Street Value Rosten Woo,Meredith TenHoor,2010-06-02 Downtown Brooklyn's Fulton Mall is one of the most bustling public spaces in New York City. A colossus of commerce, itwelcomes over one hundred thousand shoppers daily and ranks among the most profitable commercial real estate in the entire country, and is also home to some of the city's most recognized institutions, including cheesecake mecca Junior's, that have been immortalized in song, film, and culture. Despite its historic link to Brooklyn's past and its financial success as a shopping district, Fulton Street is rarely celebrated in New York. The street's hand-painted signs, customized jewelry, rare sneakers, mega-church, and vendors offer a special sampling of noncorporate commerce, but many consider its sensorial and physical density a sign of blight. Misunderstandings about race, class, and profitability have led Fulton Street to be characterized as run-down, dangerous, or underutilized, and as a result it has been subject to nearly continuous renovation. Recently rezoned and becoming

increasingly attractive to national chain stores, Fulton Street is once again poised for big changes. Street Value is a challenge to creatively rethink the planning and urban design of Fulton Street and other urban shopping districts. Street Value explores the mall's historical and contemporary conditions through original essays, oral histories, new and archival photographs, historic documents, and interviews with key planners, developers, city officials, historians, and activists from the 1960s to the present. Street Value probes the ideology of redevelopment and demonstrates how commercial, governmental, and activist forces have coalesced to produce one of Brooklyn's most legendary public spaces.

Cultures of Selling Laura Ugolini, 2018-12-07 The study of consumption and its relationship to cultural and social values has become a vibrant and important field in recent years. Hitherto however, relatively few detailed and full length works on this topic have been published. In what will become a seminal volume, this book examines retail selling in various historical contexts and locations, as both an activity at once 'mundane' and almost universal. The book introduces the reader to the existing literature relevant to the subject; and explores the widespread perceptions of moral ambiguity surrounding the practice of selling consumer goods - ranging from concerns about the adulteration of goods, to fears about sharp practice on the part of retailers - and places such concerns in the context of wider societal values and ideas. The ambivalence towards retail selling and sellers is also a central focus of the collection, focussing on the attempts by retailers to develop selling techniques and successful practices of salesmanship, and at the same time establish widely-shared understandings of 'good' retailing. The book also delves into the more dubious practices of retail selling, including practices on the margin of legality, the issue of credit and changing attitudes towards debt. Uniquely the book examines how sales techniques relate to the wider context of a whole shopping 'experience' or shopping environment. Taken as a whole, this volume will provide a first port of call for students, researchers and others interested in exploring consumer cultures, and the cultural norms and practices involved in the sale of consumer goods in various historical periods and geographical contexts.
