T.E. Lawrence and the Red Sea Patrol John Johnson Allen,2015-06-30 Although many books have been written about T E Lawrence and the Arab Revolt, none before has fully explored the pivotal role of the Royal Navy in the Red Sea at the time. This is the first book to be written about the Navy's role in the success of the Arab Revolt in the creation of the legendary figure of Lawrence of Arabia. Following extensive and detailed research into the activities of the ships of the Red Sea Patrol by the author, a maritime historian and former Merchant Navy officer, it has become evident that, without the work of those ships, the Arab revolt would have failed and T E Lawrence would have remained an obscure officer in the military bureaucracy of Cairo.Lawrence was very aware of the importance and relevance of the Royal Navy in their operations in the Red Sea and commented on it on many occasions, notably in 1918, saying 'The naval side of the operations, when the time comes to tell of it, will provide a most interesting case of the value of command of the sea..'. Until now, nobody has investigated this angle in any detail. By doing this so comprehensively, this book gives a fresh dimension to the Lawrence of Arabia legend.

In the Line of Fire - Peacekeeping in the Golan Heights Major Jeffery S. Bess,2015-11-06 This monograph examines the considerations involved in maintaining a peacekeeping force in the Golan Heights. The examination is based on the assumption that Israel and Syria have reached an agreement concerning the Golan Heights and that the United States is going to establish a peacekeeping force in the Golan Heights. The monograph first examines the historical background of the area since the 1967 War. Based on this examination and on lessons learned from previous UN and other multinational peacekeeping operations, the monograph addresses national composition of the force, command of the peacekeeping force, and force structure. Next, based on the military and political aspects of the region, the monograph addresses the future peacekeeping force commander's concerns with military credibility, freedom of movement, and force protection. The study concludes with a summary evaluation of the necessary size and type of force for future peacekeeping in the Golan Heights. Based on the assumption and an analysis of the political and military considerations, future peacekeeping operations in the Golan Heights would require a MFO type force under the command and control of the United States. Due to the essential requirement for force protection due to the potential of pre-emption by either Israel or Syria and of terrorist attacks, a heavy brigade would be the most effective force in maintaining the peace while protecting the force.

Interoperability of U.S. and NATO Allied Air Forces Eric Victor Larson,2003 The United States conducts air operations with other willing NATO allies, including non-NATO members. The objective of this background research for a larger RAND study, *Interoperability: A Continuing Challenge in Coalition Air Operations*, is twofold: (1) to help the U.S. Air Force identify potential interoperability problems that may arise in coalition air operations involving the United States and its NATO allies, as well as non-NATO countries, over the next decade and (2) to suggest solution directions to mitigate those problems. The study focus is on command, control, communications, intelligence, surveillance, and reconnaissance (C3ISR) systems and out-of-NATO-area operations. The authors present a data-based historical overview of the U.S. experience in coalition operations with NATO allies up to 1999 and seek to provide a deeper understanding of interoperability through the answers to several key questions: For what missions is interoperability required? With which NATO allies is interoperability required? For what capabilities and services is interoperability required? Detailed case-study analyses of coalition operations in Southwest Asia, Bosnia, Somalia, and Rwanda identify key interoperability challenges and workarounds (short-term solutions) at the strategic, operational, tactical, and technological levels, and provide relevant lessons for meeting these challenges and improving the interoperability of U.S. and NATO air and C3ISR capabilities.

Vietnam, Territoriality and the South China Sea Hãn Nguyễn Nguyễn Nhã,2018-10-12 The conflict in the South China Sea, especially the sovereignty over Paracel and Spratly Islands, is of international interest and significance. Territorial claims from various countries impact on maritime freedom and result in the exploitation of natural resources in either international waters or other claimant countries' exclusive economic zones. This book analyses Vietnam's claim of sovereignty over Paracel and Spratly Islands. Based on a book originally published in Vietnamese, the author offers a historical analysis to examine the sovereignty of the islands from multiple perspectives. Written in English on the topic and based on rigorous analysis of historical, legal and technical evidence, the book makes the case for Vietnam's sovereignty over Paracel and Spratly Islands. It also provides an investigation of how Vietnam has affirmed its claim of sovereignty over the islands and a discussion of how Vietnam's claim has been received by the international community, particularly by China. The book touches on a very sensitive, topical issue of international importance with wide-ranging and serious consequences. It will be of interest to academics in the fields of Asian security studies and Southeast Asian history and politics.

British Admirals of the Fleet T A Heathcote,2002-01-22 A companion volume to the same author's *The British Field Marshals 1736-1997*, this book outlines the lives of the 115 officers who held the rank of Admiral of the Fleet in the Royal Navy from 1734, when it took its modern form, to 1995, when the last one was appointed. Each entry gives details of the dates of the birth and death of its subjects, their careers ashore and afloat, their family backgrounds, and the ships, campaigns and combats in which they served. Each is placed clearly in its domestic or international political context. The actions recorded include major fleet battles under sail or steam, single-ship duels, encounters with pirates on the Spanish Main and up the rivers of Borneo, the suppression of the Slave Trade (for which the Navy receives little gratitude), landing parties to deal with local dictators and revolutionaries, and the services of naval brigades in China, Egypt and South Africa.

Germany in the Great War Joshua Bilton,2021-12-08 This book documents the experiences of the Central Powers, specifically Austria-Hungary, Germany and the Ottoman Empire during 1917, as they fought on land, at sea and in the air. Drawing on hundreds of contemporary photographs, many of them never previously published, this book examines the experiences of these three nations, spotlighting not only the events that occurred throughout the year, but the lives of those individuals fighting and dying to defend their homelands, families and friends. Each chapter includes a succinct overview of a single front or theatre of operation, complimenting the hundreds of professional and amateur photographs contained within. Though many of the images are of the German and Austro-Hungarian armies on the Westfront and Ostfront, several additional chapters also explore the fighting across other, lesser-known fronts, including the Südwest Front and in Sinai and Palestine, and Mesopotamia. This book is an excellent pictorial guide that would be of benefit to anyone seeking to gain a better understanding of what life was like from the perspective of the German, Austro-Hungarian and Ottoman armies, and their peoples during the fourth year of the First World War.
