From these giant Lego blocks, people are building homes of all shapes and sizes. The purpose of this guide is to provide a detailed walk-through of each step of the process of shipping container selection, transport, foundation, utilities, modification, and finishing. The Shipping Container Homes Book Kenelm Hunt,2021-10-08 A Comprehensive Guide To Build An Environmentally Friendly Home With Shipping Containers Container homes are just what they sound like; homes built from container steel that transports goods on ships, trains, and trucks. From this container steel, homes of all shapes and sizes can be built. Shipping containers are used to construct homes, cabins, studios, and offices because with about 14 million 'out-of-service' containers worldwide, several of such containers are available for these purposes, not to mention the appeal that comes with experimenting with these giant blocks of containers. Aside from trendiness, building container homes have gained a wider interest amongst many because it saves money to construct. As such, several potential homeowners are seeking for homes with lesser construction and maintenance

costs. Besides, the perception exists that container homes contribute to recycling initiatives. Containers come in different sizes, such as 10ft, 20ft, and 40ft, with the smallest shipping container providing a floor space of about 100 square feet for a shipping container home.
