Warhol-isms Andy Warhol, 2022-05-10 A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—"In the future, everyone will be world-famous for 15 minutes." Warhol-isms separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well. I went to [a psychiatrist] once, and he never called me back. They always say that time changes things, but you actually have to change them yourself. I've never met a person I couldn't call a beauty. New things are always better than old things. I'm still a commercial artist. I was always a commercial artist.

Artful Teaching David M. Donahue, Jennifer B. Stuart, 2024 Both a practitioner's guide and a school reform model, the new edition of this popular book shares exemplary arts-integration practices across the K-8 curriculum. Rather than providing formulas or scripts to be followed, each chapter carefully describes how the arts offer an entry point for gaining insight into why and how students learn to assist teachers in developing their own philosophy and practice. This updated second edition features scholarship and art at the forefront of contemporary practice and addresses social justice issues such as racial, climate, and economic justice. Chapter authors provide concrete ideas along with lively examples of public-school teachers integrating visual arts, music, drama, and dance with subject matter that includes English, social studies, science, and mathematics. The book's narrative approach makes arts integration accessible and understandable to novice and experts alike. Readers of this new edition will come away with a deeper understanding of why and how to use the arts every day, in every school, to reach every child. Book Features: Explains how arts integration across the K-8 curriculum contributes to student learning. Features examples of how integrated arts education functions in classrooms

when it is done well. Introduces historical and contemporary artists whose work is transdisciplinary. Brings together and speaks to diverse stakeholders, including classroom teachers, teaching artists, school administrators, and teacher educators. Explores intensive teacher-education and principal-training programs now underway in several higher education institutions. "A thorough guide to integrating art into other disciplinary subjects . . . recommended." —SchoolArts (for first edition)

Superconnect Richard Koch, Greg Lockwood, 2010-08-24 For readers of Outliers or The Wisdom of Crowds — or internationally bestselling author Richard Koch's many followers — this entertaining book draws on the latest in network science research to show how any of us can increase the chances of success in our personal and work lives. What's so special about the rich and famous? Unusually successful people often think they've done well because of their talent or luck — or simple grit and hard work. But individual characteristics matter far less than the social connections we exploit. And counterintuitively, it's our weak links — your neighbour's landscaper or that ad agency guy you happened to meet at your sister's birthday party last year — that matter most of all. Drawing on research from the fields of sociology, math, and physics, internationally bestselling author and entrepreneur Richard Koch and his co-author Greg Lockwood show how networks impact our everyday lives. Rich with entertaining anecdotes and written in Richard Koch's trademark conversational style, Superconnect reveals the hidden patterns behind everyday events. Most importantly, it shows how any of us can increase the chances of happy outcomes in our own lives, careers, or businesses.

Kasey to the Rescue Ellen Rogers, 2010-11-02 This is a story of how miracles DO happen. How courage and a never-give-up spirit can emerge victorious. How an engaging little monkey helped change a family's life. Ellen Rogers considered herself something of a tragedy snob. The single mother of five believed she could weather any storm, that she could keep her family from harm with fortitude and grace. But nothing could have prepared her for the June 2005 car accident that left her son, Ned--then 22 years old--fighting for his life. Ellen refused to give in to despair. We'll get through this, she told herself. We have to. But love and determination can only go so far, and the road home was fraught with obstacles. Ellen and Ned took comfort in family and friends. And they prayed for a miracle. Miracles happen to those who believe, the saying goes, but who would have believed that one family's miracle would weigh in at five pounds sopping wet? Then Helping Hands: Monkey Helpers for the Disabled provided Ned with an affectionate and intelligent service animal with a steadfast devotion to hierarchy, a longing for spa days, and a craving for Gummi Bears. In other words, a diva. Life with Kasey was yet another challenge for this large and lively family, but they persevered as families do, and in time this wise and sensitive animal did more than help Ned cope with his disabilities--she turned the simple tasks of life into a life worth living. Kasey's

astounding intelligence and compassion brought hope and laughter back to a family facing its greatest challenge, and helped them see the world in a new way.

