**Shared Minds** Michael Schrage,1990 Explores the role of tools and technologies in shaping the collaborative process.

**Information Wants to Be Shared** Joshua Gans,2012-10-02 Stewart Brand famously declared, “Information wants to be free.” Except he didn’t (not really). And it doesn’t. Information is much more complicated than that. What information really wants—what makes it more valuable, useful, and immediate, Joshua Gans argues—is to be shared. Using the tools and logic of information economics, Gans shows how sharing enhances most information’s value. He also shows how the business models of traditional media companies, gatekeepers who have relied on scarcity and control, have collapsed in the face of new technologies. Equally important, he argues that sharing can revive moribund, threatened industries even as he examines platforms that have, almost accidentally, thrived in this new environment. Provocative, intriguing, and useful, Information Wants to Be Shared will change the way you think about your ideas and the media you use to consume and produce them. HBR Singles provide brief yet potent business ideas, in digital form, for today's thinking professional.

*Learning in School-University Partnership* Amy B.M. Tsui,Gwyn Edwards,Fran Lopez-Real,Tammy Kwan,Doris Law,Philip Stimpson,Rosina Tang,Albert Wong,2008-10-20 This volume looks at school-university partnerships from sociocultural perspectives of learning that view participation in social practice as fundamental to the process of learning. Its two major themes – school-university partnership and sociocultural and social theories of learning – have both been treated extensively in the literature. It is the bringing together of these two themes that makes this book unique. In this examination of an evolving model of school-university partnership, the Unified Professional Development Project in Hong Kong, the authors analyze the learning that takes place as the participants (student-teachers, mentor teachers, and university supervisors) mutually engage in the enterprise of improving teaching and learning in schools, developing shared practices, and creating new communities of practice. Although it describes one specific context, the book is not just about this locale. Rather, the Unified Professional Development Project is used as a context for theorizing more generally a social theory of learning for school-university partnerships that is relevant to any other similar context. This book will interest teacher educators, researchers in teacher education and teacher development, policy makers, and school practitioners who are involved in school-university partnerships.

**Lessons from Restructuring Experiences** Nancy E. Hoffman,W. Michael Reed,Gwen Socol Rosenbluth,1997-06-30 Lessons from Restructuring Experiences describes the process of collaborative educational reform in the context of the professional development school model. First-person stories and literature reviews show how reformed schools and universities look and assess the impact of such reform on students, teachers, and colleges of education. Intended for readers interested in establishing or assessing collaborative reform efforts, the book is organized in three units. The first provides an overview that will enhance readers' understanding of professional development schools and school restructuring. The authors review and highlight important concepts and processes in collaborative restructuring. The second unit brings the concepts and processes of collaborative change to life by sharing the stories of teachers and administrators in elementary and secondary professional development schools. The third unit addresses the complex issue of assessing the outcomes of restructuring in both schools and the university.

*Information Technology for Knowledge Management* Uwe M. Borghoff,Remo Pareschi,2013-03-14 As we approach the beginning of the 21 st century, we are beginning to see the emergence of knowledge management as a natural evolution of the focus and importance of quality in the 1980s and reengineering in the 1990s. Quality placed a huge emphasis on getting all employees to use their brainpower better. Reengineering emphasized the use of technology to streamline business processes and take out costs. With the lessons of quality and reengineering firmly embedded in our everyday operations (continual cost containment and higher quality is a way of life), businesses are now turning their attention to growth. Growth is a common pursuit. Customers are calling for it. Financial markets are calling for it. Employees are asking for it because they want an exciting and stimulating environment in which to work. If a business doesn't grow, it will eventually die because knowledge workers of the 21 st century won't want to work with or for a business that's not growing. Skilled workers have plenty of options to choose from as demand for knowledge workers escalates around the world.

**Shared Reality** E. Tory Higgins,2019-06-04 What does it mean to be human? Why do we feel and behave in the ways that we do? The classic answer is that we have a special kind of intelligence. But to understand what we are

as humans, we also need to know what we are like motivationally. And what is central to this story, what is special about human motivation, is that humans want to share with others their inner experiences about the world--share how they feel, what they believe, and what they want to happen in the future. They want to create a shared reality with others. People have a shared reality together when they experience having in common a feeling about something, a belief about something, or a concern about something. They feel connected to another person or group by knowing that this person or group sees the world the same way that they do--they share what is real about the world. In this work, Dr. Higgins describes how our human motivation for shared reality evolved in our species, and how it develops in our children as shared feelings, shared practices, and shared goals and roles. Shared reality is crucial to what we believe--sharing is believing. It is central to our sense of self, what we strive for and how we strive. It is basic to how we get along with others. It brings us together in fellowship and companionship, but it also tears us apart by creating in-group bubbles that conflict with one another. Our shared realities are the best of us, and the worst of us.

