The work of the Society is carried on by the Bulletin, the Journal, and Meteorological Monographs, by papers and discussions at meetings of the Society, through the offices of the Secretary and the Executive Secretary, and by correspondence. All of the Americas are represented in the membership of the Society as well as many foreign countries.

**World War II Sea War, Vol 10: Il Duce Deposed** Gordon Smith,Don Kindell,Donald A. Bertke,2009 Comprehensive list of day-to-day naval actions from July 1943 through September 1943. *Iron Fist From The Sea* Douw Steyn,Arnè

Söderlund,2015-01-19 This seminal work documents the clandestine sea borne operations undertaken by South Africa's 4 Reconnaissance Commando Regiment. It breathtakingly reveals the versatility and effectiveness of this elite unit which worked with a range of other South African and Rhodesian forces, including the Rhodesian SAS, to engage in a range of raiding and war fighting activities. These operations saw the clandestine reconnaissance of harbors, the sinking of enemy shipping and the destruction of shore installations in Angola and Mozambique. Just some of the tasks undertaken by this extraordinary maritime

capability which totaled no more than 45 operators, both black and white! With unparalleled access to previously secret material, the authors, both of whom worked to develop 4 Recce's operating capabilities, trace the origins of the Regiment back to the 1970's when the South African's determined the need for a maritime force projection capability. They relate how maritime doctrine was developed within South Africa's wider Special Forces capability and how joint operational approaches were configured with the South African Navy. This saw the development of a range of swimmer, reconnaissance, diving and boat operator training courses, along with the design of specialist raiding craft and amphibious assault platforms, which were originated to operate from the Navy's existing shipping and submarines. All of which demonstrated the immense potential of this newly emergent force and the resourcefulness of its individual operators. Required to successfully complete a grueling selection process, the operators of 4 Recce were relentlessly tested to prove their physical and mental mettle, not to mention their leadership skills and initiative. Steyn and Söderlund's chronological analysis of the operations undertaken by 4 Recce and the South African Navy is stunning to behold. They impartially detail the secret and specialized actions which saw both success and failure. From Cabinda on the West Coast to Tanzania on the East, 4 Recce, and whose existence and capability was largely kept secret even within the South African Defence Force, conducted numerous clandestine raids. They attacked shipping and strategic targets such as oil facilities, transport infrastructure and even ANC offices. And sometimes the raids did go wrong, spectacularly so in one instance when two operators were killed and Captain Wynand Du Toit was captured. He was later paraded in front of the world's media, much to the embarrassment of the South African government. This is a fascinating work and one that will enthrall anyone with an interest in Special Forces operations. Profusely illustrated with many previously unpublished photographs, it stands as a

testament to the author's endeavors as, respectively, the former Operations Commander of 4 Recce and the former Commander Task Group of the SA Navy - as well as the incredible operators of 4 Recce. Explosive and compulsive, Iron Fist from the Sea takes you right to the raging surf; to the adrenaline and fear that is sea borne raiding...

Ecology of Marine Ports of the Black and Azov Sea Basin A. K. Vinogradov,Yu. I. Bogatova,I. A. Synegub,2017-08-18 This work examines the waters of marine ports as unique integrated aquatic ecosystems. It regards marine ports as entities comprising components of natural and anthropogenic origin, including pelagic, periphytal and benthal subsystems. Using selected Black and Azov Sea ports as examples, the book discusses the hydrodynamics and water exchange, which are weakened in ports compared with open coastal zones. It reflects consequences of the presence of hydrobionts and the accumulation of organic matter, which are promoted by the variety of hard substrata and the absence of fishery. The book is divided into five main chapters. The first chapter describes the general characteristics of the marine ports at the northern coast of the Black and Azov Seas and their shipping channels. Chapters 2 to 4 discuss the main

abiotic and biotic peculiarities of the pelagial, periphytal and benthic subsystems of those marine ports, and chapter 5 deals with tropho-dynamic processes in their ecosystems. A concluding section reflects recommendations how the ecosystems of ports in non-tidal seas may be ameliorated.