OverSuccess Jim Rubens, James M. Rubens, 2008 Why are one in three American adults pervasively dissatisfied with their lives? Why is major depression seven times more likely among those born after 1970 than their grandparents? Why are one in four of us addicted to at least one substance or behavior? Why is America drowning in record personal and public debt? Why did over 100,000 people humiliate themselves this year auditioning for Fox's American Idol? Why are 80 percent of women unhappy with their bodies? What is it about contemporary America that connects the swelling incidence of depression, behavioral addictions, eating disorders, debt, materialism, sleep deprivation, family breakdown, rudeness, fame fixation, ethical collapse, mistrust, and monstrous acts of personal violence? Drawing from emerging science in several fields and insights about our transformed social lives, Rubens explains how genes, commercial culture, and global hyper-competition have locked tens of millions of Americans into an unwinnable success benchmarks race and unleashed an epidemic of status defeat. OverSuccess shows how and why the resulting social and psychological pathologies are different for baby boomers, men, and women. Offering hope for our future, Rubens outlines 20 ways that individuals, businesses, and voluntary organizations can satisfy the American drive for recognition and personal achievement without the toxic burdens of OverSuccess. These cures range from holding the door for strangers and somatic cell gene therapy, to responsible displays of wealth and building village-scale social and business organizations.

The Survival Imperative William E. Burrows, 2007-04-01 Using Space to Save Earth Veteran science journalist William E Burrows offers a bold new mission for the U.S. space program: to protect the Earth from the ever-growing number of perils that threaten our way of life - and even our very survival. We are living through one of the most dangerous times in human history. Nuclear, chemical, and biological weapons technology are proliferating, and missile technology is falling into more and more hands. Extreme natural disasters like hurricanes, floods, fires, and earthquakes, are becoming increasingly costly - not only in dollars, but in lives - as population expands. Environmental crises threaten to provoke massive famines and widespread social collapse. Asteroids the size of battleships streak within striking distance of the earth every year. One strategy offers the best hope of protecting us from all of these dangers - a revitalized national space program that coordinates efforts in global defense, in environmental protection, in communications, and in military security. The Survival Imperative offers an impassioned argument for this bold initiative. To demonstrate the urgency of his cause, Burrows presents a vivid scenario: an impact by a moderately large asteroid that triggers a series of nuclear exchanges, environmental devastation, and the slow disintegration of civilization. And he examines the existing space program from the heady days of the Moon landing through the political compromises that have characterized the history of NASA in the 35 years following our retreat from the Moon. Most of all, Burrows warns that the primary obstacle to achieving a true planetary defense program is not financial or scientific, but social-an unwillingness to acknowledge the urgency of the crisis, and to take the political risks needed to address it. The question, says Burrows, is not whether we can do it, but whether we will act before it's too late. Waiting for Your Cat to Bark? Bryan Eisenberg, Jeffrey Eisenberg, 2007-09-09 Evolving from the premise that customers have always behaved

