**The Marine World** Frances Dipper, 2021-06-08 The Marine World is a book for everyone with an interest in the ocean, from the marine biologist or student wanting expert knowledge of a particular group to the naturalist or diver exploring the seashore and beyond. With colour illustrations, line drawings, more than 1,500 colour photographs, and with clear accessible text, this book encompasses all those organisms that live in, on and around the ocean, bringing together in a single text everything from the minuscule to the immense. It includes sections on all but the most obscure marine groups, covering invertebrate phyla from sponges to sea squirts, as well as plants, fungi, bacteria, fish, reptiles, mammals and birds. It incorporates information on identification, distribution, structure, biology, ecology, classification and conservation of each group, addressing the questions of 'what?', 'where?' and 'how?'. Today global warming, overfishing, ocean acidification and pollution are just a few of the ever increasing number of threats and challenges faced by ocean life. Without knowledge of the animals, plants and other organisms that live in the marine world, we cannot hope to support or implement successful conservation and management measures, nor truly appreciate the incredible wealth and variety of marine life. The Marine World is the product of a lifetime spent by Frances Dipper happily observing and studying marine organisms the world over. It has been brought to colourful life by a myriad of enthusiastic underwater photographers and by Marc Dando, the renowned natural history illustrator.

Living with the Changing California Coast Gary Bruce Griggs, Kiki Patsch, Lauret Savoy, 2005-11-07 Crowded into the beautiful, narrow strip at the edge of the ocean, the large number of people who live near California's dynamic coastline often have little awareness of the hazards—waves, tides, wind, storms, rain, and runoff—that erode and impact the coast and claim property on a regular basis. This

up-to-date, authoritative, and easy-to-use book, a geological profile of the California coast from Mexico to the Oregon border, describes the landforms and processes that shape the coastline and beaches, documents how erosion has affected development, and discusses the options that are available for dealing with coastal hazards and geologic instability. A completely revised and updated edition of *Living with the California Coast* (1985), this book features hundreds of new photographs and the latest data on human activity on the coast, on climate change, on rising seas levels, and on coastal erosion and protection. With its dramatic photographs and mile-by-mile maps, *Living with the Changing California Coast* will be an essential resource for those intending to buy or build along the coast, those who need specific information about various coastal regions, and those who are seeking information about how this remarkable coastline has evolved. \*279 photographs portray natural coastal features and processes and illustrate many instances of what can happen to buildings on the coast \*81 maps, covering the entire coast, detail types of coastal landforms, coastline erosion rates, locations of seawalls or armor, and other specific areas of interest \*Offers specific advice for homebuyers, residents, and developers on which areas to avoid, on what safety measures should be taken, and on what danger signals should be heeded

**The Mathews Men** William Geroux,2022-11-01 “Vividly drawn and emotionally gripping. —Daniel James Brown, #1 New York Times bestselling author of *The Boys in the Boat* From the author of *The Ghost Ships of Archangel*, one of the last unheralded heroic stories of World War II: the U-boat assault off the American coast against the men of the U.S. Merchant Marine who were supplying the

European war, and one community's monumental contribution to that effort Mathews County, Virginia, is a remote outpost on the Chesapeake Bay with little to offer except unspoiled scenery—but it sent an unusually large concentration of sea captains to fight in World War II. The Mathews Men tells that heroic story through the experiences of one extraordinary family whose seven sons (and their neighbors), U.S. merchant mariners all, suddenly found themselves squarely in the cross-hairs of the U-boats bearing down on the coastal United States in 1942. From the late 1930s to 1945, virtually all the fuel, food and munitions that sustained the Allies in Europe traveled not via the Navy but in merchant ships. After Pearl Harbor, those unprotected ships instantly became the U-boats' prime targets. And they were easy targets—the Navy lacked the inclination or resources to defend them until the beginning of 1943. Hitler was determined that his U-boats should sink every American ship they could find, sometimes within sight of tourist beaches, and to kill as many mariners as possible, in order to frighten their shipmates into staying ashore. As the war progressed, men from Mathews sailed the North and South Atlantic, the Caribbean, the Gulf of Mexico, the Mediterranean, the Indian Ocean, and even the icy Barents Sea in the Arctic Circle, where they braved the dreaded Murmansk Run. Through their experiences we have eyewitnesses to every danger zone, in every kind of ship. Some died horrific deaths. Others fought to survive torpedo explosions, flaming oil slicks, storms, shark attacks, mine blasts, and harrowing lifeboat odysseys—only to ship out again on the next boat as soon as they'd returned to safety. The Mathews Men shows us the war far beyond traditional battlefields—often the U.S. merchant mariners' life-and-death struggles took place just off the U.S. coast—but also takes us to the landing beaches at D-Day and to the Pacific. "When final victory is ours," General Dwight D. Eisenhower had predicted, "there is no organization that will share its credit more deservedly than the Merchant Marine." Here, finally, is the heroic story of those merchant

seamen, recast as the human story of the men from Mathews.
