The Mandel Files, Volume 1: Mindstar Rising & A Quantum Murder Peter F. Hamilton,2011-08-23 For the first time in a single volume, Peter F. Hamilton's acclaimed novels—Mindstar Rising and A Quantum Murder—set in a near-future so real it seems ripped from tomorrow's headlines In Mindstar Rising, Greg Mandel, gifted—or cursed—with biotechnology that makes him a living lie detector, is hired to investigate corporate espionage by Event Horizon, a powerful company about to introduce a technology that will solve the energy problems of a world decimated by global warming. Set two years later, A Quantum Murder once again teams Mandel with Event Horizon and its beautiful young owner, Julia Evans, in a locked-room mystery that combines the ingenuity of an

Agatha Christie novel with cutting-edge speculative brilliance. Read together, these novels take on fresh depth and complexity, underscoring the magnitude of Peter F. Hamilton’s creative talent.

Advances in Multimedia Information Processing - PCM 2005 Yo-Sung Ho,Hyoung Joong Kim,2005-10-31 We are delighted to welcome readers to the proceedings of the 6th Pacific-Rim Conference on Multimedia (PCM). The first PCM was held in Sydney, Australia, in 2000. Since then, it has been hosted successfully by Beijing, China, in 2001, Hsinchu, Taiwan, in 2002, Singapore in 2003, and Tokyo, Japan, in 2004, and finally Jeju, one of the most beautiful and fantastic islands in Korea. This year, we accepted 181 papers out of 570 submissions including regular and special session papers. The acceptance rate of 32% indicates our commitment to ensuring a very high-quality conference. This would not be possible without the full support of the excellent Technical Committee and anonymous reviewers that provided timely and insightful reviews. We would therefore like to thank the Program Committee and all reviewers. The program of this year reflects the current interests of the PCM’s. The accepted papers cover a range of topics, including, all aspects of multimedia, both technical and artistic

perspectives and both theoretical and practical issues. The PCM 2005 program covers tutorial sessions and plenary lectures as well as regular presentations in three tracks of oral sessions and a poster session in a single track. We have tried to expand the scope of PCM to the artistic papers which need not to be strictly technical.

CCTV for Security Professionals Alan Matchett,2002-12-23 CCTV for Security Professionals provides the information necessary to design the ideal CCTV system. The chapters are stand-alone sources of information on their subjects and are presented in logical sequence to guide the reader from basic principles to more complex for a complete system understanding. In his straight-forward and informative text, Alan Matchett approaches the camera systems from the user's point of view, providing the security manager with the knowledge to discuss the system, its desired features, and the areas of design concern within the context of an organization's business model. This can prove to be invaluable when evaluating an existing system, the use and components of a given system, or in evaluating a system design proposed by a vendor. Installers and service personnel will benefit from the functions and possibilities that are available with the various components and by gaining an understanding of their customers' needs. Newer technicians will learn how to set up the system properly, and can familiarize themselves with the technologies that go into a CCTV system. Security equipment sales personnel will also gain a better knowledge of the customer's needs as well as learn to determine exactly what questions they should be asking the customer and what the customer's responses mean. In this manner, the book will offer invaluable tips to ensure customers get exactly what they

expect in a system. * Provides a detailed explanation of CCTV components and the technology behind analog and digital CCTV systems. * Establishes a common language for security professionals, CCTV system designers and sales personnel to use as a basis for system design. * Provides a clear explanation of the design process and design principles.
