Shredded Ian Fraser, 2015-10-14 This is the definitive account of the Royal Bank of Scotland scandal. For a few brief months in 2007 and 2009, the Royal Bank of Scotland was the largest bank in the world. Then the Edinburgh-based giant - having rapidly grown its footprint to 55 countries and stretched its assets to £2.4 trillion under its hubristic and delinquent former boss Fred Goodwin - crashed to earth. In *Shredded*, Ian Fraser explores the series of cataclysmic misjudgments, the toxic internal culture and the 'light touch' regulatory regime that gave rise to RBS/NatWest's near-collapse. He also considers why it became the most expensive bank in the world to bail out and why a culture of impunity was allowed to develop in the banking sector. This new edition brings the story up to date, chronicling the string of scandals that have come to light since taxpayers rescued RBS and concluding with an evaluation of the attempts of the bank's post-crisis chief executives, Stephen Hester and Ross McEwan, to dismantle Goodwin's disastrous legacy and restore the damaged institutions to health. 'A gripping account - RBS was a rogue business, operating in what had become a rogue industry, with the connivance of government. Read it and weep' - Martin Woolf, Financial Times

Interim Design Assessment for the Pueblo Chemical Agent Destruction Pilot Plant

National Research Council,Division on Engineering and Physical Sciences,Board on Army Science and Technology,Committee to Assess Designs for Pueblo and Blue Grass Chemical Agent Destruction Pilot Plants,2005-02-18 In 1996, Congress enacted directing the Department of Defense to assess and demonstrate technology alternatives to incineration for destruction of the chemical weapons stored at Pueblo Chemical and Blue Grass Army Depots. Since then, the National Research Council (NRC) has been carrying out evaluations of candidate technologies including reviews of engineering design studies and demonstration testing. Most recently, the NRC was asked by the Army to evaluate designs for pilot plants at Pueblo and Blue Grass. These pilot plants would use chemical neutralization for destroying the chemical agent and the energetics in the munitions stockpiles of these two depots. This report provides the interim assessment of the Pueblo Chemical Agent Destruction Pilot Plant (PCAPP) to permit adjustment of any significant problems as soon as possible. The report presents an

analysis of the issues about the current PCAPP design and a series of findings and recommendations about ways to reduce concerns with involve the public more heavily in the process.

Residue Reviews Francis A. Gunther,2013-11-11 That residues of pesticide and other foreign chemicals in foodstuffs are of concern to everyone everywhere is amply attested by the reception accorded previous volumes of Residue Reviews and by the gratifying enthusiasm, sincerity, and efforts shown by all the individuals from whom manuscripts have been solicited. Despite much propaganda to the contrary, there can never be any serious question that pest-control chemicals and food additive chemicals are essential to adequate food production, manufacture, marketing, and storage, yet without continuing surveillance and intelligent control some of those that persist in our foodstuffs could at times conceivably endanger the public health. Ensuring safety-in-use of these many chemicals is a dynamic challenge, for established ones are continually being displaced by newly developed ones more acceptable to food technologists, pharmacologists, toxicologists, and changing pest-control requirements in progressive food-producing economies. These matters are also of genuine concern to increasing numbers of governmental agencies and legislative bodies around the world, for some of these chemicals have resulted in a few mishaps from improper use. Adequate safety-in-use evaluations of any of these chemicals persisting into our food stuffs are not simple matters, and they incorporate the considered judgments of many individuals highly trained in a variety of complex biological, chemical, food technological, medical, pharmacological, and toxicological disciplines.
