Reliable Software Technologies - Ada-Europe 2008 Fabrice Kordon, Tullio Vardanega, 2008-06-11 The 13 edition of the International Conference on Reliable Software Technologies (Ada-Europe 2008) marked its arrival in Italy by selecting the splendid venue of Venice. It did so after having been hosted twice in Switzerland, Spain and the UK (Montreux for its inauguration in 1996 and Geneva in 2007; Santander in 1999 and Palma de Mallorca in 2004; London in 1997 and York in 2005), and having visited Sweden (Uppsala, 1998), Germany (Potsdam, 2000), Belgium (Leuven, 2001), Austria (Vienna, 2002), France (Toulouse, 2003) and Portugal (Porto, 2006). It was certainly high time that the conference came to Italy! The conference series, which is run and sponsored by Ada-Europe, chooses its yearly venue following two driving criteria: to celebrate the activity of one of its national member societies in a particular country, and/or to facilitate the formation, or the growth, of a national community around all aspects of reliable software technologies. The success of this year's conference, beside the richness of its technical and social program, will thus be measured by its lasting effects. We can only hope that the latter will be as good and vast as the former! Owing to the absence of a national society associated with Ada-Europe in Italy, the organization of the conference was technically sustained by selected members of the Board of Ada-Europe, its governing body, with some invaluable local support.

ECSCW 2009: Proceedings of the 11th European Conference on Computer Supported Cooperative Work, 7-11 September 2009, Vienna, Austria Ina Wagner, Hilda Tellioglu, Ellen Balka, Carla Simone, Luigina Ciolfi, 2009-08-19 This volume presents the proceedings of ECSCW'09, the 11th European Conference on Computer Supported Cooperative Work. Each conference offers an occasion to critically review our research field, which has been multidisciplinary and committed to high scientific standards, both theoretical and methodological, from its beginning. These proceedings represent discussions and contributions to ongoing challenges. One challenge comes from emerging new technologies connected to 'social computing', gaming, as well as applications supporting citizen participation in their communities. As boundaries between home and work erode with the increased movement of work into home environments, and new applications further blur the once separate conceptions of work and leisure, our intellectual community faces challenges in the ways we think about and study work. Other challenges result from transformations of the world of work itself and the role of IT in these. They have been taken up in in-depth studies of design practice, software development, and manufacturing, as well as in the growing body of research on health care contexts and applications. Finally, there is the question of what is the European perspective in our community and whether it is worthwhile to anchor our research more firmly in such a perspective. Of high relevance to our field is the strong grounding of technology development in an understanding of human activity. The nineteen full papers, four short papers and one discussion paper selected for this conference deal with and reflect on some of these challenges, thus representing the lively debate currently ongoing in our field of research.

The US, NATO and Military Burden-Sharing Stephen J. Cimbala, Peter Forster, 2005-10-21 This study establishes that the political, economic and military-technological changes that transform the international system also alter the way in which a state views its and others' responsibilities and burdens for responding to international crises. It assesses the distribution of the costs of raising and supporting arms of service, the risks of deploying them overseas and using them in combat or peace operations, and the extent to which members have a responsibility for maintaining international order in the context of three instances of multinational military intervention: the Multinational Force deployment in Lebanon in 1982-83; the first Persian Gulf War in 1990-91; and the UN and NATO intervention in Bosnia-Herzegovina.

Macular Surgery Andrew Chang, William F. Mieler, Masahito Ohji, 2020-10-30 Recent technological advances in the diagnosis of macular disorders have enhanced our understanding of these diseases. At the same time, advances in small-gauge vitrectomy instrumentation and techniques have improved the safety and efficiency of surgery, allowing macular conditions that would have otherwise resulted in blindness to be treated effectively, preserving patients' sight. Macular surgery continues to evolve rapidly, thanks to exciting future technology trends. This book provides a detailed and up-to-date overview of the field. It begins with essential information on macular anatomy and pathophysiology, examination techniques, and surgical instrumentation. In turn, it discusses a broad range of disease processes, including macular holes, epiretinal membrane, vitreomacular traction and myopic maculopathy. The role and benefits of advanced vitrectomy techniques including submacular surgery, prosthetic vision, robotic surgery, and stem cell and gene therapy are addressed in detail. A review of perioperative care and potential complications rounds out the coverage.

11th International Conference on Cyber Warfare and Security Dr Tanya Zlateva and Professor Virginia Greiman, 2016 The 11th International Conference on Cyber Warfare and Security (ICCWS 2016) is being held at Boston University, Boston, USA on the 17-18th March 2016. The Conference Chair is Dr Tanya Zlateva and the Programme Chair is Professor Virginia Greiman, both from Boston University. ICCWS is a recognised Cyber Security event on the International research conferences calendar and provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual and empirical advances in the area of Cyber Warfare and Cyber Security. It provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and expanding range of Cyberwar and Cyber Security research available to them. The keynote speakers for the conference are Daryl Haegley from the Department of Defense (DoD), who will address the topic Control Systems Networks...What's in Your Building? and Neal Ziring from the National Security Agency who will be providing some insight to the issue of Is Security Achievable? A Practical Perspective. ICCWS received 125 abstract submissions this year. After the double blind, peer review process there are 43 Academic Research Papers 8 PhD papers Research papers, 7 Masters and 1 work-in-progress papers published in these Conference Proceedings. These papers represent work from around the world, including: Australia, Canada, China, Czech Republic, District of Columbia, Finland, France, Israel, Japan, Lebanon, Netherlands, Pakistan, Russian Federation, Saudi Arabia, South Africa, Turkey, United Arab Emirates, UK, USA.