more like cats than Pavlov's dogs, *Waiting for Your Cat to Bark?* examines how emerging media have undermined the effectiveness of prevailing mass marketing models. At the same time, emerging media have created an unprecedented opportunity for businesses to redefine how they communicate with customers by leveraging the power of increasingly interconnected media channels. Bryan and Jeffrey Eisenberg don't simply explain this shift in paradigm; *Waiting for Your Cat to Bark?* introduces Persuasion Architecture™ as the synthetic model that provides business with a proven context for rethinking customers and retooling marketers in a rewired market. Readers will learn: Why many marketers are unprepared for today's increasingly fragmented, in-control, always-on audience that makes pin-point relevance mandatory How interactivity has changed the nature of marketing by extending its reach into the world of sales, design, merchandizing, and customer relations How Persuasion Architecture™ allows businesses to create powerful, multi-channel persuasive systems that anticipate customer needs How Persuasion Architecture™ allows businesses to measure and optimize the return on investment for every discreet piece of that persuasive system There's some big thinking going on here-thinking you will need if you want to take your work to the next level. 'Typical, not average' is just one of the ideas inside that will change the way you think about marketing. ?Seth Godin, Author, *All Marketers Are Liars* Are your clients coming to you armed with more product information than you or your sales team know? You need to read *Waiting for Your Cat to Bark?* to learn how people are buying in the post-Internet age so you can learn how to sell to them. ?Tom Hopkins, Master Sales Trainer and Author, *How to Master the Art of Selling* These guys really 'get it.' In a world of know-it-all marketing hypesters, these guys realize that it takes work to persuade people who aren't listening. They've connected a lot of the pieces that we all already know-plus a lot that we don't. It's a rare approach that recognizes that the customer is in charge and must be encouraged and engaged on his/her own terms, not the sellers. *Waiting for Your Cat to Bark?* takes apart the persuasion process, breaks down the steps and gives practical ways to tailor your approaches to your varying real customers in the real world. This book is at a high level that marketers better hope their competitors will be too lazy to implement. ?George Silverman, Author, *The Secrets of Word of Mouth Marketing: How to Trigger Exponential Sales Through Runaway Word of Mouth* We often hear that the current marketing model is broken-meaning the changes in customers, media, distribution, and even the flatness of the world make current practices no longer relevant. Yet few have offered a solution. This book recognizes the new reality in which we operate and provides a path for moving forward. The authors do an outstanding job of using metaphors to help make Persuasion Architecture clear and real-life examples to make it come alive. Finally, someone has offered direction for how to market in this new era where the customer is in control. ?David J. Reibstein, William Stewart Woodside Professor, Wharton Business School of the University of Pennsylvania and former Executive Director, Marketing Science Institute If you want to learn persistence, get a cat. If you want to learn marketing, get this book. It's purrfect. ?Jeffrey Gitomer, Author, *The Little Red Book of Selling*

Say Everything Scott Rosenberg, 2009-06-16 Blogs are everywhere. They have exposed truths and spread rumors. Made and lost fortunes. Brought couples together and torn them apart. Toppled cabinet members and sparked grassroots movements. Immediate, intimate, and influential, they have put the power of personal publishing into everyone's hands. Regularly dismissed as trivial and ephemeral, they have proved that they are here to stay. In *Say Everything*, Scott Rosenberg chronicles blogging's unplanned rise and improbable triumph, tracing its impact on politics, business, the media, and our personal lives. He offers close-ups of innovators such as Blogger founder Evan Williams, investigative journalist Josh Marshall, exhibitionist diarist Justin Hall, software visionary Dave Winer, mommyblogger Heather Armstrong, and many others. These blogging pioneers were the first to face new dilemmas that have become common in the era of Google and Facebook, and their stories offer vital insights and warnings as we navigate the future. How much of our lives should we reveal on the Web? Is anonymity a boon or a curse? Which voices can we trust? What does authenticity look like on a stage where millions are fighting for attention, yet most only write for a handful? And what happens to our

culture now that everyone can say everything? Before blogs, it was easy to believe that the Web would grow up to be a clickable TV-slick, passive, mass-market. Instead, blogging brought the Web’s native character into focus-convivial, expressive, democratic. Far from being pajama-clad loners, bloggers have become the curators of our collective experience, testing out their ideas in front of a crowd and linking people in ways that broadcasts can’t match. Blogs have created a new kind of public sphere—one in which we can think out loud together. And now that we have begun, Rosenberg writes, it is impossible to imagine us stopping. In his first book, *Dreaming in Code*, Scott Rosenberg brilliantly explored the art of creating software (the first true successor to *The Soul of a New Machine*, wrote James Fallows in *The Atlantic*). In *Say Everything*, Rosenberg brings the same perceptive eye to the blogosphere, capturing as no one else has the birth of a new medium.

When the World Calls Stanley Meisler,2012-02-07 *When the World Calls* is the first complete and balanced look at the Peace Corps’s first fifty years. Revelatory and candid, journalist Stanley Meisler’s engaging narrative exposes Washington infighting, presidential influence, and the Volunteers’ unique struggles abroad. He deftly unpacks the complicated history with sharp analysis and memorable anecdotes, taking readers on a global trek starting with the historic first contingent of Volunteers to Ghana on August 30, 1961. In the years since, in spite of setbacks, the ethos of the Peace Corps has endured, largely due to the perseverance of the 200,000 Volunteers themselves, whose shared commitment to effect positive global change has been a constant in one of our most complex—and valued—institutions.
