Scala for the Impatient Cay S. Horstmann, 2012 Presents an introduction to the Scala programming language which is an abbreviated version of object-orientated programming combined with the power of concurrency capable of running on the Java Virtual Machine.

Parallel and Concurrent Programming in Haskell Simon Marlow, 2013-07-12 If you have a working knowledge of Haskell, this hands-on book shows you how to use the language's many APIs and frameworks for writing both parallel and concurrent programs. You'll learn how parallelism exploits multicore processors to speed up computation-heavy programs, and how concurrency enables you to write programs with threads for multiple interactions. Author Simon Marlow walks you through the process with lots of code examples that you can run, experiment with, and extend. Divided into separate sections on Parallel and Concurrent Haskell, this book also includes exercises to help you become familiar with the concepts presented: Express parallelism in Haskell with the Eval monad and Evaluation Strategies Parallelize ordinary Haskell code with the Par monad Build parallel array-based computations, using the Repa library Use the Accelerate library to run computations directly on the GPU Work with basic interfaces for writing concurrent code Build trees of threads for larger and more complex programs Learn how to build high-speed concurrent network servers Write distributed programs that run on multiple machines in a network

How to Type Fast Brandon Nankivell, 2015-07-23 Do you want to learn how to type fast? Do you want to learn how to write faster and complete your book, essay, or script in half the time? Wait no longer! It's time to save time, boost productivity, and double your typing speed. This book is neatly organized and will introduce you to the 7 keystones to success. The keystones are the key to learning how to type like a pro. No longer will you have to use the inconvenient 'hunt-and-peck' approach. Here is what you'll learn: - How to set goals - How to choose the right keyboard - How to apply good ergonomics - How to touch type - How to identify and fix bad habits - How to write books 2x faster - Typing for beginners and experts - 35 typing tips and techniques - Enhance your touch typing skills for a lifetime - And much more... Unlike the other guides out there, this book is full of quality material that is often left out in other guides. As an author with 10 years of typing experience, an average typing speed of 128 words per minute, and a volunteer at Typeracer.com, you can be assured you are learning from a reliable source. Additionally, many tips and techniques have been gathered from some of the top typists in the world and various typing forums, all

compiled and presented in an easy-to-read chapter. It doesn't matter if you can type 10 words per minute or 100, there will be value in this book for you. Think about this: If you are currently 30 years of age and type at 80 wpm for 2 hours a day 5 days a week until you are 60 years of age, and assuming you type at 40 wpm, you will have saved 325 days of your life. 325 days of your life. If you are younger than 30 or continue typing past the age of 60, even better. Imagine what you could do with all that extra time. Spend more time building your business, bonding with your family and friends and traveling the world. The list is endless. The earlier you learn, the better, but it's never too late. Finally, 3 bonus chapters have been included: 10 answers to questions I'm asked most frequently, how to make money by typing, and a case study on how I went from typing 0 - 125 words per minute and you can too. About the Author Brandon Nankivell was born in the Barossa Valley, South Australia. He is currently pursuing a Bachelor of Information Technology at the University of South Australia and became the Junior World Unicycle Champion in 2010. His debut book 'How to Type Fast: Save Time, Boost Productivity, and Double Your Typing Speed' spawned from his passion for typing and shows readers how they can save hours of their life by learning to type properly. He is an active volunteer at Typeracer.com and types at an average rate of 128 words per minute. YOU'LL WISH YOU HAD LEARNED TO TYPE FASTER EARLIER Scroll up and grab your copy today!
