Constitutional Life and Europe's Area of Freedom, Security and Justice Alun Howard Gibbs, 2016-05-23 The challenge of thinking about the place of constitutionalism beyond the conventional categories of the nation state has become a principal concern for legal and political scholars. This book casts this issue in a different light by exploring the implications for the constitutionalism of legal integration in the European Union's 'area of freedom, security and justice'. In doing so it makes a novel contribution to an understanding of the European Union as a political community beyond the state, but in addition explores how this entails thinking differently about what is essential concerning constitutionalism. The book argues that instead of seeking to theorise constitutional foundations we actually begin to encounter the constitutional life implied by political and legal practices in the European Union and as exemplified here by 'the area of freedom, security and justice'.

The Engagement of India Ian Hall, 2014-11-12 As India emerges as a significant global actor, diverse states have sought to engage India with divergent agendas and interests. Some states aspire to improve their relations with New Delhi, while others pursue the transformation of Indian foreign policy—and even India itself—to suit their interests. The Engagement of India explores the strategies that key states have employed to engage and shape the relationship with a rising and newly vibrant India, their successes and failures, and Indian responses—positive, ambivalent, and sometimes hostile—to engagement. A multinational team of contributors examine the ways in which Australia, China, Japan, Russia, and the United States have each sought to engage India for various purposes, explore the ways in which India has responded, and assess India's own strategies to engage with Singapore, Vietnam, Indonesia, and the Central Asian republics. This informative analysis of the foreign relations of a key rising power, and first comparative study of engagement strategies, casts light on the changing nature of Indian foreign policy and the processes that shape its future. The Engagement of India should be of interest to students and scholars of international relations, diplomacy, and South Asia.

**Real World Finance: Boost Your Financial Literacy as All Schools Have Failed to Do** Jerry L. Copley, 2023-06-13 As a former mathematics teacher and a master's degree recipient, I have witnessed a decline in basic mathematical abilities and financial literacy over the past twenty years. It is disheartening. To witness the anxieties people struggle with in their everyday lives--especially when due to reliance on credit--prompted me to do something. I decided to write a book to break down even complex financial concepts into understandable terms. Over the years, I have talked with business owners, bank mortgage lenders, sales professionals, finance managers, and college and high school students, along with coworkers, about the many financial topics individuals encounter throughout their lives. To be honest, I was somewhat surprised by the lack of understanding around basic financial concepts like budgeting, compensation and remuneration, insurance, credit, investments, and even taxation. Education has always been an integral part of my life. I believe in the total education of the individual, not just subject-matter expertise. An education that can last throughout a lifetime is complex yet simple, timeless yet timely, and most importantly, it builds a foundation that is needed for ultimate success. This book, *Real World Finance: Boost Your Financial Literacy as All Schools Have Failed to Do*, builds the financial education that seems to be missing from society today. It details financial concepts necessary to guide the individual through a lifetime of experiences and endeavors. The financial topics include budgets, credit, insurance, investments, retirement, and worker compensation with fringe benefits and taxes, all tailored to an individual's personal financial life. As a former tax associate, I have assisted hundreds with their tax returns. In too many cases, individuals did not know how to fill out, complete, and/or file their required tax return. Some didn't even know what their W-2 was! I have become determined to increase their financial literacy as I did with the thousands of students I taught. *Real World Finance: Boost Your Financial Literacy as All Schools Have Failed to Do* explains topics using real-world examples from employee compensation and lease versus purchase to loans, insurance, retirement, and the importance of investment to taxation. Employing this method breaks down any intimidation of mathematics (encountered by many of my former students and the general population) while teaching necessary financial concepts and calculations needed for everyday living--purchasing a

car, buying insurance, setting up a budget, comparing total compensation from various job opportunities, retirement and investing, filing tax returns, comparing leasing, renting versus ownership, and more. A Walmart employee I recently spoke with told me he had to learn many of these concepts for himself after suffering financial hardship. He wished he would have been introduced to these concepts in school. When I informed him I had taught many of the topics contained in Real World Finance: Boost Your Financial Literacy as All Schools Have Failed to Do to my students, he responded, I wish I had you as a teacher. I want to help more people like the Walmart employee and others. I sincerely think they will not only benefit from the topics--they will find them interesting and the narrative informative. Thank you in advance for taking the time to look at Real World Finance: Boost Your Financial Literacy as All Schools Have Failed to Do!

