

Sea World 10

Kelly Monaghan

Death at SeaWorld David Kirby, 2012-07-17 From the New York Times bestselling author of *Evidence of Harm* and *Animal Factory*—a groundbreaking scientific thriller that exposes the dark side of SeaWorld, America's most beloved marine mammal park *Death at SeaWorld* centers on the battle with the multimillion-dollar marine park industry over the controversial and even lethal ramifications of keeping killer whales in captivity. Following the story of marine biologist and animal advocate at the Humane Society of the US, Naomi Rose, Kirby tells the gripping story of the two-decade fight against PR-savvy SeaWorld, which came to a head with the tragic death of trainer Dawn Brancheau in 2010. Kirby puts that horrific animal-on-human attack in context. Brancheau's death was the most publicized among several brutal attacks that have occurred at Sea World and other marine mammal theme parks. *Death at SeaWorld* introduces real people taking part in this debate, from former trainers turned animal rights activists to the men and women that champion SeaWorld and the captivity of whales. In section two the orcas act out. And as the story progresses and orca attacks on trainers become increasingly violent, the warnings of Naomi Rose and other scientists fall on

deaf ears, only to be realized with the death of Dawn Brancheau. Finally he covers the media backlash, the eyewitnesses who come forward to challenge SeaWorld's glossy image, and the groundbreaking OSHA case that challenges the very idea of keeping killer whales in captivity and may spell the end of having trainers in the water with the ocean's top predators.

Beneath the Surface John Hargrove, Howard Chua-Eoan, 2015-03-24 *Now a New York Times Best Seller* Over the course of two decades, John Hargrove worked with 20 different whales on two continents and at two of SeaWorld's U.S. facilities. For Hargrove, becoming an orca trainer fulfilled a childhood dream. However, as his experience with the whales deepened, Hargrove came to doubt that their needs could ever be met in captivity. When two fellow trainers were killed by orcas in marine parks, Hargrove decided that SeaWorld's wildly popular programs were both detrimental to the whales and ultimately unsafe for trainers. After leaving SeaWorld, Hargrove became one of the stars of the controversial documentary *Blackfish*. The outcry over the treatment of SeaWorld's orca has now expanded beyond the outlines sketched by the award-winning documentary, with Hargrove contributing his expertise to an advocacy movement that is

convincing both federal and state governments to act. In *Beneath the Surface*, Hargrove paints a compelling portrait of these highly intelligent and social creatures, including his favorite whales Takara and her mother Kasatka, two of the most dominant orcas in SeaWorld. And he includes vibrant descriptions of the lives of orcas in the wild, contrasting their freedom in the ocean with their lives in SeaWorld. Hargrove's journey is one that humanity has just begun to take-toward the realization that the relationship between the human and animal worlds must be radically rethought.

The Sea World Book of Penguins, 1985 Describes the physical characteristics, habits, and behavior of various species of penguins.

Spectacular Nature Susan G. Davis, 2023-09-01 This is the story of Sea World, a theme park where the wonders of nature are performed, marketed, and sold. With its trademark star, Shamu the killer whale—as well as performing dolphins, pettable sting rays, and reproductions of pristine natural worlds—the park represents a careful coordination of shows, dioramas, rides, and concessions built around the theme of ocean life. Susan Davis analyzes the Sea World experience and the forces that produce it: the theme park industry; Southern California tourism; the privatization of urban

space; and the increasing integration of advertising, entertainment, and education. The result is an engaging exploration of the role played by images of nature and animals in contemporary commercial culture, and a precise account of how Sea World and its parent corporation, Anheuser-Busch, succeed. Davis argues that Sea World builds its vision of nature around customers' worries and concerns about the environment, family relations, and education. While Davis shows the many ways that Sea World monitors its audience and manipulates animals and landscapes to manufacture pleasure, she also explains the contradictions facing the enterprise in its campaign for a positive public identity. Shifting popular attitudes, animal rights activists, and environmental laws all pose practical and public relations challenges to the theme park. Davis confronts the park's vast operations with impressive insight and originality, revealing Sea World as both an industrial product and a phenomenon typical of contemporary American culture. Spectacular Nature opens an intriguing field of inquiry: the role of commercial entertainment in shaping public understandings of the environment and environmental problems.

The Other Orlando Kelly Monaghan, 2004 This fully revised and updated edition reviews nearly 200 other attractions, from family

theme parks like SeaWorld to sports, the arts, dinner attractions, Kennedy Space Center, roadside attractions, zoos, gardens, and the great outdoors.

Story Movements Caty Borum Chattoo, 2020-05-20 Only a few years after the 2013 Sundance Film Festival premiere of *Blackfish* - an independent documentary film that critiqued the treatment of orcas in captivity - visits to SeaWorld declined, major corporate sponsors pulled their support, and performing acts canceled appearances. The steady drumbeat of public criticism, negative media coverage, and unrelenting activism became known as the *Blackfish Effect*. In 2016, SeaWorld announced a stunning corporate policy change - the end of its profitable orca shows. In an evolving networked era, social-issue documentaries like *Blackfish* are art for civic imagination and social critique. Today's documentaries interrogate topics like sexual assault in the U.S. military (*The Invisible War*), racial injustice (13th), government surveillance (*Citizenfour*), and more. Artistic nonfiction films are changing public conversations, influencing media agendas, mobilizing communities, and capturing the attention of policymakers - accessed by expanding audiences in a transforming media marketplace. In *Story Movements: How Documentaries Empower*

People and Inspire Social Change, producer and scholar Caty Borum Chattoo explores how documentaries disrupt dominant cultural narratives through complex, creative, often investigative storytelling. Featuring original interviews with award-winning documentary filmmakers and field leaders, the book reveals the influence and motivations behind the vibrant, eye-opening stories of the contemporary documentary age.

Building Leadership Character Amy Newman, 2018-03-28

Using a storytelling approach and real-world cases to explore different dimensions of leadership character, this text encourages the reader to think critically, helping them to develop their character, emotional intelligence and leadership skills.

Staging Tourism Jane Desmond, 1999 From Shamu the dancing whale at Sea World to Hawaiian lu'au shows, *Staging Tourism* analyzes issues of performance in a wide range of tourist venues. Jane C. Desmond argues that the public display of bodies—how they look, what they do, where they do it, who watches, and under what conditions—is profoundly important in structuring identity categories of race, gender, and cultural

affiliation. These fantastic spectacles of corporeality form the basis of hugely profitable tourist industries, which in turn form crucial arenas of public culture where embodied notions of identity are sold, enacted, and debated. Gathering together written accounts, postcards, photographs, advertisements, films, and oral histories as well as her own interpretations of these displays, Desmond gives us a vibrant account of U.S. tourism in Waikiki from 1900 to the present. She then juxtaposes cultural tourism with animal tourism in the United States, which takes place at zoos, aquariums, and animal theme parks. In each case, Desmond argues, the relationship between the viewer and the viewed is ultimately based on concepts of physical difference harking back to the nineteenth century.
