Crocodile Rescue! (Wild Survival #1) Melissa

Cristina Márquez, 2021-02-02 For fans of The Trail, Out of My Shell, and The Honest Truth, Wild Survival is the story of a girl finding her voice . . . and fighting for survival. Twelve-year-old Adrianna Villalobos and her older brother Feye travel the globe with their parents, the hosts of a suspenseful nature show called Wild Survival! The show features daring animal rescues and the work the family does at their animal sanctuary. They've recently gotten an offer to take the show from YouTube to a TV network, and Adrianna is thrilled. So far, she's always been behind the scenes, but now she gets to join the rest of her family onscreen. She can't wait to bring her passion for animals to a wide audience. Their first stop is the lush mangrove forests of Cuba, where they're going to help rescue an injured crocodile. But things get off to a rocky start when Feye is injured in an accident partially caused by Adrianna. The status of the show is in jeopardy, and Adrianna's parents want her back behind the scenes, or maybe even back at home. Adrianna is determined to prove herself, and save the show—whatever it takes. Even if that means confronting the legendary Mega Croc of Cuba that's rumored to inhabit the murky waters around their base camp. Based on the author's real-life wildlife encounters, this middle-grade series will include real animal facts, light illustration of the creatures mentioned in each book, and an Author's Note from Melissa.

Sharks and People Thomas P. Peschak, 2014-02-27

At once feared and revered, sharks have captivated people since our earliest human encounters. Children and adults alike stand awed before aquarium shark tanks, fascinated by the giant teeth and unnerving eyes. And no swim in the ocean is undertaken without a slight shiver of anxiety about the very real—and very cinematic—dangers of shark bites. But our interactions with sharks are not entirely one-sided: the threats we pose to sharks through fisheries, organized hunts, and gill nets on coastlines are more deadly and far-reaching than any bite. In *Sharks and People* acclaimed wildlife photographer Thomas Peschak presents stunning photographs that capture the relationship between people and sharks around the globe. A contributing photographer to *National Geographic*, Peschak is best known for his unusual photographs of sharks—his iconic image of a great white shark following a researcher in a small yellow kayak is one of the most recognizable shark photographs in the world. The other images gathered here are no less riveting, bringing us as close as possible to sharks in the wild. Alongside the photographs, *Sharks and People* tells the compelling story of the natural history of sharks. Sharks have roamed the oceans for more than four hundred million years, and in this time they have never stopped adapting to the ever-changing world—their unique cartilage skeletons and array of super-senses mark them as one of the most evolved groups of animals. Scientists have recently discovered that sharks play an important role in balancing the ocean, including maintaining the health of coral reefs. Yet, tens of millions

of sharks are killed every year just to fill the demand for shark fin soup alone. Today more than sixty species of sharks, including hammerhead, mako, and oceanic white-tip sharks, are listed as vulnerable or in danger of extinction. The need to understand the significant part sharks play in the oceanic ecosystem has never been so urgent, and Peschak's photographs bear witness to the thrilling strength and unique attraction of sharks. They are certain to enthrall and inspire.

Steps to an Ecology of Mind Gregory Bateson, 2000
Gregory Bateson was a philosopher, anthropologist, photographer, naturalist, and poet, as well as the husband and collaborator of Margaret Mead. This classic anthology of his major work includes a new Foreword by his daughter, Mary Katherine Bateson. 5 line drawings.

Rays of the World Peter Last, Gavin Naylor, Bernard Séret, William White, Marcelo de Carvalho, Matthias Stehmann, 2016-12
Rays are among the largest fishes and evolved from shark-like ancestors nearly 200 million years ago. They share with sharks many life history traits: all species are carnivores or scavengers; all reproduce by internal fertilisation; and all have similar morphological and anatomical characteristics, such as skeletons built of cartilage. *Rays of the World* is the first complete pictorial atlas of the world's ray fauna and includes information on many species only recently discovered by scientists while undertaking research for the book. It includes all 26 families and 633 valid named species of rays, but additional undescribed species exist for many groups. *Rays of the World*

features a unique collection of paintings of all living species by Australian natural history artist Lindsay Marshall, compiled as part of a multinational research initiative, the Chondrichthyan Tree of Life Project. Images sourced from around the planet were used by the artist to illustrate the fauna. This comprehensive overview of the world's ray fauna summarises information such as general identifying features and distributional information about these iconic, but surprisingly poorly known, fishes. It will enable readers to gain a better understanding of the rich diversity of rays and promote wider public interest in the group. Rays of the World is an ideal reference for a wide range of readers, including conservationists, fishery managers, scientists, fishers, divers, students and book collectors.

