**Stemming the Tide** Madeline Baer, 2017-08-01 When privatization of public services swept the developing world in the 1990s, it was part of a seemingly unstoppable tide of neoliberal reforms aimed at reducing the role of the state and reorienting economies toward market-led policymaking. Water privatization, one of the more unpopular policies of the neoliberal development paradigm, sparked a particularly fierce debate and gave rise to a movement of self-proclaimed water warriors who advocated for legal

recognition of water as a basic human right to be protected and fulfilled by states. Broadening the debate, Madeline Baer questions whether either approach -- the market approach or a human rights-based approach -- leads to improved access to water. More specifically, Baer explores how the human right to water and sanitation is fulfilled in different contexts, whether neoliberal policies like privatization pose a threat to the right to water, and whether rights fulfillment leads to meaningful social change. Using two case studies -- Chile, the most extreme case of water privatization in the developing world, and Bolivia, the birthplace of the global movement for the human right to water -- *Stemming the Tide* uncovers the conditions under which the right to water and sanitation can be fulfilled, as well as the obstacles to fulfillment. Ultimately this book argues that deepening mechanisms for citizen participation, strengthening accountability, and creating alternatives to the state/market binary can help achieve meaningful social transformation in the water sector.

Fulfilling the Sacred Trust Mary Ann Heiss, 2020-12-15 Fulfilling the Sacred Trust explores the implementation of international accountability for dependent territories under the United Nations during the early Cold War era. Although the Western nations that drafted the UN Charter saw the organization as a means of maintaining the international status quo they controlled, newly independent nations saw the UN as an instrument of decolonization and an agent of change disrupting global political norms. Mary Ann Heiss documents

the unprecedented process through which these new nations came to wrest control of the United Nations from the World War II victors that founded it, allowing the UN to become a vehicle for global reform. Heiss examines the consequences of these early changes on the global political landscape in the midst of heightened international tensions playing out in Europe, the developing world, and the UN General Assembly. She puts this anti-colonial advocacy for accountability into perspective by making connections between the campaign for international accountability in the United Nations and other postwar international reform efforts such as the anti-apartheid movement, Pan-Africanism, the Non-Aligned Movement, and the drive for global human rights. Chronicling the combative history of this campaign, *Fulfilling the Sacred Trust* details the global impact of the larger UN reformist effort. Heiss demonstrates the unintended impact of decolonization on the United Nations and its agenda, as well as the shift in global influence from the developed to the developing world.
