The Framework of Hemisphere Defense Stetson Conn, Byron Fairchild, 2002-08-01 Self-preservation and military measures to insure the territory of the United States against violation by foreign powers - the subject of this book - ceased to be of serious concern to the United States Government and nation during the nineteenth century. In World War I, the Americans concentrated on the offensive. In World War II, as the authors of this book remark in their Preface, we passed to the offensive so soon and with such force after the United States became engaged that the military provisions for defense have been obscured from view.

Asian Economic Integration in an Era of Global Uncertainty Shiro Armstrong, Tom Westland, 2018-01-08 The Pacific Trade and Development (PAFTAD) conference series has been at the forefront of analysing challenges facing the economies of East Asia and the Pacific since its first meeting in Tokyo in January 1968. The 38th PAFTAD conference met at a key time to consider international economic integration. Earlier in the year, the people of the United Kingdom voted to leave the European Union and the United States elected Donald Trump as their next president on the back of an inward-looking 'America First' promise. Brexit and President Trump represent a growing, and worrying, trend towards protectionism in the North Atlantic countries that have led the process of globalisation since the end of the Second World War. The chapters in the volume describe the state of play in Asian economic integration but, more importantly, look forward to the region's future, and the role it might play in defending the global system that has underwritten its historic rise. Asia has the potential to stand as a bulwark against the dual threats of North Atlantic protectionism and slowing trade growth, but collective leadership will be needed regionally and difficult domestic reforms will be required in each country.

This second edition includes updated pedagogical features, timely discussions of student assessment, state standards (including NCLB), and an expanded focus that incorporates the needs of Early Childhood, Elementary, and Secondary teachers.

Critical Psychiatry D. Double, 2006-07-12 Psychiatry is increasingly dominated by the reductionist claim that mental illness is caused by neurobiological abnormalities. Critical psychiatry disagrees with this and proposes a more ethical foundation for practice. This book describes an original framework for renewing mental health services in alliance with people with mental health problems.

Secret Aerospace Projects of the U. S. Navy Jared A. Zichek, 2009 This is the comprehensive story of some of the most radical attack aircraft ever designed to operate from an aircraft carrier. These incredible projects were developed in 1948 to equip the USS United States, an immense 65,000-ton supercarrier that was to have been the core of the Navy's nascent strategic nuclear bombardment capability. Legendary aerospace companies such as Convair, Curtiss-Wright, Douglas, Fairchild, Lockheed, Martin, North American, Northrop, and Republic would each submit proposals to the competitions. Varying widely in appearance, these studies ranged from Douglas's relatively small and modern Model 593 to their unconventional Model 1186 series, which was inspired by the X-3 Stiletto and featured a small parasite aircraft mounted atop a gigantic missile. Recently declassified, details of these fascinating projects are presented here for the first time. ILLUSTRATIONS 200 b/w images

Geological Atlas of Africa Thomas Schlüter, 2008-04-19 This atlas is intended primarily for anybody who is in some background for the arrangement of how the terrestrial basic geology of Africa. Its originality lies in the fact that the regional geology of each African country or territory is reviewed country-wise by maps for a fuller appreciation of why this work in Africa is and text, a view normally not presented in textbooks worth doing. Chapter 3 provides an executive summary of regional geology. It is my belief, that there has long been a need in universities and geological surveys, both in Africa and in the developed world, for summarizing geological maps and an accompanying basic alphabetical order each African country or territory text utilising the enormous fund of knowledge that is presented by a digitized geological overview map has been accumulated since the beginning of geological and an accompanying text on its respective stratigraphical research in Africa in the mid-19 century. I hope that, in part, the present atlas may satisfy this need. A short list of relevant references is also added.

Nonlinear Stochastic Problems S. Bucy,J.M.F Moura,1983-05-31 This volume corresponds to the invited lectures and advanced research papers presented at the NATD Advanced Study Institute on Nonlinear Stochastic Problems with emphasis on Identification, Signal Processing, Control and Nonlinear Filtering held in Algarve (Portugal), on May 1982. The book is a blend of theoretical issues, algorithmic implementation aspects, and application examples. In many areas of science and engineering, there are problems which are intrinsically nonlinear and stochastic in nature. Clear examples arise in identification and modeling, signal processing, nonlinear filtering, stochastic and adaptive control. The meeting was organized because it was felt that there is a need for discussion of the methods and philosophy underlying these different areas, and in order to communicate those approaches that have proven to be effective. As the computational technology progresses, more general approaches to a number of problems which have been treated previously by linearization and perturbation methods become feasible and rewarding.
