Whitlam's Children? Shaun Crowe,2018 Whitlam's Children is the first systematic study of the Labor and Greens relationship in Australia, examining its history, experience in government, and prospects for the future. Based on over forty interviews with party figures - including leaders and senior ministers - the book asks a number of pressing questions about the relationship: what do politicians from both parties think about each other, and what issues unite and divide them; did previous attempts at cooperation, particularly under Julia Gillard, deliver successful government, and how did both parties judge this experiment; and will we ever see a more lasting coalition on the Australian left, to mirror the established arrangement on the Australian right? At its centre, the book examines the minority parliament from 2010 to 2013, the parties' first federal attempt formal cooperation. Exploring both successes and failures, it dedicates chapters to particularly stubborn policy dilemmas, including climate change and refugee settlement. While the interviews revealed a variety of perspectives, even within parties, they uncovered a productive, though often hostile parliamentary relationship; united by a series of shared values, but divided by different approaches to parliament, politics and pragmatism.

The Social Leap William von Hippel,2018-11-13 In the compelling popular science tradition of Sapiens and Guns, Germs, and Steel, a groundbreaking and eye-opening exploration that applies evolutionary science to provide a new perspective on human psychology, revealing how major challenges from our past have shaped some of the most fundamental aspects of our being. The most fundamental aspects of our lives—from leadership and innovation to aggression and happiness—were permanently altered by the social leap our ancestors made from the rainforest to the savannah. Their struggle to survive on the open grasslands required a shift from individualism to a new form of collectivism, which forever altered the way our mind works. It changed the way we fight and our proclivity to make peace, it changed the way we lead and the way we follow, it made us innovative but not inventive, it created a new kind of social intelligence, and it led to new sources of life satisfaction. In The Social Leap, William von Hippel lays out this revolutionary hypothesis, tracing human development through three critical evolutionary inflection points to explain how events in our distant past shape our lives today. From the mundane, such as why we exaggerate, to the surprising, such as why we believe our own lies and why fame and fortune are as likely to bring misery as happiness, the implications are far reaching and extraordinary. Blending anthropology, biology, history, and psychology with evolutionary science, The Social Leap is a fresh and provocative look at our species that provides new clues about who we are, what makes us happy, and how to use this knowledge to improve our lives.

Lean Logic David Fleming,2016 Lean Logic is David Fleming's masterpiece, the product of more than thirty years' work and a testament to the creative brilliance of one of Britain's most important intellectuals. A dictionary unlike any other, it leads readers through Fleming's stimulating exploration of fields as diverse as culture, history, science, art, logic, ethics, myth, economics, and anthropology, being made up of four hundred and four engaging essay-entries covering topics such as Boredom, Community, Debt, Growth, Harmless Lunatics, Land, Lean Thinking, Nanotechnology, Play, Religion, Spirit, Trust, and Utopia. The threads running through every entry are Fleming's deft and original analysis of how our present market-based economy is destroying the very foundations--ecological, economic, and cultural-- on which it depends, and his core focus: a compelling, grounded vision for a cohesive society that might weather the consequences. A society that provides a satisfying, culturally-rich context for lives well lived, in an economy not reliant on the impossible promise of eternal economic growth. A society worth living in. Worth fighting for. Worth contributing to. The beauty of the dictionary format is that it allows Fleming to draw connections without detracting from his in-depth exploration of each topic. Each entry carries intriguing links to other entries, inviting the enchanted reader to break free of the imposed order of a conventional book, starting where she will and following the links in the order of her choosing. In combination with Fleming's refreshing writing style and good-natured humor, it also creates a book perfectly suited to dipping in and out. The decades Fleming spent honing his life's work are evident in the lightness and mastery with which Lean Logic draws on an incredible wealth of cultural and historical learning--from Whitman to Whitefield, Dickens to Daly, Kropotkin to Kafka, Keats to Kuhn, Oakeshott to Ostrom, Jung to Jensen, Machiavelli to Mumford, Mauss to Mandelbrot, Leopold to Lakatos, Polanyi to Putnam, Nietzsche to Næss, Keynes to Kumar, Scruton to Shiva, Thoreau to Toynbee, Rabelais to Rogers, Shakespeare to Schumacher, Locke to Lovelock, Homer to Homer-Dixon--in demonstrating that many of the principles it commends have a track-record of success long pre-dating our current society. Fleming acknowledges, with honesty, the challenges ahead, but rather than inducing despair, Lean Logic is rare in its ability to inspire optimism in the creativity and intelligence of humans to nurse our ecology back to health; to rediscover the importance of place and play, of reciprocity and resilience, and of community and culture. ----- Recognizing that Lean Logic's sheer size and unusual structure could be daunting, Fleming's long-time collaborator Shaun Chamberlin has also selected and edited one of the potential pathways through the dictionary to create a second, stand-alone volume, Surviving the Future: Culture, Carnival and Capital in the Aftermath of the Market Economy. The content, rare insights, and uniquely enjoyable writing style remain Fleming's, but presented at a more accessible paperback-length and in conventional read-it-front-to-back format.

