**Implementing Online Union Lists of Serials** Ruth C. Carter,James D Hooks,2019-12-06 This book, first published in 1989, is a comprehensive look at PaULS, the Pennsylvania Union List of Serials. The editors, both of whom have extensive experience with online union listing, have collected the previously published articles recording the development and implementation of PaULS; compiled new articles representing updated perspectives; provided the PaULS procedure manual; and included an annotated bibliography of literature about online union listing. Contributors to this fascinating volume describe extensive union listing activities of West Virginia University, a special library, Calgon Corporation, and a regional consortia, the Lehigh Valley Association of Independent Colleges.

**The Oxford Handbook of Comparative Cognition** Thomas R. Zentall,Edward A. Wasserman,2012-03-20 In the past decade, the field of comparative cognition has grown and thrived. No less rigorous than purely behavioristic investigations, examinations of animal intelligence are useful for scientists and psychologists alike in their quest to understand the nature and mechanisms of intelligence. Extensive field research of various species has yielded exciting new areas of research, integrating findings from psychology, behavioral ecology, and ethology in a unique and wide-ranging synthesis of theory and research on animal cognition. The Oxford Handbook of Comparative Cognition contains sections on perception and illusion, attention and search, memory processes, spatial cognition, conceptualization and categorization, problem solving and behavioral flexibility, and social cognition processes including findings in primate tool usage, pattern learning, and counting. The authors have incorporated findings and theoretical approaches that reflect the current state of the field. This comprehensive volume will be a must-read for students and scientists who want to know about the state of the art of the modern science of comparative cognition.

*Thinking About Human Memory* Michael S. Humphreys,Kerry A. Chalmers,2016-03-11 Thinking About Human Memory provides a novel analytical approach to understanding memory that considers the goals of the memory task, the cues and information available, the opportunity to learn, and interference from irrelevant information (noise). Each of the five chapters describing this approach introduces historical ideas and demonstrates how current thinking both differs from and is derived from them. These chapters also contain analyses of current problems designed to demonstrate the power of the approach. In a subsequent chapter, the authors discuss how memory is controlled by the environment, by others, and by ourselves, and then apply their insights to the problem solving of children, our hominin ancestors, and scrub jays. Finally, the questions of how to define episodic memory and how to investigate phylogenetic and developmental changes in memory are addressed. This book will appeal to memory researchers, including applied researchers, and advanced students.

*Encyclopedia of the Mind* Harold Pashler,2013-01-14 It's hard to conceive of a topic of more broad and personal interest than the study of the mind. In addition to its traditional investigation by the disciplines of psychology, psychiatry, and neuroscience, the mind has also been a focus of study in the fields of philosophy, economics, anthropology, linguistics, computer science, molecular biology, education, and literature. In all these approaches, there is an almost universal fascination with how the mind works and how it affects our lives and our behavior. Studies of the mind and brain have crossed many exciting thresholds in recent years, and the study of mind now represents a thoroughly cross-disciplinary effort. Researchers from a wide range of disciplines seek answers to such questions as: What is mind? How does it operate? What is consciousness? This encyclopedia brings together scholars from the entire range of mind-related academic disciplines from across the arts and humanities, social sciences, life sciences, and computer science and engineering to explore the multidimensional nature of the human mind.

*The 1972 World Heritage Convention* Francesco Francioni,2023-10-03 Almost fifty years have passed since the adoption of the Convention Concerning the Protection of the World Cultural and Natural Heritage (the UNESCO World Heritage Convention). With its 194 States Parties, it is the most widely ratified convention within the family of UNESCO treaties on the protection of cultural heritage. The success of this Convention and its almost universal acceptance by the international community of states is due to the great appeal that recognising certain properties as world heritage has for national governments. Since the publication of the first Commentary, new problems have arisen in the management of world heritage sites. It has become increasingly difficult to properly monitor the conservation of the ever-growing mass of sites inscribed in the World Heritage List, and to resolve disputes over the formal designation of contested world heritage properties - a problem that has led to the withdrawal of the United States and Israel from UNESCO. New frontiers are now being explored for the expansion of the world heritage idea over marine areas beyond national jurisdiction, and the monopoly of the State in the identification, delineation, and presentation of world heritage properties is being increasingly

challenged in the name of indigenous peoples' rights and by local communities claiming ownership over contested cultural sites. At the same time, the regime of world heritage protection has infiltrated other areas of international law, especially international economic law, investment arbitration, and the area of international criminal law. This second edition critically examines the World Heritage Convention against this dynamic evolution of international heritage law to help academics, lawyers, diplomats, and officials interpret and apply the norms of the Convention after half a century of uninterrupted implementing practice by State Parties and Treaty Bodies.
