  Managing Content Marketing: The Real-World Guide for Creating Passionate Subscribers to Your Brand Robert Rose,Joe Pulizzi,2011-08-01 Perhaps no function in the business organization has been as fundamentally revolutionized as marketing. The social and mobile Web has completely changed the speed, efficiency, and ease with which consumers can engage with each other and has had a tremendous impact on brands. This new engagement of the consumer with keen awareness of their relationships and emerging social networks now correlates to every single aspect of our business. So, yes, marketing has changed. The question is what are we going to do about it?Content and Subscription: The New Marketing OpportunityAs growth of the social and mobile Web changes the methods of communication, the old lines of hierarchical relationships between business and consumer blur substantially. As consumers publish and share their opinions (both good and bad) with increasing ease, they can become more persuasive than even the company's voice itself. Every one of these groups becomes a powerful ally or enemy depending on what we do. All of them will be constantly in flux developing levels of trust and requiring varying levels of transparency to filter content and determine buying decisions. They will expand and collapse with great velocity, and it will all happen with or without our participation.Content marketing has been around for hundreds of years. But the application of a specific strategic process around content marketing is still new. The amount of budget that is allotted for new content creation is going to become a significant part of your new media budget. And subject matter experts in the organization are going to have new responsibilities. It's a transformative new process and it won't happen overnight. But it can, and should, happen. Get Content Get Customers showed us the light but there's been no book to show us the way. There is an ancient Chinese proverb that says a crisis is simply an opportunity riding the dangerous wind. As marketers we now have the opportunity to develop new processes with our marketing strategy, power them with content, and ultimately keep that wind at our back.Successful programs will focus on creating a thoughtful strategy and process to foster this content marketing. This book is a detailed how-to to build that successful content marketing process.

  Robot-Assisted Radical Prostatectomy John W. Davis,2016-09-07 This book addresses knowledge gaps in RARP in 3 key sections: 1) Step-by-step approach including multiple technique options and innovations, 2) Patient selection, safety, outcomes, and 3) Preparing the patient for surgery. The order is more based upon knowledge priority rather than a chronologic sequence in which part 3 would go first. Part two allows more summary and commentary on evidence and part three allows some creative content that is otherwise hard to find in one place—medical evaluations, imaging, clinical trials, patient education, etc. This textbook emphasizes content for the advanced skills surgeon in that multiple techniques are presented as well as state of the art evidence. The learning curve is addressed and the authors clarify how this text is useful for learners. The caveat is that they should be careful in patient selection and stick with what their mentors are showing them. With experience, they can then branch out into the many techniques presented here. Robot-Assisted Radical Prostatectomy: Beyond the Learning Curve will also have cross-over appeal for surgical assistants, physician assistants, nurses, and anyone else involved in the surgical care of prostate cancer.

They say you shouldn't ask your mom whether your business is a good idea, because she loves you and will lie to you. This is technically true, but it misses the point. Talking to customers is one of the foundational skills of both Customer Development and Lean Startup. We all know we're supposed to do it, but nobody seems willing to admit that it's easy to screw up and hard to do right. This book is going to show you how customer conversations go wrong and how you can do better.

Tribal Leadership Dave Logan,John King,Halee Fischer-Wright,2008-01-22 It's a fact of life: birds flock, fish school, people tribe. Every company, indeed every organization, is a tribe, or if it's large enough, a network of tribes—groups of 20 to 150 people in which everyone knows everyone else, or at least knows of everyone else. Tribes are more powerful than teams, companies, or even CEOs, and yet their key leverage points have not been mapped—until now. In Tribal Leadership, Dave Logan, John King, and Halee Fischer-Wright show leaders how to assess their organization's tribal culture on a scale from one to five and then implement specific tools to elevate the stage to the next. The result is unprecedented success. In a rigorous eight-year study of approximately 24,000 people in over two dozen corporations, Logan, King, and Fischer-Wright refine and define a common theme: the success of a company depends on its tribes, the strength of its tribes is determined by the tribal culture, and a thriving corporate culture can be established by an effective tribal leader. Tribal Leadership will show leaders how to employ their companies' tribes to maximize productivity and profit: the authors' research, backed up with interviews ranging from Brian France (CEO of NASCAR) to Dilbert creator Scott Adams, shows that over three quarters of the organizations they've studied have tribal cultures that are merely adequate, no better than the third of five tribal stages. Leaders, managers, and organizations that fail to understand, motivate, and grow their tribes will find it impossible to succeed in an increasingly fragmented world of business. The often counterintuitive findings of Tribal Leadership will help leaders at today's major corporations, small businesses, and nonprofits learn how to take the people in their organization from adequate to outstanding, to discover the secrets that have led the highest-level tribes (like the team at Apple that designed the iPod) to remarkable heights, and to find new ways to succeed where others have failed.
