its time, providing a comprehensive presentation of more than 60 elements found in marine organisms.Extensive data, including 327 tables, on various marine groups from planktonic and nonplanktonic algae through fishes should be particularly valuable to investigators in biochemistry and physiology, geology, chemical oceanography, and nutrition. This edition, translated from the original Russian publications by Julia Efron and Jane K. Setlow, contains additional data and observations, not previously published elsewhere, which were added by Vinogradov in the preparation of the translation. The extensive bibliography of more than 2,000 titles was prepared by Virginia Odum.

Elements of Physical Oceanography Hugh J. McLellan,2016-04-27 *Elements of Physical Oceanography* provides a broad look at most of the topics of concern to Physical Oceanography without treating any part of the subject matter completely or exhaustively. This book originated in a set of lecture notes for an introductory course in Physical Oceanography given by the author in the Department of Oceanography and Meteorology at Texas A&M University. The book is organized into three parts. Part I on descriptive oceanography covers topics such as nature of oceanographic data, the chemical nature of the ocean, the temperature of the ocean, and temperature-salinity relationships. Part II on oceanic movements discusses accelerations arising from mass distribution and the Earth's rotation, geostrophic and wind driven currents, waves, and tides. Part III covers various topics such as sound propagation, the heat budget of the ocean, and estuaries. This book aims to provide the non-physical oceanographer with insight into the physical nature of the environment influencing his chosen studies. The physical oceanographer will be somewhat less than satisfied with the treatment and will wish to read the publications referred to and to follow the suggestions for additional reading.
