*Reckonings* Hertha D. Sweet Wong, Lauren Stuart Muller, Jana Sequoya Magdaleno, 2008-03-11 The fifteen Native women writers in *Reckonings* document transgenerational trauma, yet they also celebrate survival. Their stories are vital testaments of our times. Unlike most anthologies that present a single story from many writers, this volume offers a sampling of two to three stories by a select number of both famous and lesser known Native women writers in what is now the United States. Here you will find much-loved stories, many made easily accessible for the first time, and vibrant new stories by well-known contemporary Native American writers as well as fresh emergent voices. These stories share an understanding of Native women's lives in their various modes of loss and struggle, resistance and acceptance, and rage and compassion, ultimately highlighting the individual and collective will to endure against all odds. *Reckonings* features short stories by: Paula Gunn Allen, Kimberly M. Blaeser, Beth E. Brant, Anita Endrezze, Louise Erdrich, Diane Glancy, Reid Gómez, Janet Campbell Hale, Joy Harjo, Linda Hogan, Misha Nogha, Beth H.

Piatote, Patricia Riley, Leslie Marmon Silko, and Anna Lee Walters.

### **The Foundations of Celestial Reckoning** Christopher

Cullen,2016-12-01 The Foundations of Celestial Reckoning gives the reader direct access to the foundational documents of the tradition of calculation created by astronomers of the early Chinese empire between the late second century BCE and the third century CE. The paradigm they established was to shape East Asian thought and practice in the field of mathematical astronomy for centuries to come. It was in many ways radically different from better known traditions of astronomy in other parts of the ancient world. This book includes full English translations of the first three systems of mathematical astronomy adopted for use by imperial astronomical officials, together with introductory material explaining the origin and nature of each system, and a general introduction to the work as a whole. The translations, which are accompanied by the original Chinese text, give a consistent rendering of all technical terms, and include detailed explanatory notes. The text in which the second of the three systems is found also includes a unique collection of documents compiled around 178 CE by two experts in the field, one of whom was the author of the third

system translated in this book. Using material transcribed from government archives of the two preceding centuries, these scholars carefully document and review controversies and large-scale official debates on astronomical matters up to their own time. Nothing equivalent in detail and clarity has survived from any other ancient culture. The availability of the totality of this material in English opens new perspectives to all historians of pre-modern astronomy.

**The Quran: A New Interpretation** M. B. Behbudi, Dr Colin

Turner, 2013-09-13 This new rendering of the Holy Quran into the

English language is the first of its kind, since it is a combination of translation and exegesis in which the author 'opens out' the verses of the Holy Book to reveal some of the layers of meaning expounded by the Prophet and transmitted through the ages by the Prophet's companions, family and the scholars who followed them. The fruit of over thirty years of research into the principles of Quranic exegesis and hadith analysis, this work matches a depth of Arabic and Islamic learning with a mastery of English that is lucid and accessible while preserving the integrity of the original text.

**Greek Lyric, Tragedy, and Textual Criticism** W. S.

Barrett, 2007-06-07 W. S. Barrett (1914-2001) was one of the finest Hellenists of the second half of the twentieth century, known above all for his celebrated edition of Euripides' *Hippolytus*. This volume of his collected scholarly papers includes five articles published between 1954 and 1978, together with a much larger number of others that remained unpublished in his lifetime and are made known here for the first time. They deal mainly with Greek lyric poetry (Stesichorus, Pindar, Bacchylides) and Tragedy. Students of

Greek literature will welcome this unexpected posthumous addition to Barrett's oeuvre, as well as the reappearance of the published articles.