The Uninhabitable Earth David Wallace-Wells, 2019-02-19 #1 NEW YORK TIMES BESTSELLER • "The Uninhabitable Earth hits you like a comet, with an overflow of insanely lyrical prose about our pending Armageddon."—Andrew Solomon, author of *The Noonday Demon* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY *The New Yorker* • *The New York Times* Book Review • *Time* • NPR • *The Economist* • *The Paris Review* • *Toronto Star* • *GQ* • *The Times Literary Supplement* • *The New York Public Library* • *Kirkus Reviews* It is worse, much worse, than you think. If your anxiety about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible—food shortages, refugee emergencies, climate wars and economic devastation. An "epoch-

defining book" (The Guardian) and "this generation's Silent Spring" (The Washington Post), The Uninhabitable Earth is both a travelogue of the near future and a meditation on how that future will look to those living through it—the ways that warming promises to transform global politics, the meaning of technology and nature in the modern world, the sustainability of capitalism and the trajectory of human progress. The Uninhabitable Earth is also an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation—today's.

LOGLISTED FOR THE PEN/E.O. WILSON LITERARY SCIENCE WRITING AWARD

"The Uninhabitable Earth is the most terrifying book I have ever read. Its subject is climate change, and its method is scientific, but its mode is Old Testament. The book is a meticulously documented, white-knuckled tour through the cascading catastrophes that will soon engulf our warming planet."—Farhad Manjoo, The New York Times

"Riveting. . . . Some readers will find Mr. Wallace-Wells's outline of possible futures alarmist. He is indeed alarmed. You should be, too."—The Economist

"Potent and evocative. . . . Wallace-Wells has resolved to offer something other than the standard narrative of climate change. . . . He avoids the 'eerily banal language of climatology' in favor of lush, rolling prose."—Jennifer Szalai, The New York Times

"The book has potential to be this generation's Silent Spring."—The Washington Post

"The Uninhabitable Earth, which has become a best seller, taps into

the underlying emotion of the day: fear. . . . I encourage people to read this book.”—Alan Weisman, The New York Review of Books

The Nature Fix: Why Nature Makes Us Happier, Healthier, and More Creative Florence

Williams, 2017-02-07 Highly informative and remarkably entertaining. —Elle From forest trails in Korea, to islands in Finland, to eucalyptus groves in California, Florence Williams investigates the science behind nature’s positive effects on the brain. Delving into brand-new research, she uncovers the powers of the natural world to improve health, promote reflection and innovation, and strengthen our relationships. As our modern lives shift dramatically indoors, these ideas—and the answers they yield—are more urgent than ever.

Fishes of the Open Ocean Julian G.

Pepperell, 2010-01-01 QLD Premier's Book Awards -- Shortlisted Science Writer Award Awarded a 2010 Whitley Certificate of Commendation for Natural History The largest, swiftest, highest-leaping, fastest-growing and most migratory fishes on the planet all live in the open ocean. Beautifully adapted to their world, they range from tiny drift fish and slow plankton-straining whale sharks to high-energy, streamlined predators such as tuna and marlin. *Fishes of the Open Ocean*, from Julian Pepperell, one of Australia's best-known marine

biologists and world authority on oceanic fishes, is the first book to describe these fishes and detail their biology and the complex, often fragile world in which they live. This unique guide covers all major species including tuna, marlin, swordfish and pelagic sharks, as well as lesser-known ones such as flying fish, lancetfish, sunfish, pomfret, opah, louvar, fanfish and basking sharks.

The Chinese Navy Institute for National Strategic Studies,2011-12-27 Tells the story of the growing Chinese Navy - The People's Liberation Army Navy (PLAN) - and its expanding capabilities, evolving roles and military implications for the USA. Divided into four thematic sections, this special collection of essays surveys and analyzes the most important aspects of China's navel modernization.

Hey Long Island... Do U Remember? Stacy Mandel Kaplan, Kimberly Towers, Scott J. Mandel, Jordan Kaplan, 2022-04-30 Hey Long Island . . . Do U Remember? began in 2008 when two lifelong friends from Oceanside, New York started a Facebook group to share pictures and history of Long Island's iconic places, themes and landmarks. Hey Long Island . . . Do U Remember? is now one of the largest New York history groups on Facebook with

more than 142,000 members sharing pictures and information about Long Island's colourful past. Hey Long Island . . . Do U Remember? offers us a window into the past, showing life as it was then, and stirring in us the emotions of wonder and curiosity about those who have gone before us and the lives they lived. With more than 130 photographs, many of them seen here for the first time, Hey Long Island... Do U Remember? offers a stunning portrait of this one-of-a-kind place.

Working Backwards Colin Bryar, Bill Carr, 2021-02-09 *Working Backwards* is an insider's breakdown of Amazon's approach to culture, leadership, and best practices from two long-time Amazon executives—with lessons and techniques you can apply to your own company, and career, right now. In *Working Backwards*, two long-serving Amazon executives reveal the principles and practices that have driven the success of one of the most extraordinary companies the world has ever known. With twenty-seven years of Amazon experience between them—much of it during the period of unmatched innovation that created products and services including Kindle, Amazon Prime, Amazon Studios, and Amazon Web Services—Bryar and Carr offer unprecedented access to the Amazon way as it was developed and proven to be repeatable, scalable, and adaptable. With keen analysis and practical steps for applying it at your own company—no matter the size—the authors illuminate how Amazon's fourteen leadership principles inform decision-making at all levels of the company. With a focus on customer obsession, long-term thinking, eagerness to invent, and operational excellence,

Amazon's ground-level practices ensure these characteristics are translated into action and flow through all aspects of the business. Working Backwards is both a practical guidebook and the story of how the company grew to become so successful. It is filled with the authors' in-the-room recollections of what "Being Amazonian" is like and how their time at the company affected their personal and professional lives. They demonstrate that success on Amazon's scale is not achieved by the genius of any single leader, but rather through commitment to and execution of a set of well-defined, rigorously-executed principles and practices—shared here for the very first time. Whatever your talent, career or organization might be, find out how you can put Working Backwards to work for you.