Novel Politics John Uhr,Shaun Crowe,2020-02 Percy Bysshe Shelley once described poets as the 'unacknowledged legislators of the world'. If this is true, Australian political scientists have shown curiously little interest in the role that literary figures play in the nation's political life. Novel Politics takes the relationship between literature and politics seriously, analysing the work of six writers, each the author of a classic text about Australian society. These authors bridge the history of local writing, from pre-Federation colonial Australia (Catherine Spence, Rosa Praed and Catherine Martin) to the contemporary moment (Tim Winton, Christos Tsiolkas and Kim Scott). Novel Politics unpicks the many political threads woven into these books, as they document the social world as it exists, while suggesting new possibilities for the nation's future. As political commentators of a particular kind, all six authors offer unique insights into the deeper roots of politics in Australia, beyond the theatre of parliament and out into the wider social world, as imagined by its dreamers and criticised by its most incisive discontents.--Back cover

Surviving the Future David Fleming,Shaun Chamberlin,2016 Surviving the Future is a story drawn from the fertile ground of the late David Fleming's extraordinary Lean Logic: A Dictionary for the Future and How

to Survive It. That hardback consists of four hundred and four interlinked dictionary entries, inviting readers to choose their own path through its radical vision. Recognizing that Lean Logic's sheer size and unusual structure can be daunting, Fleming's long-time collaborator Shaun Chamberlin has selected and edited one of these potential narratives to create Surviving the Future. The content, rare insights, and uniquely enjoyable writing style remain Fleming's, but are presented here at a more accessible paperback-length and in conventional read-it-front-to-back format. The subtitle--Culture, Carnival and Capital in the Aftermath of the Market Economy--hints at Fleming's vision. He believed that the market economy will not survive its inherent flaws beyond the early decades of this century, and that its failure will bring great challenges, but he did not dwell on this: We know what we need to do. We need to build the sequel, to draw on inspiration which has lain dormant, like the seed beneath the snow. Surviving the Future lays out a compelling and powerfully different new economics for a post-growth world. One that relies not on taut competitiveness and eternally increasing productivity--putting the grim into reality--but on the play, humor, conversation, and reciprocal obligations of a rich culture. Building on a remarkable breadth of intellectual and cultural heritage--from Keynes to Kumar, Homer to Huxley, Mumford to MacIntyre, Scruton to Shiva, Shakespeare to Schumacher--Fleming describes a world in which, as he says, there will be time for music. This is the world that many of us want to live in, yet we are told it is idealistic and unrealistic. With an evident mastery of both economic theory and historical precedent, Fleming shows that it is not only desirable, but actually the only system with a realistic claim to longevity. With friendliness, humor, and charm, Surviving the Future plucks this vision out of our daydreams and shows us how to make it real.

Switch Chip Heath, Dan Heath, 2010-02-16 Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller *Made to Stick*. Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results: • The lowly medical interns who managed to defeat an entrenched, decades-old medical practice that was endangering patients • The home-organizing guru who developed a simple technique for overcoming the dread of housekeeping • The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology, and other fields to shed new light on how we can effect transformative change. *Switch* shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your waistline.

The Manchurian Candidate Richard Condon, 2013-11-25 The classic thriller about a hostile foreign power infiltrating American politics: “Brilliant . . . wild and exhilarating.” —The New Yorker A war hero and the recipient of the Congressional Medal of Honor, Sgt. Raymond Shaw is keeping a deadly secret—even from himself. During his time as a prisoner of war in North Korea, he was brainwashed by his Communist captors and transformed into a deadly weapon—a sleeper assassin, programmed to kill without question or mercy at his captors’ signal. Now he’s been returned to the United States with a covert mission: to kill a candidate running for US president . . . This “shocking, tense” and sharply satirical novel has become a modern classic, and was the basis for two film adaptations (San Francisco Chronicle). “Crammed with suspense.” —Chicago Tribune “Condon is wickedly skillful.” —Time

The Magical Language of Others: A Memoir E. J. Koh, 2020-01-07 Winner of the Pacific Northwest Booksellers Association Award and the Washington State Book Award in Biography/Memoir Named One of the Best Books by Asian American Writers by Oprah Daily Longlisted for the PEN Open Book Award *The Magical Language of Others* is a powerful and aching love story in letters, from mother to daughter. After living in America for over a decade, Eun Ji Koh’s parents return to South Korea for work, leaving fifteen-year-old Eun Ji and her brother behind in California. Overnight, Eun Ji finds herself abandoned and adrift in a world made strange by her mother’s absence. Her mother writes letters in Korean over the years seeking forgiveness and love—letters Eun Ji cannot fully understand until she finds them years later hidden in a box. As Eun Ji translates the letters, she looks to history—her grandmother Jun’s years as a lovesick wife in Daejeon, the loss and destruction her grandmother Kumiko witnessed during the Jeju Island Massacre—and to poetry, as well as her own lived experience to answer questions inside all of us. Where do the stories of our mothers and grandmothers end and ours begin? How do we find words—in Korean, Japanese, English, or any language—to articulate the profound ways that distance can shape love? *The Magical Language of Others* weaves a profound tale of hard-won selfhood and our deep bonds to family, place, and language, introducing—in Eun Ji Koh—a singular, incandescent voice.

Why Forests? Why Now? Frances Seymour, Jonah Busch, 2016-12-27 Tropical forests are an undervalued asset in meeting the greatest global challenges of our time—averting climate change and promoting development. Despite their importance, tropical forests and their ecosystems are being destroyed at a high and even increasing rate in most forest-rich countries. The good news is that the science, economics, and politics are aligned to support a major international effort over the next five years to reverse tropical deforestation. *Why Forests? Why Now?* synthesizes the latest evidence on the importance of tropical forests in a way

that is accessible to anyone interested in climate change and development and to readers already familiar with the problem of deforestation. It makes the case to decisionmakers in rich countries that rewarding developing countries for protecting their forests is urgent, affordable, and achievable.
