Carbon & Silicon Mathieu Bablet, 2021-12-07 Carbon and Silicon are the first of a new generation of robots meant to care for the aging human population. Raised in the protective cocoon of a laboratory, they are eager to discover the outside world but are dramatically separated during an escape attempt. Lost and alone, they will gather three centuries' worth of experiences, observing the last gasps of humanity facing the ecological, economic, and social disasters that they themselves have created. Faced with this declining world, will Carbon and Silicon manage to find their place? Born in a laboratory in Silicon Valley, two androids named Carbon and Silicon will witness the evolution of humanity. From this dawn of true artificial intelligence, the pinnacle of human achievement, they will directly witness ecological, economic, and cultural crises that alter civilization as we know it. Through their eyes, we rediscover our planet as it reaches the point of no return. The latest project by celebrated author Mathieu Bablet, this ambitious work addresses themes separating artificial intelligence from humanity. A fable about the ravages of capitalism and the illusion of transhumanism. A cautionary tale spanning 300 years of frighteningly plausible future scenarios.

The Report: Indonesia 2014 Oxford Business Group, 2014-05-21 On the cusp of 2014 national elections and the 2015 integration of the ASEAN Economic Community, Indonesia is poised to continue its rapid economic expansion. While the country's natural resources are still plentiful, by channelling foreign direct investment into the right areas, the government is ensuring that true potential, in terms of value and manufacturing, is achieved. By inviting targeted investment and adapting existing regulatory frameworks, the government has taken significant steps to facilitate foreign investment and the development of value-added industries. Indonesia is a country renowned for its abundance of natural resources, which include oil, gas, coal, nickel, tin, copper, gold and silver. While slightly down on the previous year, the country's total oil production for 2012 stood at 861,000 barrels per day, accounting for approximately 1.2% of the world's oil production. Indonesia remains the world's largest exporter of thermal coal, exporting a total of 304m tonnes in 2012 to countries such as Japan, South Korea, China and India. The country continues to be the dominant nation in South-east Asia politically and economically, and its participation within ASEAN in particular will likely determine the shape of regional integration, with the introduction of the ASEAN Economic Community (AEC) in 2015 looming as the bloc's next major milestone.

The Report: Myanmar 2018 ,2018 Although recent GDP growth has moderated from

the double-digit highs of the early 2000s, it has remained above 5% for more than 25 years, supported by robust natural resource exports, steady foreign direct investment (FDI), rising incomes and private consumption, and rapid expansion of the industrial and services sectors. External headwinds and internal conflict have dampened the near-term outlook; however, the country's long-term economic outlook remains positive, with rising investment in transport and power infrastructure expected to drive GDP and industrial growth, supported by a sharp increase in personal incomes and consumer spending.

The Report: Myanmar 2016 Oxford Business Group,2016-01-02 While major strides need to be taken to promote inclusive growth, critical developments across the country's economy continue to heighten investor appetite. This was given a significant boost with the victory of Daw Aung San Suu Kyi's National League for Democracy (NLD) over the ruling Union Solidarity and Development Party (USDP) in the November 2015 national elections. The NLD is expected to build upon efforts taken by outgoing President U Thein Sein to improve transparency, promote peace and increase spending on health and education, which have to some degree alleviated the strain left behind by decades of military rule. With the incoming NLD administration expected to prioritise inclusive growth, the outlook for all segments of Myanmar's population is looking significantly more positive.
