Musical Creativity in Restoration England Rebecca Herissone,2013 Musical Creativity in Restoration England is the first comprehensive investigation of approaches to creating music in late seventeenth-century England. Understanding creativity during this period is particularly challenging because many of our basic assumptions about composition - such as concepts of originality, inspiration and genius - were not yet fully developed. In adopting a new methodology that takes into account the historical contexts in which sources were produced, Rebecca Herissone challenges current assumptions about compositional processes and offers new interpretations of the relationships between notation, performance, improvisation and musical memory. She uncovers a creative culture that was predominantly communal, and reveals several distinct approaches to composition, determined not by individuals, but by the practical function of the music. Herissone's new and original interpretations pose a fundamental challenge to our preconceptions about what it meant to be a composer in the seventeenth century and raise broader questions about the interpretation of early modern notation.

A Sound Approach to Teaching Instrumentalists Stanley L. Schleuter,1997 Designed as a core text, the second edition of A Sound Approach to Teaching Instrumentalists applies contemporary research on musical content and learning sequences to the instrumental classroom. Rather than reinforce traditional teaching methodologies, A Sound Approach to Teaching Instrumentalists seeks to encourage musical independence and basic musicianship among students. Its premise is that music consists primarily of tonal and rhythmic content and that instrumental teaching and learning can best be accomplished when musical content and learning skills are properly sequenced. A valuable resource for students and professionals, A Sound Approach to Teaching Instrumentalists, Second Edition will become the standard by which instrumental methods texts are measured in years to come.

A Descriptive Catalogue of the Music of Charles Ives James B. Sinclair,1999-01-01 This catalogue of the music of Charles Ives contains 728 entries covering all of the prolific composer's works. James Sinclair's book presents information produced by recent Ives scholarship and generous commentary on each of Ives's compositions. It completes the work begun by musicologist John Kirkpatrick in 1955, when Ives's music manuscripts were deposited in the Yale Music Library. Ives's works are arranged alphabetically by title within genres. Whenever possible, each entry includes the main title and any other titles the composer may have used; the forces required; the duration; headings of movements; publication history; citation of the first known performance and first recording; the derivation of the work, listing music on which it may be modeled or from which it may borrow material; the principal literature treating the piece; and commentary on these and other matters. The catalogue also provides musical incipits for all Ives's extant works, seven appendixes (covering his work lists, 'Quality Photo' lists, his songbooks, a chronology of his life, recordings made by Ives, and his private publications and commercial publishers), three concordances, and four extensive indexes (addresses, names, titles, and musical borrowings).

John Zorn John Brackett,2008-11-19 Following his English edition of Alma Mahler-Werfel's Diaries 1898-1902, Antony Beaumont presents both the first comprehensive biography of the composer and conductor Alexander Zemlinsky (1871-1942) and a critical assessment of his works. Zemlinsky--all hail to you! wrote the young Alma. All hail to you and your art. When she first met him, Zemlinsky was the most promising Viennese composer of his generation. In 1901, when Alma abruptly ended their passionate love affair in order to marry Gustav Mahler, the crisis served to transform Zemlinsky's talent into mastery. Only long after his death, however, did his music begin to receive its due. Zemlinsky was central to the musical life of Vienna and Central Europe, and this brilliant biography illuminates a social and cultural milieu that disappeared forever with the triumph of Hitler's Reich. The author details the composer's early years as a protégé of Brahms and Mahler, his complex friendship with his brother-in-law Arnold Schoenberg, the influence of his teaching on the boy-prodigy Erich Korngold, his kindly and helpful attitude toward the hypersensitive Anton Webern, and his heartfelt friendship with Alban Berg. Zemlinsky was one of the leading conductors of the interwar period, considered by both Schoenberg and Stravinsky the finest they had ever heard. The author charts Zemlinsky's career from Vienna to Berlin, St. Petersburg, and Prague, providing insight into his Catholic-Sephardic background and investigating his keen interest in esoteric aspects of music, including color symbolism and numerology. The author's analyses of Zemlinsky's major scores are accessible and fully contextualized.
