Office-Based Endovascular Centers Krishna M. Jain,2019-11-17 Recent years have seen a rapidly increasing movement of endovascular treatment and procedures away from hospital settings to outpatient venues (office-based labs). New technologies offer enhanced capabilities that make it easier and more cost-effective to treat even complex cases on an outpatient basis. Office-Based Endovascular Centers synthesizes the entire process of operating an office-based practice – from regulation and legal issues through to business models and optimal endovascular procedures – helping you ensure the best the possible outcomes for your patients. Provides expert guidance from Dr. Krishna M. Jain, an experienced vascular surgeon and founding member of the Outpatient Endovascular and Interventional Society. Covers all aspects of opening and running an office-based endovascular center, including various models, regulations, capital equipment, quality control, management of safety and complications, marketing and patient satisfaction, and much more. Discusses perspectives of the interventional cardiologist and interventional radiologist, various types of procedures, certification and accreditation, and conducting research in the center. Consolidates today's available information and experience in this timely area into one convenient resource.
