No Shelf Required American Library Association,2011 Sue Polanka brings together a variety of professionals to share their expertise about e-books with librarians and publishers. Providing forward-thinking ideas while remaining grounded in practical information that can be implemented in all kinds of libraries, the topics explored include an introduction to e-books and their different types, an overview of their history and development, e-book technology, why e-books are good for learning, and how librarians can market them to a wide range of users.--[back cover]

Slides for Students Gary D. Fisk,2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that.Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

Improving Outcomes with Clinical Decision Support Jerome. A Osherooff,Jonathan M Teich,Donald Levick,Luis Saldana,Ferdinand Velasco,Dean F Sittig,Kendall M Rogers,Robert A Jenders,2021-02-28 Winner of the 2012 HIMSS Book of the Year Award! Co-published by HIMSS, the Scottsdale Institute, AMIA, AMDIS and SHM, this second edition of the authoritative guide to CDS implementation has been substantially enhanced with expanded and updated guidance on using CDS interventions to improve care delivery and outcomes. This edition has been reorganized into parts that help readers set up (or refine) a successful CDS program in a hospital, health system or physician practice; and configure and launch specific CDS interventions. Two detailed case studies illustrate how a real-life CDS program and specific CDS interventions might evolve in a hypothetical community hospital and small physician practice. This updated edition includes enhanced worksheets--with sample data--that help readers to document and use information needed for their CDS program and interventions. Sections in each chapter present considerations for health IT software suppliers to effectively support their CDS implementer clients.

Leading Change in Academic Libraries Catherine Cardwell,2020 Institutions of higher education and academic libraries are not the traditional organizations they once were. They are subject to a variety of forces, including shifting and changing populations, technological changes, public demands for affordability and accountability, and changing approaches to research and learning. Academic libraries can no longer establish their excellence and ground their missions, visions, and strategic directions using the old means and methods. Leading Change in Academic Libraries is a collection of 20 change stories authored by academic librarians from different types of four-year institutions. Librarians tell the story firsthand of how they managed major change in processes, functions, services, programs, or overall organizations using John Kotter's Eight-Stage Process of Creating Major Change as a framework for examining change at their institutions, measuring their successes and areas for improvement, and determining progress. In five sections--strategic planning, reorganization, culture change, new roles, and technological change--chapters discuss tackling common challenges such as fear, anxiety, change fatigue, complacency, unexpected changes of leadership, vacancies, and resistance; look at the results of their tactics; and provide effective practices they found. Each section ends with a thorough analysis of the stories within and the most effective tips for leading that kind of change. Leading Change in Academic Libraries can help you establish flexible, nimble, and collaborative decision-making processes, and facilitate the transition from legacy collections-based libraries to forward-looking service-based libraries--from the ALA website.

Getting Things Done David Allen,2015-03-17 The book Lifehack calls The Bible of business and personal productivity. A completely revised and updated edition of the blockbuster bestseller from 'the personal productivity guru'—Fast Company Since it was first published almost fifteen years ago, David Allen's Getting Things Done has become one of the most influential business books of its era, and the ultimate book on personal organization. "GTD" is now shorthand for an entire way of approaching professional and personal tasks, and has spawned an entire culture of websites, organizational tools, seminars, and offshoots. Allen has rewritten the book from start to finish, tweaking his classic text with important perspectives on the new workplace, and adding material that will make the book fresh and relevant for years to come. This new edition of Getting Things Done will be welcomed not only by its hundreds of thousands of existing fans but also by a whole new generation eager to adopt its proven principles.

Transforming Education. Empowering the Students of Today to Create the World of Tomorrow Dof Dickinson,2018-05-18 This guide provides an inspiration and a vision for school leaders. It draws on two decades of global research, data, and experiences, taking an unflinching look at what works, and what doesn't in learning transformation. The result is a short-cut to success. Key concepts, red flags, and powerful questions designed to support transformation at systemic and school level. With insights from thought leaders to align school stakeholders with modern educational thinking. You'll also find practical help in the form of roadmaps and checklists, as well as recommendations on using technology to teach the future-ready skills that are so vital to today's young people and the success of nations in a global economy. Every school leader should take time to look through

this book before attempting transformational change. It is startling, uncomfortable at times, but it rewards you with a solid foundation on which to move forward.

Intrusion Detection Honeypots Chris Sanders,2020-09 The foundational guide for using deception against computer network adversaries.When an attacker breaks into your network, you have a home-field advantage. But how do you use it?Intrusion Detection Honeypots is the foundational guide to building, deploying, and monitoring honeypots -- security resources whose value lies in being probed and attacked. These fake systems, services, and tokens lure attackers in, enticing them to interact. Unbeknownst to the attacker, those interactions generate logs that alert you to their presence and educate you about their tradecraft. Intrusion Detection Honeypots teaches you how to: Use the See-Think-Do framework to integrate honeypots into your network and lure attackers into your traps, leverage honey services that mimic HTTP, SSH, and RDP, hide honey tokens amongst legitimate documents, files, and folders, entice attackers to use fake credentials that give them away, create honey commands, honey tables, honey broadcasts, and other unique detection tools that leverage deception, and monitor honeypots for interaction and investigate the logs they generate.With the techniques in this book, you can safely use honeypots inside your network to detect adversaries before they accomplish their goals.
