This fascinating volume provides facts and photos about some of the world's most dangerous sharks, including the threatening tiger shark, the ravenous bull shark, and the fierce oceanic whitetip shark. Color photographs give readers an up-close look at these terrors of the deep, while maps and fact boxes show their hunting grounds, size, and other important information.

Meg Steve Alten, 2015-11-03 All New Revised and Expanded! Includes Meg: Origins. Carcharodon megalodon apex predator of all time, the most fearsome creature that ever lived a 70-foot, 60,000 pound Great White Shark. Hundreds of 7-inch serrated teeth filled jaws that could swallow an elephant whole. It could sense its prey miles away, inhaling its scent as it registered the beat of its fluttering heart, and if you ever came close enough to see the monster...it was already too late. For Navy deep-sea submersible pilot Jonas Taylor, it nearly was too late. Years ago, on a top-secret dive seven miles down into the Mariana Trench, Jonas came face to face with an ancient monster everyone believed extinct. Having barely escaped with his life, Jonas must prove to the world that Meg still exists. When an

opportunity to return to the trench presents itself, he takes it, intent on returning topside with a 7-inch tooth! But man's presence in this unexplored domain releases one of the sharks from its purgatory, and now Jonas is the only one who can stop it. Soon to be a major motion picture (Warner Bros.) starring Jason Statham, Ruby Rose, Rainn Wilson, Bingbing Li, and Jessica McNamee.

Sharks of the Deep Mary M. Cerullo, 2015-12-21
Sharks don't deserve the bad press they get, according to diver and photographer Jeff Rotman. Dive with him to the ocean floor to see the sharks and other creatures he calls living sculptures, from stingrays to the unusual wobbegong shark and other fascinating species. Look beyond the headlines and get to know the real story of sharks, their surprising beauty, and the important roles they play in their underwater world.

MEG: A Novel of Deep Terror Steve Alten, 2022-06-21
MEG: A Novel of Deep Terror is the book that launched New York Times bestselling author Steve Alten's franchise and inspired an international blockbuster starring Jason Statham. Seven years ago and seven miles below the surface of the Pacific Ocean, Dr. Jonas Taylor encountered something that changed the course of his life. Once a Navy deep-sea submersible pilot, now a marine paleontologist, Taylor is convinced that a remnant population of Carcharodon megalodon—prehistoric sharks growing up to 70 feet long, that subsisted on whales—lurks at the bottom of the Mariana Trench. Offered the opportunity to return to those crushing depths in search of the Megs, Taylor leaps at the chance...but his quest

for scientific knowledge (and personal vindication) becomes a desperate fight for survival, when the most vicious predator the earth has ever known is freed to once again hunt the surface. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Sharks Mary M. Cerullo, 1993 The word shark triggers the interest of many students. This book describes the physical characteristics, behavior, and varieties of sharks. It dispels common myths about these unusual fish. The full-color photos and the arousing descriptions of sharks won't be a disappointment to even the most reluctant reader.

Emperors of the Deep William McKeever, 2019-06-25 In this remarkable groundbreaking book, a documentarian and conservationist, determined to dispel misplaced fear and correct common misconceptions, explores in-depth the secret lives of sharks—magnificent creatures who play an integral part in maintaining the health of the world's oceans and ultimately the planet. From the Jaws blockbusters to Shark Week, we are conditioned to see sharks as terrifying cold-blooded underwater predators. But as Ocean Guardian founder William McKeever reveals, sharks are evolutionary marvels essential to maintaining a balanced ecosystem. We can learn much from sharks, he argues, and our knowledge about them continues to grow. The first book to reveal in full the hidden lives of sharks, *Emperors of the Deep* examines four species—Mako, Tiger, Hammerhead, and Great White—as never before, and includes fascinating details such as: Sharks are

50-million years older than trees; Sharks have survived five extinction level events, including the one that killed off the dinosaurs; Sharks have electroreception, a sixth-sense that lets them pick up on electric fields generated by living things; Sharks can dive 4,000 feet below the surface; Sharks account for only 6 human fatalities per year, while humans kill 100 million sharks per year. McKeever goes back through time to probe the shark's pre-historic secrets and how it has become the world's most feared and most misunderstood predator, and takes us on a pulse-pounding tour around the world and deep under the water's surface, from the frigid waters of the Arctic Circle to the coral reefs of the tropical Central Pacific, to see sharks up close in their natural habitat. He also interviews ecologists, conservationists, and world-renowned shark experts, including the founders of Greenpeace's Rainbow Warrior, the head of the Massachusetts Shark Research Program, and the self-professed "last great shark hunter." At once a deep-dive into the misunderstood world of sharks and an urgent call to protect them, *Emperors of the Deep* celebrates this wild species that hold the key to unlocking the mysteries of the ocean—if we can prevent their extinction from climate change and human hunters.

Close to Shore Michael Capuzzo, 2002-06-25
Combining rich historical detail and a harrowing, pulse-pounding narrative, *Close to Shore* brilliantly re-creates the summer of 1916, when a rogue Great White shark attacked swimmers along the New Jersey shore, triggering mass hysteria and

launching the most extensive shark hunt in history. In July 1916 a lone Great White left its usual deep-ocean habitat and headed in the direction of the New Jersey shoreline. There, near the towns of Beach Haven and Spring Lake--and, incredibly, a farming community eleven miles inland--the most ferocious and unpredictable of predators began a deadly rampage: the first shark attacks on swimmers in U.S. history. Capuzzo interweaves a vivid portrait of the era and meticulously drawn characters with chilling accounts of the shark's five attacks and the frenzied hunt that ensued. From the unnerving inevitability of the first attack on the esteemed son of a prosperous Philadelphia physician to the spine-tingling moment when a farm boy swimming in Matawan Creek feels the sandpaper-like skin of the passing shark, *Close to Shore* is an undeniably gripping saga. Heightening the drama are stories of the resulting panic in the citizenry, press and politicians, and of colorful personalities such as Herman Oelrichs, a flamboyant millionaire who made a bet that a shark was no match for a man (and set out to prove it); Museum of Natural History ichthyologist John Treadwell Nichols, faced with the challenge of stopping a mythic sea creature about which little was known; and, most memorable, the rogue Great White itself moving through a world that couldn't conceive of either its destructive power or its moral right to destroy. Scrupulously researched and superbly written, *Close to Shore* brings to life a breathtaking, pivotal moment in American history. Masterfully written and suffused with fascinating period

detail and insights into the science and behavior of sharks, *Close to Shore* recounts a breathtaking, pivotal moment in American history with startling immediacy.

Close to Shore Mike Capuzzo, 2001 Describes how, in the summer of 1916, a lone great white shark headed for the New Jersey shoreline and a farming community eleven miles inland, attacking five people and igniting the most extensive shark hunt in history.

Twelve Days of Terror D. G. D.

Fernicola, 2016-05-02 Upon the 100th anniversary of the most terrifying stretch of shark attacks in American history--a wave said to have been the inspiration for *Jaws*--comes a reissue of the classic Lyons Press account and investigation. In July 1916, a time when World War I loomed over America and New York City was in the midst of a deadly polio epidemic, the tri-state area sought relief at the Jersey shore. The Atlantic's refreshing waters proved to be utterly inhospitable, however. In just twelve days, four swimmers were violently and fatally mauled in separate shark attacks, and a fifth swimmer escaped an attack within inches of his life. In

this thoroughly researched account, Dr. Richard Fernicola, the leading expert on the attacks, presents a riveting portrait, investigation, and scientific analysis of the terrifying days against the colorful backdrop of America in 1916 in Twelve Days of Terror.