Nuclear Governance in the Asia-Pacific Mely Caballero-Anthony, Julius Cesar I. Trajano, 2022-07-08 The contributors to this book explore approaches to building a framework for nuclear governance in the Asia-Pacific - encompassing nuclear safety, security, and safeguards/non-proliferation. Nuclear governance collaboration offers an avenue for states in the Asia-Pacific to tackle the emerging opportunities for and challenges to the peaceful uses of nuclear energy and the civilian applications of nuclear and radioactive materials. The nature of national actions, bilateral initiatives and regional cooperation in capacity building taking place in East Asia provides a good foundation to pursue a more robust collaborative framework for nuclear governance in the wider Asia-Pacific region. The contributors to this book explore the most critical nuclear safety, security and non-proliferation issues faced by states in the Asia-Pacific and the growing cooperation spearheaded by Southeast Asian countries, China, Japan, South Korea and the United States. This book is a valuable read for academics working on security and strategic studies, international relations, non-traditional security issues as well as nuclear-related issues.

**Agricultural Adaptation to Climate Change in Africa** Cyndi Spindell Berck, Peter Berck, Salvatore Di Falco, 2018-03-05 A changing climate is likely to have a drastic impact on crop yields in Africa. The purpose of this book is to document the effects of climate change on agriculture in Africa and to discuss strategies for adaptation to hotter weather and less predictable rainfall. These strategies include promoting opportunities for farmers to adopt technologies that produce optimal results in terms of crop yield and income under local agro-ecological and socioeconomic conditions. The focus is on sub-Saharan Africa, an area that is already affected by changing patterns of heat and rainfall. Because of the high prevalence of subsistence farming, food insecurity, and extreme poverty in this region, there is a great need for practical adaptation strategies. The book includes empirical research in Ethiopia, Kenya, South Africa, Tanzania, and other Sub-Saharan countries, and the conclusion summarizes policy-relevant findings from the chapters. It is aimed at advanced students, researchers, extension and development practitioners, and officials of government agencies, NGOs, and funding agencies. It also will provide supplementary reading for courses in environment and development and in agricultural economics.

**Secure Edge Computing** Mohiuddin Ahmed, Paul Haskell-Dowland, 2021-08-12 The internet is making our daily life as digital as possible and this new era is called the Internet of Everything (IoE). Edge computing is an emerging data analytics concept that addresses the challenges associated with IoE. More specifically, edge computing facilitates data analysis at the edge of the network instead of interacting with cloud-based

servers. Therefore, more and more devices need to be added in remote locations without any substantial monitoring strategy. This increased connectivity and the devices used for edge computing will create more room for cyber criminals to exploit the system's vulnerabilities. Ensuring cyber security at the edge should not be an afterthought or a huge challenge. The devices used for edge computing are not designed with traditional IT hardware protocols. There are diverse-use cases in the context of edge computing and Internet of Things (IoT) in remote locations. However, the cyber security configuration and software updates are often overlooked when they are most needed to fight cyber crime and ensure data privacy. Therefore, the threat landscape in the context of edge computing becomes wider and far more challenging. There is a clear need for collaborative work throughout the entire value chain of the network. In this context, this book addresses the cyber security challenges associated with edge computing, which provides a bigger picture of the concepts, techniques, applications, and open research directions in this area. In addition, the book serves as a single source of reference for acquiring the knowledge on the technology, process and people involved in next generation computing and security. It will be a valuable aid for researchers, higher level students and professionals working in the area.
