Global Survey on Internet Privacy and Freedom of Expression Toby Mendel, Andrew Puddephatt, Ben Wagner, Dixie Hawtin, Natalia Torres, 2012-01-01 This publication seeks to identify the relationship between freedom of expression and Internet privacy, assessing where they support or compete with each other in different circumstances. The book maps out the issues in the current regulatory landscape of Internet privacy from the viewpoint of freedom of expression. It provides an overview of legal protection, self-regulatory guidelines, normative challenges, and case studies relating to the topic. With this

publication UNESCO aims to provide its Member States and other stakeholders, national and international, with a useful reference tool containing up-to-date and sharp information on emerging issues relevant to both developed and developing countries. Multiple stakeholders, preferably in dialogue, can use it in their own spheres of operation, adapting where appropriate from the range of experiences as recorded in these pages. The publication also supplies additional sources of reference for interested readers to use to further investigate each of the subjects highlighted. The publication explores a range of issues, such as: (1) threats to privacy that have developed through the Internet, (2) international legal standards on privacy and responses to these emerging issues, (3) complex intersections between the rights to privacy and freedom of expression, (4) UNESCO recommendations to states and corporations for better practice, (5) overview of literature, background material and tools on international and national policy and practice on privacy and freedom of expression on the Internet. In the coming years, UNESCO will specifically seek to disseminate information about good practices and international collaboration concerning the points of intersection between freedom of expression and privacy. Research on safeguarding the principle of freedom of expression in Internet policy across a range of issues will continue to be part of UNESCO's normative mandate and technical advice to stakeholders.--Publisher's description

Hacker, Hoaxer, Whistleblower, Spy Gabriella Coleman,2015-10-06 The ultimate book on the worldwide movement of hackers, pranksters, and activists collectively known as Anonymous—by the writer the Huffington Post says “knows all of Anonymous’ deepest, darkest secrets” “A work of anthropology that sometimes echoes a John le Carré novel.” —Wired Half a dozen years ago, anthropologist Gabriella Coleman set out to study the rise of this global phenomenon just as some of its members were turning to political protest and dangerous disruption (before Anonymous shot to fame as a key player in the battles over WikiLeaks, the Arab Spring, and Occupy Wall Street). She ended up becoming so closely connected to Anonymous that the tricky story of her inside–outside status as Anon confidante, interpreter, and erstwhile mouthpiece forms one of the themes of this witty and entirely engrossing book. The narrative brims with details unearthed from within a notoriously mysterious subculture, whose semi-legendary tricksters—such as Topiary, tflow, Anachaos, and Sabu—emerge as complex, diverse, politically and culturally sophisticated people. Propelled by years of chats and encounters with a multitude of hackers, including imprisoned activist Jeremy Hammond and the double agent who helped put him away, Hector Monsegur, *Hacker, Hoaxer, Whistleblower, Spy* is filled with insights into the meaning of digital activism and little understood facets of culture in the Internet age, including the history of “trolling,” the ethics and metaphysics of hacking, and the origins and manifold meanings of “the lulz.”

Global Trends 2040 National Intelligence Council,2021-03 The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come. -*Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021)*, released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Privacy on the Ground Kenneth A. Bamberger,Deirdre K. Mulligan,2015-10-23 An examination of corporate privacy management in the United States, Germany, Spain, France, and the United Kingdom, identifying international best practices and making policy recommendations. Barely a week goes by without a new privacy revelation or scandal. Whether by hackers or spy agencies or social networks, violations of our personal information have shaken entire industries, corroded relations among nations, and bred distrust between democratic governments and their citizens. Polls reflect this concern, and show majorities for more, broader, and stricter regulation—to put more laws “on the books.” But there was scant evidence of how well tighter regulation actually

worked “on the ground” in changing corporate (or government) behavior—until now. This intensive five-nation study goes inside corporations to examine how the people charged with protecting privacy actually do their work, and what kinds of regulation effectively shape their behavior. And the research yields a surprising result. The countries with more ambiguous regulation—Germany and the United States—had the strongest corporate privacy management practices, despite very different cultural and legal environments. The more rule-bound countries—like France and Spain—trended instead toward compliance processes, not embedded privacy practices. At a crucial time, when Big Data and the Internet of Things are snowballing, Privacy on the Ground helpfully searches out the best practices by corporations, provides guidance to policymakers, and offers important lessons for everyone concerned with privacy, now and in the future.
