*Be #1 on Google Absolutely 100% Free.* Search Engine Optimization,2018-03-22 How To Rank #1 On Google!!! There are ONLY TWO WAYS to maintain Top Rankings on Google; 1. Outspend your competition.2.Read This Book!!? Nothing else works and why should it? Why does my website need SEO? The majority of web traffic is driven by the major commercial search engines, Google, Bing, and Yahoo!. Although social media and other types of traffic can generate visits to your website, search engines are the primary method of navigation for most Internet users. This is true whether your site provides content, services, products, information, or just about anything else. Search engines are unique in that they provide targeted traffic-people looking for what you offer. Search engines are the roadways that make this happen. If search engines cannot find your site, or add your content to their databases, you miss out on incredible opportunities to drive traffic to your site. Search queries-the words that users type into the search box-carry extraordinary value. Experience has shown that search engine traffic can make (or break) an

organization's success. Targeted traffic to a website can provide publicity, revenue, and exposure like no other channel of marketing. Investing in SEO can have an exceptional rate of return compared to other types of marketing and promotion. Why can't the search engines figure out my site without SEO? Search engines are smart, but they still need help. The major engines are always working to improve their technology to crawl the web more deeply and return better results to users. However, there is a limit to how search engines can operate. Whereas the right SEO can net you thousands of visitors and increased attention, the wrong moves can hide or bury your site deep in the search results where visibility is minimal. In addition to making content available to search engines, SEO also helps boost rankings so that content will be placed where searchers will more readily find it. The Internet is becoming increasingly competitive, and those companies who perform SEO will have a decided advantage in visitors and customers. SEARCH ENGINE OPTIMIZATION refers to the position at which a particular site appears in the results of a search engine query. A site is said to have a high ranking ... I'm going to go against all of the recent marketing trends with this Book. If you are searching Google for things like: 1. I need top search engine rankings. 2. How can I get my website ranked at the top of Google? 3. I want my website to get top ranking. How do I do that? AND you want to achieve that ranking in a cheap or affordable way... IT ISN'T GOING TO HAPPEN. Want to know the truth that most SEO scammers and spammers COUNT ON to be able to deceive you and take your money? At the same time, do you want to know the truth that most people with top ranked websites DON'T WANT YOU TO KNOW? The ONLY way to gain a top ranked website these days is to: RELATED SEARCHES: how to do