Management Accounting for Business Decisions 1e Will Seal, 2011-02-16 Written with the decision maker in mind, this new text from Professor Will Seal, author of the highly successful Management Accounting, takes a practical, real-world approach to the subject. Suitable for one or two semester courses, the text is aimed at both specialist and non-specialist students at an introductory

level. The book provides concise and manageable coverage of key topics and theory, and is supported by contemporary examples from both the manufacturing and services industries, ensuring it is relevant and engaging to both today's students and tomorrow's decision makers.

The Dynamics of European Security Cooperation, 1945-91 Gülnur Aybet, 2016-01-12 This is the first integrated analysis of all aspects of security cooperation in western Europe from 1945 to 1991. It provides an accessible yet sophisticated survey of the wider dynamics of security cooperation in each decade throughout this period. It covers all aspects of security cooperation, which range from the political - such as a 'European' voice in arms control, to military - such as a 'European' input into NATO strategy, and economic - involving collaboration in defence technology and production.

Human Interface and the Management of Information. Interacting with Information Gavriel Salvendy, Michael J. Smith, 2011-06-27 This two-volume set LNCS 6771 and 6772 constitutes the refereed proceedings of the Symposium on Human Interface 2011, held in Orlando, FL, USA in July 2011 in the framework of the 14th International Conference on Human-Computer Interaction, HCII 2011 with 10 other thematically similar conferences. The 137 revised papers presented in the two volumes were carefully reviewed and selected from numerous submissions. The papers accepted for presentation thoroughly cover the thematic area of human interface and the management of information. The 62 papers of this second volume address the following major topics: access to information; supporting communication; supporting work, collaboration; decision-making and business; mobile and ubiquitous information; and information in aviation.

Ending Autocracy, Enabling Democracy Robert I. Rotberg, 2004-05-13 In this comprehensive narrative of the political and economic evolution of Africa, Robert I. Rotberg explains the critical events, players and policies in the continent's tumultuous shift toward democracy. The book reviews the process of decolonization throughout the continent--and subsequent debut of democracy and authoritarianism--the transition of settler-run Rhodesia into African Zimbabwe, and the battle for Southern Africa. Rotberg then traces the epic struggle to free South Africa from the yoke of apartheid, including the contributions of leaders such as Nelson Mandela. He concludes with a look at how current developments will affect Africa's continuing transition to democratic rule into the 21st century. The book includes a collection of Rotberg's best opinion pieces and analytical articles from 40 years of reporting on Africa's democratic efforts.

Harold E. Stassen Alec Kirby, John F. Rothmann, 2012-12-18 In 1938 Harold E. Stassen was elected governor of Minnesota at age 31, an office he resigned in 1943 to enter the United States Navy at the height of World War II. In the postwar years he helped write the charter of the United Nations and, serving in the Eisenhower administration, very nearly achieved a nuclear test ban treaty with the Soviet Union. He is famously known as a perennial candidate for the Republican Party nomination for president, seeking it 10 times between 1944 and 1992.

Rights in Exile Guglielmo Verdirame, Barbara E. Harrell-Bond, 2005 Of the estimated 12 million refugees in the world, more than 7 million have been confined to camps, effectively warehoused, in some cases, for 10 years or more. Holding refugees in camps was anathema to the founders of the refugee protection regime. Today, with most refugees encamped in the less developed parts of the world, the humanitarian apparatus has been transformed into a custodial regime for innocent people. Based on rich ethnographic data, Rights in Exile exposes the gap between human rights norms and the mandates of international organisations, on the one hand, and the reality on the ground, on the other. It will be of wide interest to social scientists, and to human rights and international law scholars. Policy makers, donor governments and humanitarian organizations, especially those adopting a rights-based approach, will also find it an invaluable resource. But it is the refugees themselves who could benefit the most if these actors absorb its lessons and apply them. Guglielmo Verdirame is a Lecturer in Law at the University of Cambridge and a Fellow of Corpus Christi College. He is also the author of a forthcoming book on the accountability of the United Nations. Barbara Harrell-Bond, Founding director of the Refugee Studies Centre, University of Oxford, has, after retirement, been Visiting Professor at Makerere University and at the American University in Cairo. In 1996, she received the Distinguished Service Award of the American Anthropological Association. She is the author of Imposing Aid (Oxford, 1986).

Share the Wealth! Jonathan Gauvin, Angella MacEwen, 2021-05-25 Canada is a rich country getting richer. But over the past 20 years, a huge portion of the country's wealth increase has gone to a small handful of the super-rich. Canada's one per cent have seen their share of Canada's wealth grow by almost six times since 1999 to \$2,203,000,000,000 USD today. Meanwhile, half of all Canadian families experience income insecurity and can't get the support they need from ever-shrinking public services. Canada's super-rich gained \$76 billion during the 12 months after COVID-19 hit. Canadians are ready for measures that would distribute wealth more fairly, and give governments the funds to pay for pharmacare, improve long-term care, take serious climate action, implement paid sick leave and more. But the Liberal government took no serious measures in its 2021 budget to tackle this issue. Policy experts Jonathan Gauvin and Angella MacEwen show exactly how Canada's wealth can be more fairly shared with measures that would impact only the one per cent: a wealth tax, higher taxes on the highest incomes, higher taxes on large corporations and higher taxes on big

profits coming from capital gains. They also propose measures to shut down tax loopholes and tax havens and to tax web giants. This book shows how we can share the wealth so everyone will be better off — even the richest.