Rules of Play Katie Salen Tekinbas, Eric Zimmerman, 2003-09-25 An impassioned look at games and game design that offers the most ambitious framework for understanding them to date. As pop culture, games are as important as film or television—but game design has yet to develop a theoretical framework or critical vocabulary. In Rules of Play Katie Salen and Eric Zimmerman present a much-needed primer for this emerging field. They offer a unified model for looking at all kinds of games, from board games and sports to computer and video games. As active participants in game culture, the authors have written Rules of Play as a catalyst for innovation, filled with new concepts, strategies, and methodologies for creating and understanding games. Building an aesthetics of interactive systems, Salen and

Zimmerman define core concepts like play, design, and interactivity. They look at games through a series of eighteen game design schemas, or conceptual frameworks, including games as systems of emergence and information, as contexts for social play, as a storytelling medium, and as sites of cultural resistance. Written for game scholars, game developers, and interactive designers, *Rules of Play* is a textbook, reference book, and theoretical guide. It is the first comprehensive attempt to establish a solid theoretical framework for the emerging discipline of game design.

The Chinatown Death Cloud Peril Paul
Malmont, 2007-06-05 Set in the colorful world of
the 1930s and peopled with writers H.P. Lovecraft,
L. Ron Hubbard, Lester Dent, and Walter Gibson,
this swashbuckling literary thriller propels the
characters into a genuine pulp adventure in which
they try to thwart a madman intent on creating a

Giant Molecules A. I?U. Grosberg, A. R.
Khokhlov, Pierre-Gilles de Gennes, 2011 ?? Giant
molecules are important in our everyday life. But,
as pointed out by the authors, they are also
associated with a culture. What Bach did with the
harpsichord, Kuhn and Flory did with polymers. We
owe a lot of thanks to those who now make this
music accessible ?? Pierre-Gilles de Gennes Nobel
Prize laureate in Physics (Foreword for the 1st
Edition, March 1996) This book describes the basic
facts, concepts and ideas of polymer physics in
simple, yet scientifically accurate, terms. In
both scientific and historic contexts, the book
shows how the subject of polymers is fascinating,
as it is behind most of the wonders of living cell
machinery as well as most of the newly developed

materials. No mathematics is used in the book beyond modest high school algebra and a bit of freshman calculus, yet very sophisticated concepts are introduced and explained, ranging from scaling and reptations to protein folding and evolution. The new edition includes an extended section on polymer preparation methods, discusses knots formed by molecular filaments, and presents new and updated materials on such contemporary topics as single molecule experiments with DNA or polymer properties of proteins and their roles in biological evolution.

The Arabian Seas: Biodiversity, Environmental Challenges and Conservation Measures Laith A. Jawad, 2021-03-30 The Arabian Seas Marine Region encompasses marine areas from Djibouti to Pakistan, including the northern part of Somalia, the Red Sea, the Arabian/Persian Gulf, and parts of the Arabian Sea. Human pressures on the coastal and marine environments are evident throughout the region, and have resulted in harmful environmental effects. Oil and domestic, urban and industrial pollutants in several areas of this part of the world have caused local habitat degradation, eutrophication and algal blooms. Further, coastal landfill, dredging, and sedimentation, as well as nutrient and sediment runoff from phosphate mining, agriculture and grazing, and reduction in freshwater seepage due to groundwater extraction are all contributing to the degradation of coastal environments. This book discusses aspects not covered in other books on the region, which largely focus on marine biodiversity, and examines several environmental challenges that are often

ignored, but which have a significant impact on the environment. Evaluating the status quo, it also recommends conservation measures and examines the abiotic factors that play a major main role in the environmental changes. Lastly, the book addresses the biodiversity of the area, providing a general context for the conservation and management measures discussed.

The Ocean and Cryosphere in a Changing Climate
Intergovernmental Panel on Climate Change (IPCC), 2022-05-19 The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.

The Jaws Log Carl Gottlieb, 2001 Carl Gottlieb's

account of the making of Steven Spielberg's classic shocker is a compelling insider's story of the making of a film phenomenon. Jaws grossed \$100 million, won 3 Oscars and launched its 26-year-old director. Screenwriter Carl Gottlieb was on board throughout the production process, and chronicled his year-long adventure: a riveting portrait of a famously arduous shoot, complicated by clashing creative temperaments, pressures from the studio, bad weather - and sharks.