**Nonacademic Writing** Ann Hill Duin,Craig J. Hansen,2013-11-05 In this volume, methodological, cultural, technological, and political boundaries felt by writers are analyzed, translated, and challenged in a way that will appeal to researchers, theorists, graduate students, instructors, and managerial audiences. Instead of extracting rules from previous research, the contributors, working from multidisciplinary perspectives, describe and analyze the social and technological contexts surrounding nonacademic writing. Their essays present a formative rather than summative outlook toward future research on nonacademic writing. Collectively, these chapters articulate a unique perspective toward nonacademic writing that considers: \* The centrality of emerging communications technologies in nonacademic writing research and the need for a socio-technological perspective. New technologies reshape the concept of text and significantly impact the writing process and written products in nonacademic settings. \* The relationship between the academy and the workplace. A number of chapters challenge us -- sometimes from opposing perspectives -- to scrutinize our role as writing educators in preparing students for the workplace. Should we support the interests of corporate employers, or should we resist those interests? Should we enculturate students in workplace writing practices by placing them in these environments, or should we examine the tacit knowledge gained by workplace professionals and deliver this via classroom instruction? \* New theory, new research agendas. Contributors from diverse fields offer new theoretical lenses or use established lenses in innovative ways, expanding the agenda for nonacademic writing research. This volume represents the vision the social landscape demands for research and pedagogy in nonacademic writing.

**Emotional Mimicry in Social Context** Ursula Hess,Agneta H. Fischer,2016-03-11 Emotional mimicry has important social functions such as signalling affiliative intent and fostering rapport, and is considered one of the cornerstones of successful interactions. This multidisciplinary overview of research into emotional mimicry and empathy explores when, how and why emotional mimicry occurs.

**Scattered Minds** Gabor Maté, MD,2023-02-07 From renowned mental health expert and speaker Dr. Gabor Maté, *Scattered Minds* explodes the myth of attention deficit disorder (ADD/ADHD) as genetically based—and offers real hope and advice for children and adults who live with the condition. In this breakthrough guide to understanding, treating, and healing Attention Deficit Disorder, Dr. Gabor Maté, bestselling author of *The Myth of Normal*, and himself diagnosed with ADD: Demonstrates that the condition is not a genetic “illness” but a response to environmental stress Explains that in ADD, circuits in the brain whose job is emotional self-regulation and attention control fail to develop in infancy – and why Shows how ‘distractibility’ is the psychological product of life experience Allows parents to understand what makes their ADD children tick, and adults with ADD to gain insights into their emotions and behaviors Expresses optimism about neurological development even in adulthood Presents a program of how to promote this development in both children and adults Whereas other books on the subject describe the condition as inherited, Dr. Maté believes that our social and emotional environments play a key role in both the cause of and cure for this condition. In *Scattered Minds*, he describes the painful realities of ADD and its effect on children as well as on career and social paths in adults. While acknowledging that genetics may indeed play a part in predisposing a person toward ADD, Dr. Maté moves beyond that to focus on the things we can control: changes in environment, family dynamics, and parenting choices. He draws heavily on his own experience with the disorder, as both an ADD sufferer and the parent of diagnosed children. Providing a thorough overview of ADD and its treatments, without blaming anyone, *Scattered Minds* is essential and life-changing reading for the millions of ADD sufferers in North America today.

**Analyzing Art, Culture, and Design in the Digital Age** Mura, Gianluca,2015-09-23 Technological advancements have influenced many fields of study, and the visual arts are no exception. **Law in a Digital World** M. Ethan Katsh,1995 The world of law is a world of information. Rules, judgments, decisions, interpretations, and agreements all involve using and communicating information. Today, we are experiencing a significant transition, from letters fixed on paper to information stored electronically. The digital era, where information is created, stored, and communicated electronically, is quickly approaching, if not already here. The future of law will no longer be found in impressive buildings and leather-bound books, but in small pieces of silicon, in streams of light, and in millions of miles of wires and cable. It will be a world of new relationships and greater possibilities for individual and group communication, an environment where the value of information increases as it is shared. In *Law in a Digital world*, M. Ethan Katsh explores how these new technologies will alter one of our most central institutions. He considers the different ways in which people will not only electronically read and write, but also interact with our vast storehouses of legal knowledge and information. He envisions how sounds and pictures will play into the largely imageless print world of law, and looks at the future importance of graphic and nontextual communication. He explores how the flexible, personalized organization of data will transform the way we gather information, and whether information can or cannot be contained, raising questions of copyright and privacy. What happens to the law when information is more plentiful and accessible? What happens to those people who suddenly have access to information never before available? Does the use of information in a new form change the institution, the user, and those who come in contact with the user? And, what role does the lawyer play in all of this? For

citizens, for lawyers, for all those who will be part of the digital world rushing toward us, Katsh answers these questions while considering the implications of this new era.
