Restart. Sport After the Covid-19 Time Out Jörg Krieger, April Henning, Lindsay Parks

Pieper, 2022-11-11 In the edited collection *Restart: Sport After the Covid-19 Time Out*, practitioners and international scholars explore the “restart” of sport and fitness following the initial period of lockdowns during spring 2020. The chapters provide insight into the sport and fitness landscape following the initial wave of the pandemic. The book focuses on challenges for sport providers, consequences for sporting participants, and opportunities for new ways of practicing sports. It contributes contemporaneous data, analyses, and insights into the global sport landscape that has been impacted by the Covid-19 pandemic. This book presents a variety of interdisciplinary perspectives in a total of nineteen individual chapters, organized around five main themes. The first four chapters deal with the restart of sporting events in four countries. This section is followed by an assessment of the Olympic Movement’s challenges after its postponement of the 2020 Summer Olympic Games to 2021. Chapters in the next theme provide analyses of how national governments handled restarting sport and fitness in different geographical locations. Finally, the last three chapters look at the role of the media during the restart phase, both in reporting sport and with regards to innovations and the implementation of new technology in staging and broadcasting elite sport.

Hollywood Shutdown Kate Fortmueller, 2021-07-20 By March 2020, the spread of COVID-19 had reached pandemic proportions, forcing widespread shutdowns across industries, including Hollywood. Studios, networks, production companies, and the thousands of workers who make film and television possible were forced to adjust their time-honored business and labor practices. In this book, Kate Fortmueller asks what happened when the coronavirus closed Hollywood. *Hollywood Shutdown* examines how the COVID-19 pandemic affected film and television production, influenced trends in distribution, reshaped theatrical exhibition, and altered labor practices. From January movie theater closures in China to the bumpy September release of *Mulan* on the Disney+ streaming platform, Fortmueller probes various choices made by studios, networks, unions and guilds, distributors, and exhibitors during the evolving crisis. In seeking to explain what happened in the first nine months of 2020, this book also considers how the pandemic will transform Hollywood practices in the twenty-first century.

The Ross 248 Project Les Johnson, Ken Roy, 2023-05-02 HUMANITY’S HOPE FOR A BETTER FUTURE AT A NEW STAR A bold journey into a future where humanity and its children travel to a new star where they must overcome the unexpected challenges on the exoplanets that await them—or

die trying. Traveling to the stars will be difficult, but not, perhaps, the most difficult part. What about when we get to another star? What then? Will the planets be immediately habitable? Not likely. Will those who undertook the journey be able to easily turn around and come home if they don't find "Earth 2.0?" Almost certainly not. Therein lies the challenge: Finding worlds that are potentially habitable and then taking the time, perhaps centuries, to make them compatible with Earth life. They will encounter mysteries and unexpected challenges, but the human spirit will endure. Join this diverse group of science fiction writers and scientists as they take up the challenge of The Ross 248 Project. Contributors: USAF General Steven Kwast Patrick Chiles Stephanie Osborn Brent Ziarnick Laura Montgomery Daniel M. Hoyt & E. Marshall Hoyt Matthew Williams D. J. Butler Robert E. Hampson Monalisa Foster J. L. Curtis K. S. Daniels Les Johnson & Ken Roy At the publisher's request, this title is sold without DRM (Digital Rights Management). About A Traveler's Guide to the Stars by Les Johnson: "We effortlessly travel round and round our sun, and we wonder: How hard would it be, really, to travel to another star? Les Johnson shows us the rocket science we'd need; that's easy enough. But then he describes with wonderful detail the Starshot nanocrafts, chipsats, Starwisps, worldships, and metamaterial LightSails that we might use. It's a flight of imagination backed up with real out-of-this-world science." —Bill Nye "Les Johnson is that rare breed of writer who can make rocket science comprehensible even to the layperson. He has more than paid his dues in the field, and his enthusiasm for the cause of interstellar exploration shines through. But so does his sense of humor, his humanity, and his zest for life. This is highly recommended stuff." —David Weber "Is humanity ready to take on the immensities outside our solar system? This traveler's guide lays out methods and means that may enable our first steps into the great unknown beyond the sun's familiar campfire." —David Brin About Mission to Methone: "The spirit of Arthur C. Clarke and his contemporaries is alive and well in Johnson's old-fashioned first-contact novel, set in 2068. . . . There's a great deal here for fans of early hard SF." —Publishers Weekly About The Spacetime War: "Johnson, a NASA physicist, brings verisimilitude and scientific accuracy to this adventure, and his passion for the details of space travel will undoubtedly please readers looking for old-school hard science fiction. His narrative enjoys a slow-building sense of development as he gradually unravels multiple mysteries . . . Johnson's fans will find plenty to enjoy." —Publishers Weekly
